HAZARDOUS INFLIGHT WEATHER ADVISORY SERVICE (HIWAS)

HIWAS is a national program for broadcasting hazardous weather information (SIGMET's, convective SIGMET's, Center Weather Advisories (CWA), AIRMET's, and urgent PIREP's) on a continuous basis over selected VOR's. The program is operational in the Jacksonville, Miami, and Houston Air Route Traffic Control Center (ARTCC) areas. The chart on the following page identifies the current broadcast outlet locations and frequencies. Frequencies shown in the Atlanta ARTCC area are for planning purposes only. HIWAS will be expanded on an ARTCC by ARTCC basis.

Pilots should be aware that:

- Flight service stations broadcast information on hazardous weather not yet covered by an advisory and make an announcement on their frequencies that new HIWAS information is available.

- Controllers in ARTCC's and air traffic control terminals announce updates to HIWAS information on all appropriate frequencies.

- Controllers and specialists will not routinely broadcast SIGMET's, convective SIGMET's, CWA's, AIRMET's, and urgent PIREP's in the commissioned HIWAS areas.

User comments regarding the effectiveness of the HIWAS program and any proposed revision to HIWAS procedures are solicited.

Mail comments to:

Department of Transportation
Federal Aviation Administration
ATTN: ATO-360
800 Independence Ave. S.W.
Washington, DC 20591

Note: For further information on the HIWAS program, refer to the Airman's Information Manual (AIM) and Airport/Facility Directory (AFD). Operational sites are published in the AFD under radio aids to navigation.

AIRPORT RADAR SERVICE AREAS (ARSA)

The National Airspace Review Terminal Airspace Task Group 1-2.2 recommended the ARSA Program as a replacement for the existing Terminal Radar Service Area Program and the FAA has adopted that recommendation. ARSA designations have been made, and effective dates established, for the locations listed below. The following is a summary of the pilot requirements and the ATC procedures for ARSA's. Graphic depictions of each ARSA are also included.

Unless otherwise authorized or required by ATC, the following provisions apply to aircraft operating within an ARSA:

1. Aircraft approaching that would penetrate the ARSA must establish two-way radio communications with ATC prior to entering the ARSA and maintain that communication while operating within the ARSA.

2. Aircraft departing the primary airport within the ARSA must establish two-way communications with ATC prior to departure and maintain that communication while operating within the ARSA. Aircraft departing a satellite airport within the ARSA must contact ATC as soon as practicable after takeoff.

3. Except in an emergency, all operations must be in compliance with ATC clearances and instructions.

4. All arrivals and departures within the ARSA must be in compliance with FAA arrival and departure traffic patterns.

5. Ultralight vehicles and parachute operations may not be conducted within the ARSA except under the terms of an ATC authorization.

6. NOTAM's pertaining to flight within the ARSA must be reviewed as a part of preflight action required by FAR 91.5.

Within ARSA's, ATC will provide the following services:

1. Radar sequencing of all arrivals.

2. Standard separation between all instrument flight rules (IFR) flights.

3. Traffic advisories and safety advisories to all aircraft.

4. Resolve any potential conflict between an aircraft operating IFR and an aircraft operating under visual flight rules by application of conflict resolution procedures.

ARSA's have been designated at the following locations to be effective June 5, 1986.

Albuquerque International Airport, NM
Greater Cincinnati International Airport, KY
Indianapolis International Airport, IN
Phoenix Sky Harbor International Airport, AZ
Tucson International Airport, AZ
Davis-Monthan Air Force Base, AZ
Wichita Mid-Continent Airport, KS

An ARSA has been designated at the following airport to be effective July 3, 1986.

Dallas Love Field, Texas

An ARSA has been designated at the following airport to be effective July 31, 1986.

Lafayette Regional Airport, LA

ARSA's have been designated at the following locations to be effective on August 28, 1986.

Raleigh-Durham, NC

Dulles International Airport, Washington, DC

TERMINAL AREA GRAPHIC NOTICE
(NOT TO BE USED FOR NAVIGATION)

SOUTH LAKE TAHOE, CALIFORNIA
LAKE TAHOE AIRPORT

The Lake Tahoe Airport is closed to aircraft registering 77.1 or more decibles (as listed in FAA AC36-3 series) from 2000-0800 hours local time.

ARRIVAL PROCEDURES:

CAUTION: NORMALLY ASPIRATED PISTON ENGINES SHOULD BE LEANED TO PROVIDE A BEST-POWER MIXTURE DURING THE LANDING. DUE TO THE POSSIBILITY OF AN ABORTED APPROACH, PILOTS OF SUPERCHARGED AIRCRAFT SHOULD USE CAUTION WITH THEIR MIXTURE DUE TO FOULING OF THE SPARKPLUGS AT LOW POWER AND RICH MIXTURE.

RUNWAY 36: When arriving from the northwest through the east, enter the pattern on a wide right downwind, or as directed by the Tower.

When arriving from the southeast through the southwest, the Tower will normally direct you straight-in. If that is not practicable, request an over-flight for right traffic. Make your over-flight at or above 8000' MSL, and descend to pattern altitude on crosswind.

When arriving from the west, the Tower may direct you to cross over the field (mid-field crosswind) for right traffic.

High performance aircraft: Tower will normally assign a left downwind, fly base leg between the river and the ridge or as directed by Tower.

NOTE: CAUTION IS ADVISED DUE TO POSSIBLE DOWNDRAFTS, PARTICULARLY ON SHORT FINAL AND WHEN NORTHERLY WINDS EXCEED 15 KNOTS.

RUNWAY 18: When arriving from the northwest through the east, Tower may direct you to make a straight in. Descend north of the shoreline to cross the shoreline over the meadow, slightly west of "straight in", and at or above 7500' MSL.

When arriving from the southeast through the southwest, Tower will usually direct you to a wide left down-wind entry. If arriving from southwest to remain as far south as feasible until crossing the extended centerline.

Caution is advised due to possible traffic climbing out and/or circling the golf course to gain altitude.

When arriving from the west, Tower normally will advise you to make a straight in. Make your "base" leg north of the shoreline, and turn final at or above 7500' MSL.

CAUTION: ROTOR ACTIVITY (UP AND DOWN-DRAFTS) OFTEN EXISTS THROUGHOUT THE BASIN AND ESPECIALLY ON THE FINAL APPROACH WHEN SOUTHERLY WINDS EXIST. IF PRACTICABLE, MAKE YOUR AIM-POINT APPROXIMATELY ONE-THIRD OF THE WAY DOWN FROM THE RUNWAY (NEAR TAXIWAY "E"). OVER 5000' OF RUNWAY REMAINS FROM THAT POINT.

PATTERN ALTITUDES:

Small aircraft - 7500' MSL (1236' above the airport)
Large aircraft - 8000' MSL (1736' above the airport)

DEPARTURE PROCEDURES:

CAUTION: DENSITY ALTITUDE CAN AND DOES EXCEED 10,000'. PLEASE COMPUTE YOUR PERFORMANCE FACTORS ACCORDINGLY, USE DENSITY ALTITUDE LEANING TECHNIQUES APPROPRIATE TO YOUR AIRCRAFT PRIOR TO TAKEOFF AND ENSURE THAT YOUR WEIGHT AND BALANCE IS WELL WITHIN LIMITATIONS. (Suggestion: Reduce your useful load by at least 2.5% for each 1000' of density altitude, particularly in normally aspirated aircraft.)

NOTE: WE LIVE IN A VERY NOISE-SENSITIVE AREA. PLEASE HELP US BY CLIMBING AT YOUR BEST RATE OF CLIMB SPEED (Vy), AND BY REDUCING TO YOUR CLIMB-POWER SETTING AS SOON AS YOU FEEL IT IS PRACTICABLE.

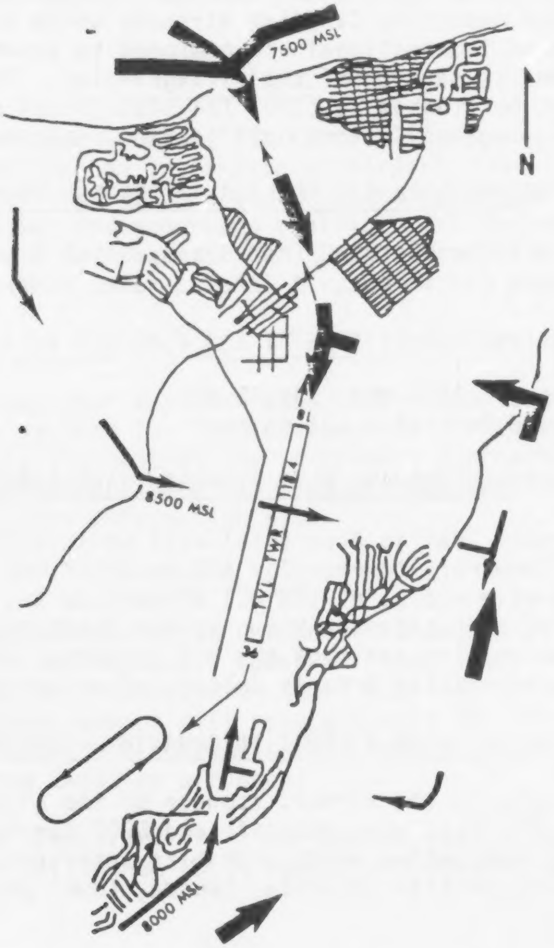
RUNWAY 36: Follow the extended centerline approximately 3/4 mile. At that point you will be abeam a white-fenced pasture and over a large red arrow. Make a slight left turn (to approximately 320 degrees) and follow the meadow to the shoreline. Once you have crossed the shoreline, and are above 7500' MSL turn to your departure heading.

NOTE: Aircraft remaining in closed traffic may make a normal traffic pattern.

RUNWAY 18:

CAUTION: ALL TERRAIN SOUTH OF THE AIRPORT IS ABOVE THE AIRPORT ELEVATION. DOWNDRAFTS IN EXCESS OF 500FPM OFTEN EXIST THROUGHOUT THE DEPARTURE AREA. CHECK YOUR CLIMB GRADIENT AND OTHER PERFORMANCE FIGURES ACCORDINGLY.

After clearing the airport boundary, make a slight right turn to follow the river. If making a downwind departure, do not turn crosswind until reaching 7500' MSL, make a wide downwind turn. If you need additional altitude, advise the Tower you will be climbing over the golf course. Use a right-turn climbing pattern, watch out for other traffic, and advise the Tower when you depart the golf course. Downdrafts often exist near the mountains - stay over the golf course.



EXPO '86

May 2, 1986, through October 13, 1986

In anticipation of a significant increase of aircraft activity to and from the Vancouver, British Columbia, Canada, area during the 1986 World Exposition, the following flight information is provided to enhance safety and minimize air traffic delays.

BELLINGHAM, WASHINGTON, AREA

The Bellingham area includes the following airports:

Bellingham International (BLI)
Blaine Municipal (WA09)
Lynden (WA33)

Bellingham International is a port of entry and customs services are available from 8 a.m. until 5 p.m., locally and at other times, upon 1 hours advance notice. U.S. Airmen departing Canadian airspace which intend to land and clear Customs at Bellingham International are reminded to annotate their Customs requests in the remarks section of their flight plan. The Customs office telephone number at Bellingham is (206) 734-5463 (local exchange). Responsibility for ensuring Customs notification rests with the pilot.

TEMPORARY FAA BELLINGHAM CONTROL TOWER

The control tower will be operated from 8 a.m. until 8 p.m., daily, from May 1, 1986, through October 25, 1986.

Bellingham frequencies:

Bellingham Tower - 124.9 MHz, 239.25 MHz
Bellingham Ground Control - 121.65 MHz

BELLINGHAM (BLI) AIRPORT TRAFFIC AREA

The Bellingham Airport Traffic Area (ATA) will be in effect during the hours of operation for the temporary tower. The ATA is described as that airspace within a 5 statute mile radius of the BLI airport up to, but not including, 3,000' AGL excluding that airspace known as the Abbotsford-Bellingham Flight Information area which lies north of the BLI airport. The Abbotsford-Bellingham Flight Information Area is delineated on aeronautical charts.

BELLINGHAM AIRPORT INFORMATION - GENERAL

The Port of Bellingham is the airport sponsor of the airport. The traffic pattern is 1,200' for fixed wing aircraft and 800' for helicopters. The sponsor has a local regulation which prohibits intersection departures at the airport. Abbotsford, British Columbia, Canada, tower provides limited traffic

information service on 119.4 MHz to VFR aircraft operating between 1,500' and 4,000' MSL in an area generally described as between the U.S./Canadian border and Ferndale, and between the shoreline and Highway 9.

VFR FLIGHT PLANS

All pilots are encouraged to file a flight plan. Arriving aircraft should close their flight plans by radio with Bellingham FSS, on 123.6 MHz or 122.3 MHz. If unable, pilots may call the Bellingham FSS at 734-6400 (local exchange) or 1-800-833-0310 upon arrival.

Canadian/U.S. rules require that all aircraft operating VFR must be on a VFR flight plan prior to crossing the Canadian/U.S. border. Airfiles are discouraged and pilots are requested to file their flight plans 1 hour in advance of proposed departure times.

Pilots departing the U.S. from the Bellingham area are reminded that significant differences exist between Canadian and U.S. rules and procedures. Canadian officials have requested all U.S. pilots be cognizant of the requirement that flight plans are mandatory while operating in Canadian airspace.

IFR TRAFFIC

Vancouver Area Control Center (ACC) is the controlling agency for IFR aircraft operating to/from the Bellingham International Airport. Due to the expected increase in the volume of traffic generated by Expo '86, some delays may be encountered for IFR arrival and departure traffic. The Vancouver ACC has requested that U.S. airmen not request VFR/IFR practice ILS Runway 16 approaches to the Bellingham International Airport during Expo '86.

IFR ARRIVALS BLI INTERNATIONAL

Be prepared to discontinue your approach based upon local traffic conditions and enter a VFR traffic pattern for landing sequence. Pilots arriving IFR are requested to be extremely vigilant as the instrument approaches serving the Bellingham International Airport enter an area of high traffic activity in the Abbotsford-Bellingham Flight Information area.

VFR FLIGHT

Aircraft landing in Vancouver, British Columbia, Canada, should be extremely alert while operating in the Vancouver Lower Mainland area. Numerous aerial demonstrations and other aviation related sport activities are planned for Expo '86. The majority of these events will take place in the Vancouver Harbour Central Zone. The following VFR egress/ingress routes are recommended for traffic operating to/from Canadian airspace:

Bellingham (BLI) to Abbotsford (YXX) northbound east of Lynden
Abbotsford (YXX) to Bellingham (BLI) southbound west of Lynden

BLI to Vancouver (YVR) via Interstate 5 (I-5) using right side separation east/west of the highway. Extreme caution should be taken in the vicinity of the Abbotsford Localizer.

U.S. Airmen desiring additional information on Canadian area airports, rules and regulations, and Custom services may request (in writing) an Air Tourist Information Guide which is available without charge from:

Transport Canada (EXPO Guide)
800 Burrard Street
P.O. Box 220
Vancouver, British Columbia, Canada V6Z2JB

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAM's ISSUED BY BOTH THE U.S. AND CANADA PRIOR TO CONDUCTING FLIGHT.

SPECIAL TRAFFIC MANAGEMENT PROGRAM
CAPE COD AND ADJACENT ISLAND AREA AIRPORTS
MAY 15 THROUGH OCTOBER 30, 1986

In anticipation of the large number of aircraft operating to and from the Cape Cod and adjacent Island areas during the period May 15 through October 30, the following procedures will be used to enhance safety and minimize air traffic delays.

****TRAFFIC MANAGEMENT PROGRAM****
CAPE COD AND ADJACENT ISLAND AREA

For the purpose of this Special Traffic Management Program, the Cape Cod and adjacent Island area includes the following airports:

Hyannis Barnstable Municipal-Boardman/Polando Field	- HYA
Nantucket Memorial Airport	- ACK
Martha's Vineyard Airport	- MVY

****VFR ENROUTE AND HOLDING****

Pilots are urged to become familiar with VFR holding and reporting points (SEE GRAPHIC).

Arriving aircraft are encouraged to monitor ATIS, where available, and then contact the appropriate tower when 10-15 miles from the airport. Advise receipt of ATIS information on initial contact. Aircraft landing Martha's Vineyard are requested to monitor tower frequency far enough out to obtain and advise the tower on initial contact, "HAVE NUMBERS".

Aircraft enroute Hyannis Airport from Sagamore Bridge, Martha's Vineyard and Cotuit areas should exercise caution due to high density military traffic on IFR approach to runway 23, Otis Air National Guard Base.

Arrival Points	Arrival Direction	Holding Direction
HYANNIS AIRPORT		
Sandy Neck	North	North
Dennis Drive In	Northeast	Northeast
Sagamore Bridge	Northwest	Northwest
Cotuit	West	Southwest
Dennisport	East	Southeast
MARTHA'S VINEYARD AIRPORT		
Woods Hole	North	Northwest
Oak Bluffs	Northeast	East
Bounre Bridge	North	West
Cuttyhunk Island	West	Southwest
Katama Airpark	Southeast	South
NANTUCKET AIRPORT		
Great Point	North	East
Tuckernuck Island	West	Southwest

****IFR ARRIVAL/DEPARTURE****

Otis Terminal Radar Approach Control (TRACON) may assign a Control Departure Time (CDT) for IFR flights arriving or departing Hyannis, Nantucket or Martha's Vineyard Airports, whenever marginal VFR or IFR weather conditions exist.

Implementation of this part of the Special Traffic Management Program will be by special notice to flight service stations and area airport traffic control towers. Pilots may obtain current delay information during preflight and inflight briefings. During marginal weather conditions pilots are encouraged to contact the tower or flight service station, prior to engine start up, to obtain latest information.

To insure the success of this Special Traffic Management Program, aircraft departing Hyannis, New Bedford, Nantucket and Martha's Vineyard Airports are urged to depart within plus or minus 5 minutes of CDT. Departures from other airports should depart within 15 minutes before and not later than 5 minutes after CDT.

****FLIGHT PLANS****

Pilots are urged to file IFR flight plans at least 4 hours prior to proposed time of departure with the nearest flight service station.

Air filed flight plans may experience extensive delays awaiting integration into the IFR system while this program is in effect.

Commercial operators are requested to file flight plans for extra flight sections no less than 1 hour prior to proposed time of departure.

Pilots are encouraged to cancel VFR flight plans with Bridgeport Flight Service Station by radio. Transmit 122.1 mHz receive on appropriate VOR frequency. If unable to cancel by radio, contact appropriate flight service station by telephone.

LEGEND

⚐ VFR HOLDING / REPORTING POINTS

NOTE: CHART NOT TO SCALE AND IS NOT TO BE USED FOR NAVIGATION

T. F. Green State Airport, Warwick, R.I.

Closing certain runways and taxiways for installation of CAT II Lighting System.

Runway 5R-23L, Runway 10-28, Taxiway Alfa, Mike, Papa, Delta, Echo, and the portions of Sierra that is east of Runway 5L will be closed on September 2, 1986 at 6:00 a.m., and remain closed until 6:00 a.m., on October 2, 1986.

A portion of Runway 5R-23L from a point 200' south of the intersection with Taxiway Charlie to a point 200' north of the intersection with Taxiway Bravo will remain open for taxi purposes and use incidental to the operation of Runway 16-34.

The portions of Runway 10-28 that intersect Runway 16-34, Runway 5L-23R, Taxiway Bravo, Taxiway Foxtrot, will remain open for taxi purposes and use incidental to the operation of Runway 16-34 and Runway 5L-23R.

Runway 16-34 and the portion of Runway 5R-23L from a point 200' south of the intersection with Taxiway Charlie to a point 200' north of the intersection with Taxiway Bravo, will be closed from 12:00 midnight to 6:00 a.m., commencing September 17, 1986 through September 24, 1986, to allow fixture installation at the runway intersection.

HIGH ALTITUDE/EN ROUTE FLIGHT ADVISORY SERVICE (HA/EFAS)

HA/EFAS is an expansion of the current EFAS program (See AIM, paragraph 503). When fully implemented, it will provide a discrete frequency for each of the Air Route Traffic Control Center (ARTCC) areas for use by aircraft flying at altitudes of 18,000 feet and above within the center's area. The service expansion was initiated in July 1986 in the Salt Lake City ARTCC area on a frequency of 133.025 mHz.

As service in other areas becomes available the information will be published on charts located on the inside back cover of the Airport Facility Directories.

RENO NATIONAL CHAMPIONSHIP AIR RACES RENC/STEAD AIRPORT

Reno, Nevada

September 11, 12, 13 and 14, 1986

Due to the increased volume of traffic in the Reno area during the air races, the following information is provided to minimize delays and assist pilots entering Reno Approach Control/Tower Airspace.

The air races are held at Reno/Stead Airport, 13 miles NW of Reno Cannon International. The Reno/Stead Airport will be closed to all aircraft, except air race participants, from September 8, 1986, to September 15, 1986. Non-participating aircraft are requested to remain clear of a 5 nautical mile radius of a Reno/Stead Airport from September 1, 1986 through September 14, 1986. Check NOTAMS for the time and altitudes.

Transient parking at Reno Cannon International beginning September 10, 1986, through September 14, 1986, will be in various unimproved infield areas. Parking in these areas will be from sunrise to sunset only. Aircraft arriving after sunset or before sunrise are advised to seek parking at one of the following satellite airports:

Airport	Ident	Unicom	Location from Reno	Parking Spaces
Truckee-Tahoe	TRK	122.8	26 miles SW	302
Beckworth/Nervino	O02	122.8	37 miles NW	30
Carson City	O04	123.0	21 miles S	200
Douglas County	MEV	122.8	33 miles S	80
Fallon	FLX	122.8	42 miles E	20

ARRIVALS: Monitor ATIS on 125.8 before contacting Reno Approach Control. The ATIS broadcast will include special information for arriving aircraft during the air races. Contact Reno Approach on the designated frequency prior to entering TRSA or 10 miles from Reno Cannon. Keep your transmissions brief and expect delays due to traffic volume. The following are suggested reporting points for VFR arrivals:

From	Locations	Distance
South	Carson City Airport	13 miles
West	Town of Verdi	12 miles
East	Tracy Power Station	10 miles
North	Pyramid Lake	30 miles

Please cancel VFR flight plans through Reno Flight Service Station on 122.5 or 122.2.

DEPARTURES: All fixed base operators will have flyers explaining taxi and departure instructions. Please read all information carefully; a map of the airport will be included on the flyer. Monitor ATIS on 125.8 for more information prior to taxi. Keep your transmissions brief.

TIE-DOWNS: It is recommended that all pilots carry their own tie-downs.

TRANSCRIBED WEATHER: Can be received over any of the following NAVAIDS:

FMG 117.9
LTA 113.2
HZN 114.1
SPK NDB 254

PILOT BRIEFINGS: Reno Flight Service Station is located at the east side of Reno Cannon International Airport. A temporary Flight Service Station will be located in the Civil Air Patrol Office, Building 7005, Reno/Stead Airport. Call 348-9480 within the local Reno area, 800-222-4310 from other areas of Nevada, or 800-826-1502 from out-of-state airports.

BEFORE YOUR FLIGHT INTO OR OUT OF THE RENO AREA, CHECK FOR CURRENT NOTAMs.

PENNSYLVANIA INTERNATIONAL AIR SHOW
HARRISBURG INTERNATIONAL AIRPORT (MDT)
MIDDLETOWN, PENNSYLVANIA

SEPTEMBER 27 & 28, 1986

IN ANTICIPATION OF THE LARGE NUMBER OF AIR SHOW AIRCRAFT AND SCHEDULED COMMERCIAL AIRCRAFT TRAVELING TO AND FROM HARRISBURG INTERNATIONAL AIRPORT, THE FOLLOWING PROCEDURES WILL BE USED TO ENHANCE SAFETY AND MINIMIZE AIR TRAFFIC DELAYS.

NOTE: ALL TIMES ARE EASTERN DAYLIGHT TIME (EDT).

AIRPORT CLOSURE AND RESTRICTIONS

SEPTEMBER 27 AND 28 (SATURDAY AND SUNDAY)
8AM - 6PM AIRPORT CLOSED - EXCEPT FOR AIRSHOW AND SCHEDULED COMMERCIAL AIRCRAFT

CAUTION ADVISORY

CAUTION ADVISED IN THE VICINITY OF THE HARRISBURG INTERNATIONAL AIRPORT FOR NUMEROUS AIRSHOW AIRCRAFT.

ITERINERANT AIRCRAFT PARKING AVAILABLE AT CAPITAL CITY AIRPORT (CXY).

SEPTEMBER 27 (SATURDAY) AND SEPTEMBER 28 (SUNDAY) 3:00 PM TO 4:30 PM CAUTION ADVISED FOR CANADIAN AEROBATIC JET TEAM "THE SNOW BIRDS", PERFORMANCE WITHIN 5 NAUTICAL MILE RADIUS OF THE HARRISBURG INTERNATIONAL AIRPORT FROM THE SURFACE TO 15,000 MSL.

UNIVERSITY OF FLORIDA HOME FOOTBALL GAMES
SPECIAL TRAFFIC MANAGEMENT PROGRAM
GAINESVILLE, FLORIDA

In anticipation of the large number of aircraft operating to/from the Gainesville, Florida, area during the University of Florida home football games, special traffic management procedures will be used to enhance safety and minimize air traffic delays at Gainesville Regional Airport (GNV).

TRAFFIC MANAGEMENT PROGRAM

A Special Traffic Management Program will be in effect for IFR departures within the Jacksonville, Miami and Atlanta Center flight advisory areas. Jacksonville Center will assign a Controlled Departure Time (CDT) for unscheduled IFR flights arriving GNV, when this program is in effect. CDT's can be obtained from any flight service station when filing an IFR flight plan to GNV. This Special Traffic Management Program will be in effect:

Saturday	August 30	1400-2200 UTC
Saturday	September 6	1400-2200 UTC
Saturday	September 20	1230-1930 UTC
Saturday	October 4	1230-1930 UTC
Saturday	October 11	1230-1930 UTC
Saturday	November 1	1330-2030 UTC

Flight plans should be filed with the nearest flight service station (FSS) at least 4 hours prior to the proposed time of departure. Include the CDT in remarks section of the flight plan.

Except for emergency situations, Jacksonville Center will not accept IFR flight plans to Gainesville Regional Airport from airborne aircraft while this program is in effect. Airborne IFR flight plans filed with other facilities may experience extensive delays awaiting integration into the IFR system.

FLIGHT SERVICE STATION INFORMATION

VFR aircraft are encouraged to cancel/activate flight plans with Gainesville FSS when approaching/departing the city of Gainesville, or in person.

FLIGHT PLAN AND PILOT BRIEFING TELEPHONE NUMBERS

(904)-376-7515
1-(800)-343-3405

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAMS AND ARRIVAL/DEPARTURE PROCEDURES PRIOR TO CONDUCTING FLIGHT.

CED AIR FAIR
SPECIAL TRAFFIC MANAGEMENT PROCEDURES
CEDAR RAPIDS, IOWA
SEPTEMBER 6 & 7, 1986

In anticipation of the large number of aircraft traveling to and from the Cedar Rapids, Iowa, area during the CedAir Fair, the following Special Traffic Management Procedure will be used to enhance safety and minimize air traffic delays at Cedar Rapids Municipal Airport.

****OVERFLIGHTS****

Aircraft not landing in the Cedar Rapids area are encouraged to avoid overflight below 6,000 feet MSL within a 30 nautical mile radius of Cedar Rapids Municipal Airport.

****Automatic Terminal Information Service (ATIS)****

Aircraft landing Cedar Rapids Municipal Airport are requested to monitor ATIS, 124.15 mHz, PRIOR TO CONTACTING Cedar Rapids Approach Control.

****VFR ARRIVALS****

Radar sequencing will be provided to all aircraft landing Cedar Rapids Municipal Airport. Contact Cedar Rapids Approach Control prior to reaching an arrival point (SEE GRAPHIC). DO NOT PROCEED inbound from an arrival point prior to contacting Cedar Rapids Approach Control.

VFR ARRIVAL POINTS	FREQUENCY
Iowa City	119.7 mHz
Newhall	See Graphic
Palo	134.05 mHz
Anamosa	134.05 mHz
Tipton	See Graphic
Marengo	119.7 mHz

****VFR DEPARTURES****

Detailed departure information will be provided at all aircraft parking area entrances. Pilots are encouraged to review this information to enhance safety and expedite departures.

****IFR ARRIVAL/DEPARTURE****

If traffic conditions warrant, a traffic management program will be implemented to balance arrival and departure flows. When necessary, arriving and departing aircraft will be assigned a Controlled Departure Time (CDT)

****FLIGHT SERVICE STATION****

Cedar Rapids Flight Service Station (FSS) is located on the second floor, Room 208, of the Terminal Building and is accessible from the aircraft parking area.

Pre flight and flight planning services are available in person or by telephone:

Cedar Rapids Area	364-7127
Quad Cities Davenport/Moline/ Rock Island	762-5228
State of Iowa Toll Free	1-800-332-5241 1-800-843-8553

Pilots are reminded to cancel their VFR flight plans with Cedar Rapids FSS via radio on 122.55 mHz, 122.2 mHz or transmit 122.1 mHz and advise which VOR is being received:

Cedar Rapids - 117.6 mHz
Dubuque - 115.8 mHz
Iowa City - 116.2 mHz

Waukon - 116.6 mHz
Waterloo - 112.2 mHz
Galesburg - 109.8 mHz

****NO RADIO ARRIVALS/DEPARTURE****

Contact Cedar Rapids Airport Traffic Control Tower for prior approval. Telephone: (319) 364-2334.

****AIRPORT MANAGER'S NOTICE****

Light, single and multi-engine aircraft may be required to park on grass areas of the airport. CAUTION ADVISED while operating on unimproved or grass areas due to rough ground and signs. Pilots are urge to bring their own tie downs for sod areas. Report all incidents or accidents to the Airport Manager as soon as possible.

STUDENT PILOT TRAINING. No touch and go landings, student solo cross country flights or practice instruments approaches will be authorized at Cedar Rapids Municipal Airport, September 6-7.

****AIRPORT CLOSURE****

Cedar Rapids Municipal Airport (CID) is subject to closure to arriving VFR aircraft, September 6-7, if aircraft parking areas become unavailable Pilots should consider Iowa City Municipal Airport (IOW) as an alternate landing area.

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAMS AND ARRIVAL/DEPARTURE PROCEDURES PRIOR TO CONDUCTING FLIGHT.

SPECIAL AIR TRAFFIC PROCEDURES FOR
1986 FARM PROGRESS SHOW
ALLEMAN, IA SEPT. 30 to OCT. 2, 1986

Due to the heavy volume of traffic generated by the annual Farm Progress Show, which this year will be held near Alleman, Iowa, the following information and special procedures are provided for aircraft arriving and departing the Ames Municipal Airport.

GENERAL INFORMATION

The Ames Municipal Airport has been designated as the official airport of the 1986 Farm Progress Show. This airport is located 2 miles southeast of the city of Ames (Newton VORTAC 292 degrees at 26 miles). An asphalt runway, 13/31, 3492 feet long and 100 feet wide will be the primary runway used. The field elevation is 930 feet MSL. Arriving aircraft FLY LEFT HAND TRAFFIC PATTERN for runway 31 or RIGHT HAND TRAFFIC PATTERN for runway 13, unless directed otherwise by the Tower. Recommended traffic pattern altitude is 800 feet AGL (1730 MSL).

A new paved 4600 feet long concrete runway, 1/19, may be used for limited operations, however, the portion of that runway that is north of runway 13/31 will be used as the primary entry/exit route to the Farm Progress Show aircraft parking area.

Other nearby airports that may be used if the Ames Airport is closed due to reaching capacity, or for any other reason, are the Boone Municipal and Des Moines International Airports. Shuttle bus service will be available between the Ames Airport and the show location near Alleman.

The Federal Aviation Administration WILL OPERATE A TEMPORARY CONTROL TOWER AT THE Ames Municipal Airport between the hours of 7 a.m. to 7 p.m. Central Daylight Time (1200-0000Z) on September 30, October 1 and 2, 1986. The TOWER frequency will be 127.4 MHz and the GROUND CONTROL frequency will be 121.7 MHz. Use the call signs "AMES TOWER" and "AMES GROUND" in radio communications. The temporary tower will be located atop a brick building adjacent to the ramp just north of the wind tee.

The Ames Airport has AWOS-1 weather information available on frequency 126.55 MHz. This broadcast transmits the temperature, dew point, surface wind, altimeter, density altitude and prerecorded remarks. Pilots should tune in and receive this broadcast prior to preparing for landing or departure.

ARRIVAL PROCEDURES

Radio Equipped Aircraft:

1. Contact TOWER when 15 miles from airport.
2. If traffic is heavy and the tower frequency is congested, LISTEN FOR THE APPROPRIATE LANDING INFORMATION. Call the tower when on downwind leg of the traffic pattern.
3. Geographic holding fixes may be assigned to inbound aircraft, if necessary.
4. After landing, turn north on runway 1 if speed permits, otherwise exit onto the parallel taxiway to runway 1 to the show parking area. Then follow directions of flagmen into parking. PROMPT CLEARING OF THE LANDING AREA WILL BE APPRECIATED!
5. Be alert for other aircraft - especially no-radio aircraft - at all times. USE EXTREME CAUTION!

No-Radio Aircraft:

1. Approach the area at least 1000 feet above traffic pattern altitude.
2. When you are able to determine the direction of landing, let down to traffic pattern altitude, pick out an aircraft on downwind leg and follow that aircraft. (If no other traffic is present, fly a normal left or right traffic pattern depending on the runway in use).
3. Watch the temporary tower for appropriate light signals. USE EXTREME CAUTION AT ALL TIMES!
4. After landing, use the same routing and procedures to parking as described for radio equipped aircraft above. PROMPT CLEARING OF THE LANDING AREA WILL BE APPRECIATED!

DEPARTURE PROCEDURES

1. Before taxiing, monitor Ground Control and the AWOS broadcast on 126.55 MHz for departure runway and information. Follow directions of flagmen out of the parking area. Expect to taxi via the north end of runway 19 then to runway 31 or 13 via its parallel taxiway.
2. During busy departure periods do not call for taxi or takeoff clearances. Controllers will initiate any necessary instructions on Ground and Tower frequencies. You may advise Tower when you're number one at the runway and ready for departure. No-radio aircraft should turn toward the tower when ready for departure and watch for a green light. If you are given any instructions with hand signals, OBSERVE THE SIGNALS CAREFULLY!
3. After departure proceed straight-out for at least two miles before making any turns. USE EXTREME CAUTION! Be alert for other aircraft, inbound and outbound, at all times.

IFR PROCEDURES

The IFR arrival and departure service for the Ames Airport is provided by Des Moines Approach Control on frequency 123.9 MHz. If weather conditions permit, IFR arrivals should cancel IFR before 10 miles from the airport in order to sequence into the VFR traffic pattern; and departures planning IFR should depart VFR and pickup their IFR clearance in the air from Des Moines Approach Control. If weather does not permit this, regular IFR service will be provided.

PILOT BRIEFING AND FLIGHT PLAN PROCEDURES

All Flight Service Station services will be provided by the Fort Dodge AFSS. There are only a limited number of public telephones, which are not convenient to the show parking area, available at the airport for weather briefing and flight plan services. You are encouraged, therefore, to use a phone at the Show grounds where more are available and easier to locate. This will also allow greater opportunity for timely processing of flight plans which will be of assistance with the large number anticipated. A special PATWAS recording will be available for the Farm Progress Show. It will be PATWAS #205 and fast file recording can be used to file IFR or VFR flight plans. Dial toll free: 1-800-392-4220.

Everyone is urged to file a flight plan. Pilots with two-way radio equipment should close their flight plans with FORT DODGE RADIO prior to landing. Transmit on 122.1 MHz and listen to the Des Moines VOR 114.1 MHz or Newton VOR 112.5 MHz. Simplex radio frequencies at Fort Dodge Radio are 122.65 MHz and 122.3 MHz.

HAVE A SAFE AND PLEASANT FLIGHT

NATIONAL BUSINESS AIRCRAFT ASSOCIATION (NBAA) CONVENTION

SPECIAL TRAFFIC MANAGEMENT PROGRAM

LONG BEACH, CALIFORNIA

SEPTEMBER 27 THROUGH OCTOBER 5, 1986

In anticipation of the large number of aircraft operating TO/FROM the Long Beach, California, area during the week of the NBAA Convention, special traffic management procedures will be used to enhance safety and minimize air traffic delays at Long Beach/Daugherty Field Airport (LGB) and John Wayne Airport-Orange County Airport (SNA).

TRAFFIC MANAGEMENT PROGRAM

A Special Management Program will be in effect daily, 0600-2200 local, September 27 through October 1. A Controlled Departure Time (CDT) will be assigned unschedule IFR flights arriving or departing LGB or SNA airports during the effective times of this program. CDT's may be obtained from any flight service station during preflight briefings. CDT's will not be assigned more than 48 hours in advance of proposed time of departure.

Flight plans should be filed with the nearest flight service station (FSS) at least 4 hours prior to the proposed time of departure. Include CDT in remarks section of the flight plan.

Except for emergency situations, Los Angeles Center, Coast, Los Angeles, Ontario and Burbank Approach Controls will not accept IFR flight plans to LGB or SNA from airborne aircraft while this program is in effect. Airborne IFR flight plans filed with other facilities may experience extensive delays awaiting integration into the IFR system.

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAMS AND ARRIVAL/DEPARTURE PROCEDURES PRIOR TO CONDUCTING FLIGHT.

LORAN-C STATUS INFORMATION

LORAN-A service has been terminated in the U.S. coastal confluence region. Prerecorded telephone answering service messages pertaining to LORAN-C are available as follows:

RATE	CHAIN	TELEPHONE
5930	Canadian East Coast	709-454-3261*

FOREWORD

The primary references for changes to the National Airspace System (NAS) are Aeronautical Charts and Airport/Facility Directories (A/FD) published for the affected areas). Ideally, most changes to the NAS that meet NOTAM criteria are known sufficiently in advance to allow publication in these publications. When this cannot be done, changes are carried in the Notices to Airman Class II publication, or as a last resort, on the Service A telecommunications system as a NOTAM D item.

NOTAM D information printed in this publication will not be included on the Service A system and will not be provided during pilot briefings unless specifically requested by the pilot.

National Flight Data Center (FDC) NOTAMs primarily reflect changes to Standard Instrument Approach Procedures (SIAPs), Flight Restrictions, and aeronautical chart revisions. The last FDC NOTAM included in this issue is indicated by number and date above. This information insures that subsequent FDC NOTAMs, issued after the cutoff date, can be identified.

The Class II publication contains information of a temporary nature, which is expected to remain for an extended period. This temporary information is carried until it expires or is cancelled. Data of a permanent nature is sometimes carried in the Class II publication as an interim step prior to publication on the appropriate charts or in the A/FD.

The Class II publication is issued every 14 days. The A/FD is published every 56 days. Data in the Class II publication that is current on the effective date of the next A/FD will be transferred to the A/FD and removed from the Class II publication.

Facilities are responsible for forwarding data to the National Flight Data Center (NFDC). Data, still current for the next available Class II publication date, will be published.

This publication is divided into two sections:

1. Section One contains information divided into four categories:

   a. GENERAL

   b. AIRWAYS

   c. FLIGHT RESTRICTIONS

   d. AIRPORTS / FACILITIES / PROCEDURAL NOTAMS

The first subsection is listed in descending FDC NOTAM numerical order. The second and third subsections are listed by state. The fourth subsection is ordered by state, city, and airport name.

2. The second section contains special notices that are too long or that concern a wide or unspecified geographical area (which may overlap several states) and are not suitable for inclusion in the first section.

The content of these notices vary widely and are included because of their significant impact on flight safety.

NOTES

1. All times are indicated as UTC or local. During periods of Daylight Savings Time, effective hours in local time will be one hour earlier than shown. All states observe Daylight Savings Time except Arizona, that portion of Indiana in the Eastern Time Zone, Puerto Rico, and the Virgin Islands.

2. (|) Vertical line items indicate new information.

FDC NOTAM LEGEND

Code	Expianation
5/103	Accountability number assigned to the message originator.
FI/T	Flight information of a temporary nature.
FI/P	Flight information of a permanent nature.

(A) Information for Section 1 should be submitted to the National Flight Data Center (ATO-250).
(B) Camera-ready copy for Section 2 should be submitted to ATO-200.

ADDRESSING INFORMATION FOR SECTION 1

Federal Aviation Administration, National Flight Data Center (ATO-250), 800 Independence Ave, SW., Washington, DC 20591.

Phone: Commercial—202-267-9294/267-9288
Phone: FTS— 267-9294/267-3288

ADDRESSING INFORMATION FOR SECTION 2

Federal Aviation Administration, ATO-200, 800 Independence Ave, SW., Washirgton, DC 20591.

Phone: Commercial—202-267-9239/267-9240
Phone: FTS— 267-9239/267-9240

SUBSCRIPTION INFORMATION

HOW TO ORDER

The Notices to Airmen publication is available by subscription through the Superintendent of Documents. Subscriptions are accepted for a 1 year period. Remittance must be made in advance of shipment. Your check or money order must be made payable to the Superintendent of Documents. Orders can also be charged to your VISA or MASTERCARD account. Orders should be addressed to:

Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402,

or

Phone: (202)783-3238 (Order Desk).

ABBREVIATIONS

The following abbreviations are those most commonly used within this publication. Other abbreviations may be found in the Contraction Handbook, 7340.1.

Note: An "s" may be added for plural. Abbreviations used in FDC NOTAMs are italicized.

A	
/	and
AAS	Airport Advisory Service
A/C	Approach Control
acft	aircraft
ACR	Air Carrier
ADF	Automatic Direction Finder
AER	Approach End Runway
AGL	above ground level
AIM	Airman's Information Manual
ALS	Approach light system
ALSF-1	Standard 2400' High-intensity Approach Lighting System with Sequenced Flashers, Category I Configuration
ALSF-2	Standard 2400' High-intensity Approach Lighting System with Sequenced Flashers, Category II Configuration
alt	altitude
altm	altimeter
altn	alternate
ALSTG	altimeter setting
amdt	amendment
apch	approach
apchg	approaching
aprx	approximate
arpt	airport
arr	arrive or arrival
ARSR	Air Route Surveillance Radar
ARTCC	Air Route Traffic Control Center
ASDE	airport surface detection equipment
ASR	Arpt Surveillance Radar
ATC	air traffic control
ATCT	air traffic control tower
ATIS	Automatic Terminal Information Service
avbl	available
awy	airway
B	
BC	back course
bcn	beacon
bcst	broadcast
bldg	building
brg	bearing
btn	between
byd	beyond
C	
cat	category
CFR	crash fire rescue
clnc	clearance
clsd	closed
cmsnd	commissioned
cntr	center
cntrln	centerline
Comlo	Compass locator
const	construction
cpty	capacity
crs	course
ctc	contact
CTLZ	Control Zone
D	
dalgt	daylight
dcmsnd	decommissioned
degs	degrees
dep	depart, departure
DF	direction finder
DH	decision height
DME	UHF standard TACAN compatible distance measuring equipment
dsplcd	displaced
dist	distance
durg	during
DVFR	Defense Visual Flight Rule
E	
E	east
EFAS	Enroute Flight Advisory Service
elev	elevation
emerg	emergency
equip	equipment
exc	except
F	
FAF	final approach fix
FAR	Federal Aviation Regulation
FDC	Flight Data Center
FI/P	flight information (permanent)
FI/T	flight information (temporary)
FL	Flight Level
FM	from
freq	frequency
FSS	Flight Service Station
ft	feet/foot
G	
govt	government
GS	glide slope
GWT	gross weight
H	
HAA	height above airport
HAT	height above touchdown
HIRL	High intensity Runway Lights
hol	holiday
hwy	highway
I	
IAF	initial approach fix
IAP	initial approach procedure
ident	identification
IF	intermediate fix
IFR	Instrument Flight Rules
IFSS	International Flight Service Station
ILS	instrument landing system
info	information
inop	inoperative
int	intersection
intl	international
intst	intensity
ISMLS	Interim Standard Microwave Landing System
J	
J-bar	jet runway barrier
K	
kHz	kilohertz
L	
L	left (used only to designate rwys) eg. rwy 12L
lat	latitude
lb	(pounds (weight)
lctd	located
LDA	Localizer type directional aid
LDIN	Lead-in Lighting System
lgtd	lighted
LMM	compass locator at middle marker ILS
ldg	landing
loc	localizer
LOM	compass locator at outer marker ILS
long	longitude
M	
MAA	maximum authorized altitude
mag	magnetic
maint	maintain, maintenance
MALS	Medium Intensity Approach Light System
MALSR	Medium Intensity Approach Light System with Runway Alignment Indicator Lights
MAP	missed approach point
max	maximum
MCA	minimum crossing altitude
MDA	minimum descent altitude
MEA	minimum enroute IFR altitude
MHz	megahertz
min	minimum or minute
MIRL	Medium Intensity Runway Edge Lights
MLS	Microwave Landing System
MM	middle marker ILS
MOCA	minimum obstruction clearance altitude
MRA	minimum reception altitude
MSA	minimum safe altitude
MSL	mean sea level
muni	municipal
N	
N	north
NA	not authorized
natl	national
navaid	navigational aid
NDB	Non-directional Radio Beacon
NM	nautical mile(s)
NOPT	no procedure turn required
Nr	number
O	
obstn	obstruction
ODALS	Omnidirectional Approach Lighting System
OM	outer marker ILS
oper	operate
opn	operation
orig	original
OTS	Out of Service
ovrn	overrun
P	
PAR	Precision Apch Radar
pat	pattern
permly	permanently
PPR	Prior Permission Required
proc	procedure
Q	
quad	quadrant
R	
R	right (used only to designate rwys) eg. rwy 19R
RAPCON	radar approach control (USAF)
RCAG	Remote Center air/ground
RCLS	Runway Centerline Lights System
RCO	Remote Communications Outlet
rcv	receive
rcvg	receiving
REIL	Runway End Identifier Lights
req	request
RNAV	Area Navigation
RRP	Runway Reference Point
rstrd	restricted
RTS	returned to service
RVR	runway visual range
RVRM	Runway Visual Range Midpoint
RVRT	Runway Visual Range Touchdown
RVRR	Runway Visual Range Rollout
RVV	runway visibility values
rwy	Runway
S	
S	south/snow
SDF	Simplified Directional Facility
sec	second
sfc	surface
SFL	Sequenced Flashing Lights
SI	straight-in approach
SM	statute mile(s)
SR	sunrise
SS	sunset
SSAFL	Simplified Short Approach Lighting System with Sequenced Flashers
SSALS	Simplified Short Approach Lighting System
SSALR	Simplified Short Approach Lighting System with Runway Alignment Indicator Lights
STOL	Short take-off & landing runway
svc	service
T	
T	true (after a bearing)
TAC	Terminal Area Chart
TACAN	UHF navigational facility—omni-directional course and distance information
TCA	Terminal Control Area
TCH	Threshold Crossing Height
tfc	traffic
thr	threshold
thru	through
tkof	take-off
tmprly	temporarily
tmpry	temporary
TPA	Traffic Pattern Altitude
TRACON	Terminal Radar approach control
trml	terminal
TRSA	Terminal Radar Service Area
tsnt	transient
TWEB	transcribed weather bcst
twr	tower
twy	taxiway
U	
UHF	Ultra high frequency
unavbl	unavailable
unlgtd	unlighted
unmon	unmonitored
unusbl	unusable
V	
VASI	Visual Approach Slope Indicator
VDP	visual descent point
VFR	visual flight rules
VHF	Very high frequency
vis	visibility
VOR	VHF Omni-Directional Radio Range
VORTAC	Combined VOR and TACAN System
VOT	a VOR Receiver testing facility
vsby	visibility
W	
W	west
wea	weather
wkday	weekday
wkend	weekend
wp	waypoint
wt	weight
Z	
Z	Coordinated Universal Time (UTC)

GENERAL

FDC 6/2038 FI/P CORRECT U.S. SECTIONAL CHART FOR SEATTLE. 31ST EDITION, DTD 3 JUL 86. CHANGE BAKER FSS /BKE/FREQ 122.4 TO FREQ 122.2.

FDC 6/1788 AK. CURRENT STATUS OF PAVLOV VOLCANO..DRIFTING VOLCANIC ASH FROM PAVLOV VOLCANO SURFACE TO APPROXIMATELY 25 THOUSAND FEET DRIFTING EAST. IFR FLIGHTS MAY BE REROUTED TO AVOID HAZARDOUS ASH AREAS. VFR FLIGHTS INTO VOLCANIC ASH MAY CAUSE ENGINE DAMAGE/FAILURE AND ABRASION DAMAGE TO WING AND WINDSHIELD SURFACES. THIS NOTAM WILL BE UPDATED AS CONDITIONS CHANGE.

FDC 6/1601 FI/P HI CORRECT U.S. SECTIONAL CHART HAWAIIAN ISLANDS 34TH EDITION DATED 5 JUN 86.. CHANGE BRADSHAW NDB IDENT /BSF/FREQ 349 TO FREQ 339.

FDC 6/1067 FDC THE FEDERAL AVIATION ADMINISTRATION HAS PARTICIPATED IN GOVERNMENT ACTIVITIES TO ASSESS AVIATION PROBLEMS WHICH MIGHT OCCUR AS A RESULT OF THE SOVIET NUCLEAR ACCIDENT. NONE OF THE DATA WE HAVE SEEN PROVIDES ANY CONCERN FOR ANY FLIGHTS OF ANY U.S. CARRIERS ANYWHERE IN THE WORLD. THE ONLY AREA WE WOULD BE POTENTIALLY CONCERNED ABOUT IS FLIGHT IN THE VICINITY OF THE REACTOR SITE NEAR KIEV AT ALTITUDES BELOW 20,000 FEET. FLIGHT ABOVE 20,000 FEET AT THIS LOCATION NEAR KIEV OR OTHER FLIGHTS AT ANY ALTITUDE ANYWHERE IN THE WORLD IS NOT EXPECTED TO PRESENT ANY PUBLIC HEALTH OR SAFETY PROBLEMS DUE TO RADIATION CONTAMINATION WHICH MIGHT EXIST AS A RESULT OF THE ACCIDENT. THERE IS NO REASON FOR SPECIAL FLIGHT PRECAUTIONS. NO FURTHER NOTIFICATIONS ON THIS SUBJECT ARE PLANNED.

FDC 6/995 U.S. CUSTOMS REGULATORY CHANGES. AIRCRAFT PENETRATING THE INNER ADIZ FM ANYWHERE IN THE WESTERN HEMISPHERE SOUTH OF THE U.S. MEXICAN BORDER, SOUTH OF 33 DEG NORTH LATITUDE ON THE PACIFIC COAST, SOUTH OF 30 DEGREES NORTH LATITUDE ON THE ATLANTIC COAST, OR SOUTH OF THE INNER ADIZ ON THE GULF COAST, MUST PROVIDE U.S. CUSTOMS AT LEAST ONE HOUR ADVANCE NOTICE OF PENETRATION OF U.S. AIRSPACE, EFFECTIVE APRIL 30. THIS REQUIREMENT WILL BE EXTENDED TO AIRCRAFT THAT HAVE NOT LANDED IN A FOREIGN PLACE AND AIRCRAFT FROM PUERTO RICO THAT ARE NOT FLYING UNDER IFR FLIGHT RULES. FILING A FLIGHT PLAN WITH THE NOTATION 'ADCUS' WITH THE U.S. FAA AT LEAST ONE HOUR IN ADVANCE OF PENETRATION OF THE ADIZ WILL SATISFY THIS REQUIREMENT. CONTRACTING U.S. CUSTOMS AT 305-536-6591, MIAMI, FL, OR 714-351-6874, RIVERSIDE, CA, AT LEAST ONE HOUR IN ADVANCE WILL ALSO MEET THE REQUIREMENT. LANDING AND INSPECTION REQUIREMENTS FOR AIRCRAFT ARRIVING FROM FOREIGN PLACES REMAIN UNCHANGED.

FDC 6/201 FI/P CORRECT U.S. GOVT WORLD AERONAUTICAL CHART CG21, 16TH EDITION DTD OCT 24, 1985. CHANGED HARRIS VORTAC /HRS/ FREQ 111.8 CHANNEL 053 TO FREQ 109.8 CHANNEL 035.

FDC 5/2508 AUTOMATED VOICE AIRPORT RESERVATION SYSTEM../AVARS/. IN ORDER TO IMPROVE THE AVARS CAPACITY THE FAA HAS INSTALLED TWO ADDITIONAL NON-TOLL FREE NUMBERS..617-275-4837/8. EFFECTIVE NOVEMBER 1 1985 TWO ADDITIONAL TOLL FREE LINES WILL BE AVAILABLE TO BE PART OF 1-800-FAA-1212 NUMBER. FAA PLANS TO CONTINUE THE DUAL /ARO/SYSTEM USING THE AUTOMATED SYSTEM ON 1-800-FAA-1212 AND THE MANUAL ARO SYSTEM WITH NEW YORK 718-632-7806/ CHICAGO 312-263-2575 AND WASHINGTON DC 202-426-9347 UNTIL FURTHER NOTICE. IN AREAS WHERE TOUCH TONE PHONE SYSTEMS ARE NOT AVAILABLE USERS MAY EITHER CONTACT THE NEAREST FAA FLIGHT SERVICE STATION OR THE /ARO/ AT THE NUMBERS LISTED ABOVE AND REQUEST A RESERVATION. USERS DEPARTING A TRANS-ATLANTIC AIRPORT FOR ARRIVAL TO A HIGH DENSITY AIRPORT SHOULD CONTINUE TO USE THE PROCEDURES OUTLINED IN ADVISORY CIRCULAR AC 90-43F PARA 8 DATED APRIL 22 1985 WHICH STATES CONTACT THE NEAREST FLIGHT SERVICE STATION.

FDC 5/594 AIRPORT RESERVATION OFFICE/ARO/ OPERATIONS... EFF APR 1, 1985...THE FOLLOWING GUIDELINES SHALL BE IN EFFECT... /ARO/WILL ACCEPT RSVNS FOR WASHINGTON NATIONAL AIRPORT /DCA, JOHN F. KENNEDY INTL ARPT /JFK, LA GUARDIA ARPT/LGA, AND CHICAGO O HARE INTL ARPT /ORD BEGINNING 48 HRS PRIOR TO THE PROPOSED TIME OF OPERATION AT THE AFFECTED ARPT. E.G REQ FOR 11 A.M. OPERATION ON THURSDAY WILL BE ACCEPTED STARTING 11 A.M. ON THE PRECEDING TUESDAY. AN EXCEPTION TO THE 48 HR LIMITATION IS MADE FOR WEEKENDS TO RECOGNIZE NORMAL BUSINESS HOURS. A RSVN REQ FOR AN IFR OPERATION ON MONDAY WILL BE ACCEPTED ON THE PREVIOUS THURSDAY STARTING AT THE PROPOSED HR OF OPERATION. REQUESTS FOR IFR OPERATION ON TUESDAY WILL BE ACCEPTED ON THE PREVIOUS FRIDAY STARTING AT THE PROPOSED HR OF OPERATION. E.G. REQ FOR 11 A.M. RSVN ON TUESDAY WOULD BE ACCEPTED BEGINNING 11 A.M. ON FRIDAY. IF THE PREVIOUS FRIDAY IS AN OBSERVED HOLIDAY THE PROCEDURE WILL BE IN EFFECT ON THURSDAY. A MAXIMUM OF TWO RSVNS PER PHONE CALL WILL BE ACCEPTED. E.G. A PILOT MAY REQ A RSVN FOR ARRIVAL AND DEPARTURE DURING THE SAME PHONE CALL PROVIDING BOTH FALL ON THE SAME CALENDAR DAY. E.G. A RSVN REQ FOR 11 A.M. ARRIVAL ON FRIDAY AND 4 P.M. DEPARTURE ON THE SAME DAY MAY BE MADE BEGINNING AT 11 A.M. ON WEDNESDAY.

FDC 4/3277 NOTAM /D/REGARDING RWY SNOW CONDITIONS AND BRAKING ACTION REPORTS FOR CANADIAN AIRPORTS WILL NO LONGER BE ENTERED INTO THE DOMESTIC NOTAM SYSTEM ON SERVICE A BY NFDC. CONTACT THE ASSOCIATED CANADIAN FLIGHT SERVICE STATION FOR THESE REPORTS.

FDC 4/1725 FDC U.S. NOTAM OFFICE POLICY ON FDC NOTAM STORAGE IN CONSOLIDATED NOTAM SYSTEM / CNS/DATA BASE/. ALL CURRENT FDC NOTAMS ARE STORED AND AVAILABLE UPON REQUEST. FDC NOTAMS WHICH ARE STRAIGHT CANCELLATIONS ARE STORED FOR THREE /3/ DAYS. BASED ON COMPUTER DEMANDS SIGNIFICANT TIME DELAYS ON RETRIEVALS CAN BE EXPECTED. NOTE...REPEATED REQUESTS WILL FURTHER COMPOUND DELAYS. THEREFORE FSS AND USER GROUPS ARE ADVISED TO COLLECT AND STORE REQUIRED FDC NOTAM/S ON INITIAL SERVICE /A/ DISTRIBUTION SUPPLEMENTED BY CLASS 2 NOTAM PUBLICATION.

HAZARDOUS INFLIGHT WEATHER ADVISORY SERVICE (HIWAS)

HIWAS is a national program for broadcasting hazardous weather information (SIGMET's, convective SIGMET's, Center Weather Advisories (CWA), AIRMET's, and urgent PIREP's) on a continuous basis over selected VOR's. The program is operational in the Jacksonville, Miami, and Houston Air Route Traffic Control Center (ARTCC) areas. The chart on the following page identifies the current broadcast outlet locations and frequencies. Frequencies shown in the Atlanta ARTCC area are for planning purposes only. HIWAS will be expanded on an ARTCC by ARTCC basis.

Pilots should be aware that:

- Flight service stations broadcast information on hazardous weather not yet covered by an advisory and make an announcement on their frequencies that new HIWAS information is available.

- Controllers in ARTCC's and air traffic control terminals announce updates to HIWAS information on all appropriate frequencies.

- Controllers and specialists will not routinely broadcast SIGMET's, convective SIGMET's, CWA's, AIRMET's, and urgent PIREP's in the commissioned HIWAS areas.

User comments regarding the effectiveness of the HIWAS program and any proposed revision to HIWAS procedures are solicited.

Mail comments to:

Department of Transportation
Federal Aviation Administration
ATTN: ATO-360
800 Independence Ave. S.W.
Washington, DC 20591

Note: For further information on the HIWAS program, refer to the Airman's Information Manual (AIM) and Airport/Facility Directory (AFD). Operational sites are published in the AFD under radio aids to navigation.

AIRPORT RADAR SERVICE AREAS (ARSA)

The National Airspace Review Terminal Airspace Task Group 1-2.2 recommended the ARSA Program as a replacement for the existing Terminal Radar Service Area Program and the FAA has adopted that recommendation. ARSA designations have been made, and effective dates established, for the locations listed below. The following is a summary of the pilot requirements and the ATC procedures for ARSA's. Graphic depictions of each ARSA are also included.

Unless otherwise authorized or required by ATC, the following provisions apply to aircraft operating within an ARSA:

1. Aircraft approaching that would penetrate the ARSA must establish two-way radio communications with ATC prior to entering the ARSA and maintain that communication while operating within the ARSA.

2. Aircraft departing the primary airport within the ARSA must establish two-way communications with ATC prior to departure and maintain that communication while operating within the ARSA. Aircraft departing a satellite airport within the ARSA must contact ATC as soon as practicable after takeoff.

3. Except in an emergency, all operations must be in compliance with ATC clearances and instructions.

4. All arrivals and departures within the ARSA must be in compliance with FAA arrival and departure traffic patterns.

5. Ultralight vehicles and parachute operations may not be conducted within the ARSA except under the terms of an ATC authorization.

6. NOTAM's pertaining to flight within the ARSA must be reviewed as a part of preflight action required by FAR 91.5.

Within ARSA's, ATC will provide the following services:

1. Radar sequencing of all arrivals.

2. Standard separation between all instrument flight rules (IFR) flights.

3. Traffic advisories and safety advisories to all aircraft.

4. Resolve any potential conflict between an aircraft operating IFR and an aircraft operating under visual flight rules by application of conflict resolution procedures.

ARSA's have been designated at the following locations to be effective June 5, 1986.

Albuquerque International Airport, NM
Greater Cincinnati International Airport, KY
Indianapolis International Airport, IN
Phoenix Sky Harbor International Airport, AZ
Tucson International Airport, AZ
Davis-Monthan Air Force Base, AZ
Wichita Mid-Continent Airport, KS

An ARSA has been designated at the following airport to be effective July 3, 1986.

Dallas Love Field, Texas

An ARSA has been designated at the following airport to be effective July 31, 1986.

Lafayette Regional Airport, LA

ARSA's have been designated at the following locations to be effective on August 28, 1986.

Raleigh-Durham, NC

TERMINAL AREA GRAPHIC NOTICE
(NOT TO BE USED FOR NAVIGATION)

SOUTH LAKE TAHOE, CALIFORNIA
LAKE TAHOE AIRPORT

The Lake Tahoe Airport is closed to aircraft registering 77.1 or more decibles (as listed in FAA AC36-3 series) from 2000-0800 hours local time.

ARRIVAL PROCEDURES:

CAUTION: NORMALLY ASPIRATED PISTON ENGINES SHOULD BE LEANED TO PROVIDE A BEST-POWER MIXTURE DURING THE LANDING. DUE TO THE POSSIBILITY OF AN ABORTED APPROACH, PILOTS OF SUPERCHARGED AIRCRAFT SHOULD USE CAUTION WITH THEIR MIXTURE DUE TO FOULING OF THE SPARKPLUGS AT LOW POWER AND RICH MIXTURE.

RUNWAY 36: When arriving from the northwest through the east, enter the pattern on a wide right downwind, or as directed by the Tower.

When arriving from the southeast through the southwest, the Tower will normally direct you straight-in. If that is not practicable, request an over-flight for right traffic. Make your over-flight at or above 8000' MSL, and descend to pattern altitude on crosswind.

When arriving from the west, the Tower may direct you to cross over the field (mid-field crosswind) for right traffic.

High performance aircraft: Tower will normally assign a left downwind, fly base leg between the river and the ridge or as directed by Tower.

NOTE: CAUTION IS ADVISED DUE TO POSSIBLE DOWNDRAFTS, PARTICULARLY ON SHORT FINAL AND WHEN NORTHERLY WINDS EXCEED 15 KNOTS.

RUNWAY 18: When arriving from the northwest through the east, Tower may direct you to make a straight in. Descend north of the shoreline to cross the shoreline over the meadow, slightly west of "straight in", and at or above 7500' MSL.

When arriving from the southeast through the southwest, Tower will usually direct you to a wide left down-wind entry. If arriving from southwest to remain as far south as feasible until crossing the extended centerline.

Caution is advised due to possible traffic climbing out and/or circling the golf course to gain altitude.

When arriving from the west, Tower normally will advise you to make a straight in. Make your "base" leg north of the shoreline, and turn final at or above 7500' MSL.

CAUTION: ROTOR ACTIVITY (UP AND DOWN-DRAFTS) OFTEN EXISTS THROUGHOUT THE BASIN AND ESPECIALLY ON THE FINAL APPROACH WHEN SOUTHERLY WINDS EXIST. IF PRACTICABLE, MAKE YOUR AIM-POINT APPROXIMATELY ONE-THIRD OF THE WAY DOWN FROM THE RUNWAY (NEAR TAXIWAY "E"). OVER 5000' OF RUNWAY REMAINS FROM THAT POINT.

PATTERN ALTITUDES:

Small aircraft - 7500' MSL (1236' above the airport)
Large aircraft - 8000' MSL (1736' above the airport)

DEPARTURE PROCEDURES:

CAUTION: DENSITY ALTITUDE CAN AND DOES EXCEED 10,000'. PLEASE COMPUTE YOUR PERFORMANCE FACTORS ACCORDINGLY, USE DENSITY ALTITUDE LEANING TECHNIQUES APPROPRIATE TO YOUR AIRCRAFT PRIOR TO TAKEOFF AND ENSURE THAT YOUR WEIGHT AND BALANCE IS WELL WITHIN LIMITATIONS. (Suggestion: Reduce your useful load by at least 2.5% for each 1000' of density altitude, particularly in normally aspirated aircraft.)

NOTE: WE LIVE IN A VERY NOISE-SENSITIVE AREA. PLEASE HELP US BY CLIMBING AT YOUR BEST RATE OF CLIMB SPEED (Vy), AND BY REDUCING TO YOUR CLIMB-POWER SETTING AS SOON AS YOU FEEL IT IS PRACTICABLE.

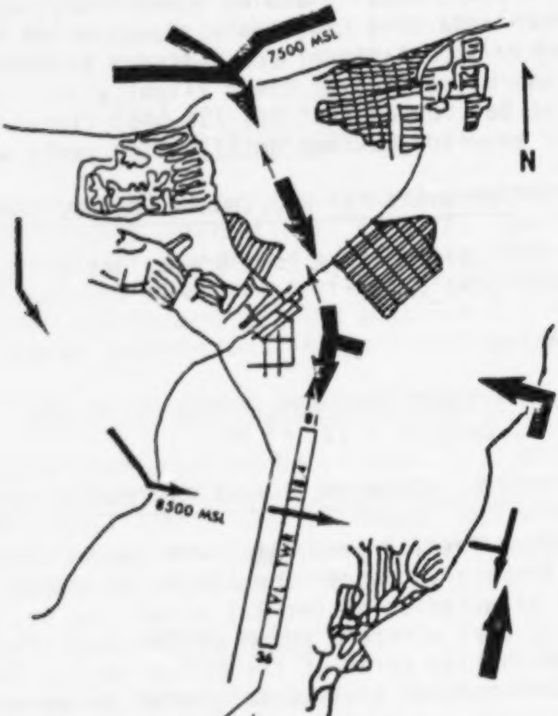
RUNWAY 36: Follow the extended centerline approximately 3/4 mile. At that point you will be abeam a white-fenced pasture and over a large red arrow. Make a slight left turn (to approximately 320 degrees) and follow the meadow to the shoreline. Once you have crossed the shoreline, and are above 7500' MSL turn to your departure heading.

NOTE: Aircraft remaining in closed traffic may make a normal traffic pattern.

RUNWAY 18:

CAUTION: ALL TERRAIN SOUTH OF THE AIRPORT IS ABOVE THE AIRPORT ELEVATION. DOWNDRAFTS IN EXCESS OF 500FPM OFTEN EXIST THROUGHOUT THE DEPARTURE AREA. CHECK YOUR CLIMB GRADIENT AND OTHER PERFORMANCE FIGURES ACCORDINGLY.

After clearing the airport boundary, make a slight right turn to follow the river. If making a downwind departure, do not turn crosswind until reaching 7500' MSL, make a wide downwind turn. If you need additional altitude, advise the Tower you will be climbing over the golf course. Use a right-turn climbing pattern, watch out for other traffic, and advise the Tower when you depart the golf course. Downdrafts often exist near the mountains - stay over the golf course.



EXPO '86

May 2, 1986, through October 13, 1986

In anticipation of a significant increase of aircraft activity to and from the Vancouver, British Columbia, Canada, area during the 1986 World Exposition, the following flight information is provided to enhance safety and minimize air traffic delays.

BELLINGHAM, WASHINGTON, AREA

The Bellingham area includes the following airports:

- Bellingham International (BLI)
- Blaine Municipal (WA09)
- Lynden (WA33)

Bellingham International is a port of entry and customs services are available from 8 a.m. until 5 p.m., locally and at other times, upon 1 hours advance notice. U.S. Airmen departing Canadian airspace which intend to land and clear Customs at Bellingham International are reminded to annotate their Customs requests in the remarks section of their flight plan. The Customs office telephone number at Bellingham is (206) 734-5463 (local exchange). Responsibility for ensuring Customs notification rests with the pilot.

TEMPORARY FAA BELLINGHAM CONTROL TOWER

The control tower will be operated from 8 a.m. until 8 p.m., daily, from May 1, 1986, through October 25, 1986.

Bellingham frequencies:

- Bellingham Tower - 124.9 MHz, 239.25 MHz
- Bellingham Ground Control - 121.65 MHz

BELLINGHAM (BLI) AIRPORT TRAFFIC AREA

The Bellingham Airport Traffic Area (ATA) will be in effect during the hours of operation for the temporary tower. The ATA is described as that airspace within a 5 statute mile radius of the BLI airport up to, but not including, 3,000' AGL excluding that airspace known as the Abbotsford-Bellingham Flight Information area which lies north of the BLI airport. The Abbotsford-Bellingham Flight Information Area is delineated on aeronautical charts.

BELLINGHAM AIRPORT INFORMATION - GENERAL

The Port of Bellingham is the airport sponsor of the airport. The traffic pattern is 1,200' for fixed wing aircraft and 800' for helicopters. The sponsor has a local regulation which prohibits intersection departures at the airport. Abbotsford, British Columbia, Canada, tower provides limited traffic

information service on 119.4 MHz to VFR aircraft operating between 1,500' and 4,000' MSL in an area generally described as between the U.S./Canadian border and Ferndale, and between the shoreline and Highway 9.

VFR FLIGHT PLANS

All pilots are encouraged to file a flight plan. Arriving aircraft should close their flight plans by radio with Bellingham FSS, on 123.6 MHz or 122.3 MHz. If unable, pilots may call the Bellingham FSS at 734-6400 (local exchange) or 1-800-833-0310 upon arrival.

Canadian/U.S. rules require that all aircraft operating VFR must be on a VFR flight plan prior to crossing the Canadian/U.S. border. Airfiles are discouraged and pilots are requested to file their flight plans 1 hour in advance of proposed departure times.

Pilots departing the U.S. from the Bellingham area are reminded that significant differences exist between Canadian and U.S. rules and procedures. Canadian officials have requested all U.S. pilots be cognizant of the requirement that flight plans are mandatory while operating in Canadian airspace.

IFR TRAFFIC

Vancouver Area Control Center (ACC) is the controlling agency for IFR aircraft operating to/from the Bellingham International Airport. Due to the expected increase in the volume of traffic generated by Expo '86, some delays may be encountered for IFR arrival and departure traffic. The Vancouver ACC has requested that U.S. airmen not request VFR/IFR practice ILS Runway 16 approaches to the Bellingham International Airport during Expo '86.

IFR ARRIVALS BLI INTERNATIONAL

Be prepared to discontinue your approach based upon local traffic conditions and enter a VFR traffic pattern for landing sequence. Pilots arriving IFR are requested to be extremely vigilant as the instrument approaches serving the Bellingham International Airport enter an area of high traffic activity in the Abbotsford-Bellingham Flight Information area.

VFR FLIGHT

Aircraft landing in Vancouver, British Columbia, Canada, should be extremely alert while operating in the Vancouver Lower Mainland area. Numerous aerial demonstrations and other aviation related sport activities are planned for Expo '86. The majority of these events will take place in the Vancouver Harbour Central Zone. The following VFR egress/ingress routes are recommended for traffic operating to/from Canadian airspace:

Bellingham (BLI) to Abbotsford (YXX) northbound east of Lynden
Abbotsford (YXX) to Bellingham (BLI) southbound west of Lynden

BLI to Vancouver (YVR) via Interstate 5 (I-5) using right side separation east/west of the highway. Extreme caution should be taken in the vicinity of the Abbotsford Localizer.

U.S. Airmen desiring additional information on Canadian area airports, rules and regulations, and Custom services may request (in writing) an Air Tourist Information Guide which is available without charge from:

Transport Canada (EXPO Guide)
800 Burrard Street
P.O. Box 220
Vancouver, British Columbia, Canada V6Z2JB

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAM's ISSUED BY BOTH THE U.S. AND CANADA PRIOR TO CONDUCTING FLIGHT.

SPECIAL TRAFFIC MANAGEMENT PROGRAM
CAPE COD AND ADJACENT ISLAND AREA AIRPORTS
MAY 15 THROUGH OCTOBER 30, 1986

In anticipation of the large number of aircraft operating to and from the Cape Cod and adjacent Island areas during the period May 15 through October 30, the following procedures will be used to enhance safety and minimize air traffic delays.

****TRAFFIC MANAGEMENT PROGRAM****
CAPE COD AND ADJACENT ISLAND AREA

For the purpose of this Special Traffic Management Program, the Cape Cod and adjacent Island area includes the following airports:

Hyannis
    Barnstable Municipal-Boardman/Polando Field - HYA
Nantucket Memorial Airport - ACK
Martha's Vineyard Airport - MVY

****VFR ENROUTE AND HOLDING****

Pilots are urged to become familiar with VFR holding and reporting points (SEE GRAPHIC).

Arriving aircraft are encouraged to monitor ATIS, where available, and then contact the appropriate tower when 10-15 miles from the airport. Advise receipt of ATIS information on initial contact. Aircraft landing Martha's Vineyard are requested to monitor tower frequency far enough out to obtain and advise the tower on initial contact, "HAVE NUMBERS".

Aircraft enroute Hyannis Airport from Sagamore Bridge, Martha's Vineyard and Cotuit areas should exercise caution due to high density military traffic on IFR approach to runway 23, Otis Air National Guard Base.

Arrival Points	Arrival Direction	Holding Direction
HYANNIS AIRPORT		
Sandy Neck	North	North
Dennis Drive In	Northeast	Northeast
Sagamore Bridge	Northwest	Northwest
Cotuit	West	Southwest
Dennisport	East	Southeast
MARTHA'S VINEYARD AIRPORT		
Woods Hole	North	Northwest
Oak Bluffs	Northeast	East
Bounre Bridge	North	West
Cuttyhunk Island	West	Southwest
Katama Airpark	Southeast	South
NANTUCKET AIRPORT		
Great Point	North	East
Tuckernuck Island	West	Southwest

****IFR ARRIVAL/DEPARTURE****

Otis Terminal Radar Approach Control (TRACON) may assign a Control Departure Time (CDT) for IFR flights arriving or departing Hyannis, Nantucket or Martha's Vineyard Airports, whenever marginal VFR or IFR weather conditions exist.

Implementation of this part of the Special Traffic Management Program will be by special notice to flight service stations and area airport traffic control towers. Pilots may obtain current delay information during preflight and inflight briefings. During marginal weather conditions pilots are encouraged to contact the tower or flight service station, prior to engine start up, to obtain latest information.

To insure the success of this Special Traffic Management Program, aircraft departing Hyannis, New Bedford, Nantucket and Martha's Vineyard Airports are urged to depart within plus or minus 5 minutes of CDT. Departures from other airports should depart within 15 minutes before and not later than 5 minutes after CDT.

****FLIGHT PLANS****

Pilots are urged to file IFR flight plans at least 4 hours prior to proposed time of departure with the nearest flight service station.

Air filed flight plans may experience extensive delays awaiting integration into the IFR system while this program is in effect.

Commercial operators are requested to file flight plans for extra flight sections no less than 1 hour prior to proposed time of departure.

Pilots are encouraged to cancel VFR flight plans with Bridgeport Flight Service Station by radio. Transmit 122.1 mHz receive on appropriate VOR frequency. If unable to cancel by radio, contact appropriate flight service station by telephone.

Bridgeport FSS (MA & RI) (CT)	800-992-7433 (800WXBRIEF)
Concord FSS	800-325-1202
Lebanon FSS (Toll)	603-298-8360
Bangor FSS (Toll)	207-947-4028
Montpelier FSS	800-227-1840
Augusta FSS (Toll)	207-622-6491

****AIRPORT TRAFFIC CONTROL TOWERS****

T. F. Green State Airport, Warwick, R.I.

Closing certain runways and taxiways for installation of CAT II Lighting System.

Runway 5R-23L, Runway 10-28, Taxiway Alfa, Mike, Papa, Delta, Echo, and the portions of Sierra that is east of Runway 5L will be closed on September 2, 1986 at 6:00 a.m., and remain closed until 6:00 a.m., on October 2, 1986.

A portion of Runway 5R-23L from a point 200' south of the intersection with Taxiway Charlie to a point 200' north of the intersection with Taxiway Bravo will remain open for taxi purposes and use incidental to the operation of Runway 16-34.

The portions of Runway 10-28 that intersect Runway 16-34, Runway 5L-23R, Taxiway Bravo, Taxiway Foxtrot, will remain open for taxi purposes and use incidental to the operation of Runway 16-34 and Runway 5L-23R.

Runway 16-34 and the portion of Runway 5R-23L from a point 200' south of the intersection with Taxiway Charlie to a point 200' north of the intersection with Taxiway Bravo, will be closed from 12:00 midnight to 6:00 a.m., commencing September 17, 1986 through September 24, 1986, to allow fixture installation at the runway intersection.

HIGH ALTITUDE/EN ROUTE FLIGHT ADVISORY SERVICE (HA/EFAS)

HA/EFAS is an expansion of the current EFAS program (See AIM, paragraph 503). When fully implemented, it will provide a discrete frequency for each of the Air Route Traffic Control Center (ARTCC) areas for use by aircraft flying at altitudes of 18,000 feet and above within the center's area. The service expansion was initiated in July 1986 in the Salt Lake City ARTCC area on a frequency of 133.025 mHz.

As service in other areas becomes available the information will be published on charts located on the inside back cover of the Airport Facility Directories.

PENNSYLVANIA INTERNATIONAL AIR SHOW
HARRISBURG INTERNATIONAL AIRPORT (MDT)
MIDDLETOWN, PENNSYLVANIA

SEPTEMBER 27 & 28, 1986

IN ANTICIPATION OF THE LARGE NUMBER OF AIR SHOW AIRCRAFT AND SCHEDULED COMMERCIAL AIRCRAFT TRAVELING TO AND FROM HARRISBURG INTERNATIONAL AIRPORT, THE FOLLOWING PROCEDURES WILL BE USED TO ENHANCE SAFETY AND MINIMIZE AIR TRAFFIC DELAYS.

NOTE: ALL TIMES ARE EASTERN DAYLIGHT TIME (EDT).

AIRPORT CLOSURE AND RESTRICTIONS

SEPTEMBER 27 AND 28 (SATURDAY AND SUNDAY)
8AM - 6PM AIRPORT CLOSED - EXCEPT FOR AIRSHOW AND SCHEDULED COMMERCIAL AIRCRAFT

CAUTION ADVISORY

CAUTION ADVISED IN THE VICINITY OF THE HARRISBURG INTERNATIONAL AIRPORT FOR NUMEROUS AIRSHOW AIRCRAFT.

ITERINERANT AIRCRAFT PARKING AVAILABLE AT CAPITAL CITY AIRPORT (CXY).

SEPTEMBER 27 (SATURDAY) AND SEPTEMBER 28 (SUNDAY) 3:00 PM TO 4:30 PM CAUTION ADVISED FOR CANADIAN AEROBATIC JET TEAM "THE SNOW BIRDS", PERFORMANCE WITHIN 5 NAUTICAL MILE RADIUS OF THE HARRISBURG INTERNATIONAL AIRPORT FROM THE SURFACE TO 15,000 MSL.

UNIVERSITY OF FLORIDA HOME FOOTBALL GAMES
SPECIAL TRAFFIC MANAGEMENT PROGRAM
GAINESVILLE, FLORIDA

In anticipation of the large number of aircraft operating to/from the Gainesville, Florida, area during the University of Florida home football games, special traffic management procedures will be used to enhance safety and minimize air traffic delays at Gainesville Regional Airport (GNV).

TRAFFIC MANAGEMENT PROGRAM

A Special Traffic Management Program will be in effect for IFR departures within the Jacksonville, Miami and Atlanta Center flight advisory areas. Jacksonville Center will assign a Controlled Departure Time (CDT) for unscheduled IFR flights arriving GNV, when this program is in effect. CDT's can be obtained from any flight service station when filing an IFR flight plan to GNV. This Special Traffic Management Program will be in effect:

Saturday	August 30	1400-2200 UTC
Saturday	September 6	1400-2200 UTC
Saturday	September 20	1230-1930 UTC
Saturday	October 4	1230-1930 UTC
Saturday	October 11	1230-1930 UTC
Saturday	November 1	1330-2030 UTC

Flight plans should be filed with the nearest flight service station (FSS) at least 4 hours prior to the proposed time of departure. Include the CDT in remarks section of the flight plan.

Except for emergency situations, Jacksonville Center will not accept IFR flight plans to Gainesville Regional Airport from airborne aircraft while this program is in effect. Airborne IFR flight plans filed with other facilities may experience extensive delays awaiting integration into the IFR system.

FLIGHT SERVICE STATION INFORMATION

VFR aircraft are encouraged to cancel/activate flight plans with Gainesville FSS when approaching/departing the city of Gainesville, or in person.

FLIGHT PLAN AND PILOT BRIEFING TELEPHONE NUMBERS

SPECIAL AIR TRAFFIC PROCEDURES FOR
1986 FARM PROGRESS SHOW
ALLEMAN, IA SEPT. 30 to OCT. 2, 1986

Due to the heavy volume of traffic generated by the annual Farm Progress Show, which this year will be held near Alleman, Iowa, the following information and special procedures are provided for aircraft arriving and departing the Ames Municipal Airport.

GENERAL INFORMATION

The Ames Municipal Airport has been designated as the official airport of the 1986 Farm Progress Show. This airport is located 2 miles southeast of the city of Ames (Newton VORTAC 292 degrees at 26 miles). An asphalt runway, 13/31, 3492 feet long and 100 feet wide will be the primary runway used. The field elevation is 930 feet MSL. Arriving aircraft FLY LEFT HAND TRAFFIC PATTERN for runway 31 or RIGHT HAND TRAFFIC PATTERN for runway 13, unless directed otherwise by the Tower. Recommended traffic pattern altitude is 800 feet AGL (1730 MSL).

A new paved 4600 feet long concrete runway, 1/19, may be used for limited operations, however, the portion of that runway that is north of runway 13/31 will be used as the primary entry/exit route to the Farm Progress Show aircraft parking area.

Other nearby airports that may be used if the Ames Airport is closed due to reaching capacity, or for any other reason, are the Boone Municipal and Des Moines International Airports. Shuttle bus service will be available between the Ames Airport and the show location near Alleman.

The Federal Aviation Administration WILL OPERATE A TEMPORARY CONTROL TOWER AT THE Ames Municipal Airport between the hours of 7 a.m. to 7 p.m. Central Daylight Time (1200-0000Z) on September 30, October 1 and 2, 1986. The TOWER frequency will be 127.4 MHz and the GROUND CONTROL frequency will be 121.7 MHz. Use the call signs "AMES TOWER" and "AMES GROUND" in radio communications. The temporary tower will be located atop a brick building adjacent to the ramp just north of the wind tee.

The Ames Airport has AWOS-1 weather information available on frequency 126.55 MHz. This broadcast transmits the temperature, dew point, surface wind, altimeter, density altitude and prerecorded remarks. Pilots should tune in and receive this broadcast prior to preparing for landing or departure.

ARRIVAL PROCEDURES

Radio Equipped Aircraft:

1. Contact TOWER when 15 miles from airport.
2. If traffic is heavy and the tower frequency is congested, LISTEN FOR THE APPROPRIATE LANDING INFORMATION. Call the tower when on downwind leg of the traffic pattern.
3. Geographic holding fixes may be assigned to inbound aircraft, if necessary.
4. After landing, turn north on runway 1 if speed permits, otherwise exit onto the parallel taxiway to runway 1 to the show parking area. Then follow directions of flagmen into parking. PROMPT CLEARING OF THE LANDING AREA WILL BE APPRECIATED!
5. Be alert for other aircraft - especially no-radio aircraft - at all times. USE EXTREME CAUTION!

No-Radio Aircraft:

1. Approach the area at least 1000 feet above traffic pattern altitude.
2. When you are able to determine the direction of landing, let down to traffic pattern altitude, pick out an aircraft on downwind leg and follow that aircraft. (If no other traffic is present, fly a normal left or right traffic pattern depending on the runway in use).
3. Watch the temporary tower for appropriate light signals. USE EXTREME CAUTION AT ALL TIMES!
4. After landing, use the same routing and procedures to parking as described for radio equipped aircraft above. PROMPT CLEARING OF THE LANDING AREA WILL BE APPRECIATED!

DEPARTURE PROCEDURES

1. Before taxiing, monitor Ground Control and the AWOS broadcast on 126.55 MHz for departure runway and information. Follow directions of flagmen out of the parking area. Expect to taxi via the north end of runway 19 then to runway 31 or 13 via its parallel taxiway.
2. During busy departure periods do not call for taxi or takeoff clearances. Controllers will initiate any necessary instructions on Ground and Tower frequencies. You may advise Tower when you're number one at the runway and ready for departure. No-radio aircraft should turn toward the tower when ready for departure and watch for a green light. If you are given any instructions with hand signals, OBSERVE THE SIGNALS CAREFULLY!
3. After departure proceed straight-out for at least two miles before making any turns. USE EXTREME CAUTION! Be alert for other aircraft, inbound and outbound, at all times.

IFR PROCEDURES

The IFR arrival and departure service for the Ames Airport is provided by Des Moines Approach Control on frequency 123.9 MHz. If weather conditions permit, IFR arrivals should cancel IFR before 10 miles from the airport in order to sequence into the VFR traffic pattern; and departures planning IFR should depart VFR and pickup their IFR clearance in the air from Des Moines Approach Control. If weather does not permit this, regular IFR service will be provided.

PILOT BRIEFING AND FLIGHT PLAN PROCEDURES

All Flight Service Station services will be provided by the Fort Dodge AFSS. There are only a limited number of public telephones, which are not convenient to the show parking area, available at the airport for weather briefing and flight plan services. You are encouraged, therefore, to use a phone at the Show grounds where more are available and easier to locate. This will also allow greater opportunity for timely processing of flight plans which will be of assistance with the large number anticipated. A special PATWAS recording will be available for the Farm Progress Show. It will be PATWAS #205 and fast file recording can be used to file IFR or VFR flight plans. Dial toll free: 1-800-392-4220.

Everyone is urged to file a flight plan. Pilots with two-way radio equipment should close their flight plans with FORT DODGE RADIO prior to landing. Transmit on 122.1 MHz and listen to the Des Moines VOR 114.1 MHz or Newton VOR 112.5 MHz. Simplex radio frequencies at Fort Dodge Radio are 122.65 MHz and 122.3 MHz.

HAVE A SAFE AND PLEASANT FLIGHT

NATIONAL BUSINESS AIRCRAFT ASSOCIATION (NBAA) CONVENTION
SPECIAL TRAFFIC MANAGEMENT PROGRAM
LONG BEACH, CALIFORNIA
SEPTEMBER 27 THROUGH OCTOBER 5, 1986

In anticipation of the large number of aircraft operating TO/FROM the Long Beach, California, area during the week of the NBAA Convention, special traffic management procedures will be used to enhance safety and minimize air traffic delays at Long Beach/Daugherty Field Airport (LGB) and John Wayne Airport-Orange County Airport (SNA).

TRAFFIC MANAGEMENT PROGRAM

A Special Management Program will be in effect daily, September 27 through October 6. A Controlled Departure Time (CDT) will be assigned unschedule IFR flights arriving or departing LGB or SNA airports during the effective times of this program.

ARRIVALS

September 27 through October 2 1300-0500 UTC

DEPARTURES

September 29 through October 6 1300-0500 UTC

CDT's may be obtained from any flight service station during preflight briefings. CDT's will not be assigned more than 48 hours in advance of proposed time of departure.

Flight plans should be filed with the nearest flight service station (FSS) at least 4 hours prior to the proposed time of departure. Include CDT in remarks section of the flight plan.

Except for emergency situations, Los Angeles Center, Coast, Los Angeles, Ontario and Burbank Approach Controls will not accept IFR flight plans to LGB or SNA from airborne aircraft while this program is in effect. Airborne IFR flight plans filed with other facilities may experience extensive delays awaiting integration into the IFR system.

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAMS AND ARRIVAL/DEPARTURE PROCEDURES PRIOR TO CONDUCTING FLIGHT.

Revised September 3, 1986

SUNBELT AGRICULTURAL EXPOSITION
SPECIAL TRAFFIC MANAGEMENT PROCEDURES
SPENCE AIRPORT
MOULTRIE, GEORGIA
OCTOBER 14 THROUGH 16, 1986

In anticipation of the large number of aircraft traveling to and from the Moultrie, Georgia, area during the Sunbelt Agricultural Exposition, the following procedures will be used to enhance safety and minimize air traffic delays.

CAUTION ADVISED: Aircraft operating from uncontrolled Moultrie, Georgia area airports.

****SPENCE TEMPORARY AIRPORT TRAFFIC CONTROL TOWER****

Spence temporary airport traffic control tower will operate daily, October 14 through 16, between the hours of 0800-1600 EDT (1300-2100 UTC).

FREQUENCIES

Local Control: 120.9 mHz Initial Contact
119.4 mHz Inside Airport Traffic Area

Ground Control: 121.7 mHz

****VALDOSTA APPROACH CONTROL****

Valdosta Approach Control will provide approach control services to aircraft arriving and departing Spence Airport (MUL). VFR radar advisories will be provided, workload permitting.

FREQUENCIES

124.6 mHz East of Valdosta
126.6 mHz West of Valdosta

****ALBANY (ABY) FLIGHT SERVICE STATION****

Flight planning and pre flight services will be provided by Albany Flight Service Station:

Phone Toll Free 1-800-342-6650.

Pilots are encouraged to file IFR/VFR flight plans at least four hours, but not less than one hour, prior to proposed time of departure with Albany Flight Service Station.

****VFR ARRIVALS****

The Bingham Lake arrival procedure (SEE GRAPHIC) should be used unless otherwise requested by Spence Tower.

Pilots are requested to contact Spence Tower 15 miles from the airport on 120.9 mHz. When over Bingham Lake monitor 119.4 mHz and report turning downwind.

All aircraft should enter the airport traffic area from over Bingham Lake. Unless requested by Spence Tower, make all traffic pattern entries on the downwind leg. Left traffic will be used for runway 14 and right traffic for runway 32.

Pilots are requested to fly a traffic pattern within close proximity of the airport boundary without jeopardizing safety.

****TRAFFIC PATTERN ALTITUDES****

Turbojet Aircraft 2,000 feet MSL
Propeller Aircraft 1,500 feet MSL

****VFR DEPARTURES****

Contact Ground Control on 121.7 mHz for taxi instructions.

When runway 32 is in use, departures will be instructed to taxi to the red barrels.

When runway 14 is in use departures will be instructed to taxi to the blue barrels.

****IFR ARRIVALS****

IFR arrivals are requested to discontinue IFR approach on final and enter the traffic pattern VFR, weather conditions permitting.

CAUTION ADVISED due to a large volume of aircraft with a wide variance of performance characteristics operating in the vicinity of Spence Airport.

****IFR DEPARTURES****

Contact Ground Control, 121.7 mHz, for IFR clearance. If IFR clearance has not been received prior to reaching the departure runway, taxi to a position that will allow other aircraft access to the departure runway.

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAMS AND ARRIVAL/DEPARTURE PROCEDURES PRIOR TO CONDUCTING FLIGHT.

"QUICK THRUST 1-87"

Effective 10/20/86 through 10/25/86, 1200-2200z daily extensive military air operations, both high and low speeds, will be conducted in an area bounded by the SAV, SSI, and DBN VORs, plus access corridors to and from offshore Warning Areas. These operations will consist of activities such as close air support, interdiction, air defense/counter air, electronic warfare, reconnisance, tactical airlift missions, and aerial refueling. It is estimated that approximately 120 aircraft will be utilized to conduct approximately 150-200 sorties a day.

The following areas will be used: R3005, R3007, Stewart MOAs B and C, and Quick Thrust MOAs E F G H I J L M and N.

Aircraft operations along V1 between RUBYS and STARY intersections, along V3-37 between HARPS intersection and SSI, along V437 between SAV and STARY, V362 between SSI and AMG, SAV to SSI will be affected.
Quick Thrust MOAs M and N between SAV, SSI, R3007, and W157 will be used at altitudes between 500AGL and 3000MSL and 11000MSL to 12000MSL. Other Quick Thrust area altitudes are from 100AGL to 14000MSL.

Real time exercise airspace status advisories can be obtained by contacting Savannah Approach Control, or Jacksonville Air Route Traffic Control Center.

AOPA CONVENTION

October 27 through November 2, 1986

A significant increase of aircraft activity is expected at Stinson Airport the week of the AOPA convention in San Antonio, Texas. The following flight information is provided to enhance safety and minimize air traffic delays.

SAN ANTONIO, TEXAS AREA

The following airports are in close proximity within San Antonio Terminal Approach Control airspace:

San Antonio International
Kelly AFB
Randolph AFB
Stinson Municipal

San Antonio Approach Control is the controlling agency for IFR aircraft operating to/from these airports. Some delays may be encountered by IFR arrivals/departures to Stinson Airport due to the anticipated increase of traffic.

VFR Arrival Procedures- - - - - - - - - -

1. Prior to contacting Stinson Tower, close VFR flight plan with San Antonio FSS on 122.2
2. Monitor STINSON ATIS 132.05
3. Contact SAN ANTONIO APPROACH on 127.1 (northwest through east) or 125.1, for radar advisories.
4. Follow the applicable arrival route, as described below and depicted on the attached graphics.

ARRIVAL ROUTES--------------------

North through Northeast Arrivals--

From over the SAN MARCOS airport, fly magnetic course 190, 20 nautical miles to the town of SEGUIN. Maintain at or above 3,500 MSL due to concentrated T-38 jet traffic operating at the Randolph Air Force Base Auxillary airport and transiting the area between Randolph and Randolph Auxillary at 2,500 and 3,000.

Over Seguin, turn to fly magnetic course 220, 24 nautical miles to Calaveras Lake. Maintain at or above 3,500 MSL until crossing the extended centerline of Runway 14R/32L at Randolph AFB (or the RND VOR 145 Radial), then decend to 2,500 MSL or below to Calaveras Lake. Use caution for T-37 jet trainers transiting northwest and southeast bound between Randolph AFB and the Randolph MOA 1B.

At Calaveras Lake contact STINSON TOWER on 119.5 Fly the SMOKESTACK ARRIVAL (Runway 09) or continue either for the DOWNTOWN ARRIVAL or the VOR ARRIVAL (Runway 27).

East Arrivals--

Proceed to Seguin via Interstate Highway 10 at or above 3,500 MSL. Join the above routing and continue inbound.

Southeast through Southwest Arrivals--

Proceed directly to Calaveras Lake for the SMOKESTACK ARRIVAL (Runway 09) or to the Stinson VOR for the VOR ARRIVAL (Runway 27). Use caution for T-37 and T-38 jets transiting between Kelly and Randolph Air Force Bases, operating at and above 3,000 MSL 15-20 miles southeast of San Antonio.

Contact STINSON TOWER on 119.5 over Stinson VOR or Calaveras Lake.

Northwest through West Arrivals--

From over the KERRVILLE airport, fly magnetic course 145, 50 nautical miles to cross Interstate Highway 35, 10 miles southwest of Kelly Air Force Base. Turning eastbound, remain well south of Kelly and Mitchell Lake to either the Stinson VOR for the VOR ARRIVAL (Runway 27), or continue south of Braunig Lake to Calaveras Lake for the SMOKESTACK ARRIVAL (Runway 09).

Use caution for jet traffic departing Kelly Air Force Base from Runway 15, or on approach to Runway 33.

Contact STINSON TOWER on 119.5 at the Stinson VOR or Calaveras Lake.

AIRPORT ARRIVAL PROCEDURES- - - - - - - - - -

SMOKESTACK ARRIVAL (Runway 09 in use) - -

From the Calaveras Lake Smokestack, contact STINSON TOWER on 119.5 with the ATIS code. Fly heading 290 (use caution for TV Tower 1542 MSL northwest on lake) 6.1 nautical miles, decending to 1500 MSL.

At the northeast corner of Brooks Air Force Base (I-37 & S.E. Military Drive Cloverleaf), turn left, heading 270, to enter downwind for Runway 09. Traffic Pattern Altitude is 1400 MSL.

DOWNTOWN ARRIVAL (Runway 27 in use) - -

From Downtown San Antonio, contact STINSON TOWER on 119.5 with the ATIS code. From the Tower of the Americas, fly heading 180, 4.5 nautical miles, at or below 1900 MSL. Over the Twin Drive-In Theatres (2 mi nnw), turn left to enter downwind for Runway 27. Traffic Pattern Altitude is 1400 MSL.

VOR ARRIVAL (Runway 27 in use) - -

Over the Stinson VOR (SSF, 108.4), contact STINSON TOWER on 119.5 with the ATIS code. Fly outbound on the SSF 320 Radial, 4 nautical miles, decending to Traffic Pattern Altitude of 1400 MSL. Abeam the Tank Farm, turn right to enter downwind for Runway 27.

IFR Arrivals - - - - - - - - - -

Expect the VOR RWY 32 Approach, Circle-to-Land to Runway 09 or 27, or...

Request vectors for the "SMOKESTACK," DOWNTOWN," or "VOR" ARRIVAL, (as appropriate). Cancel IFR prior to the entry point and proceed VFR via the procedure.

Weather	AWOS (System and Frequency).

FOREWORD

The primary references for changes to the National Airspace System (NAS) are Aeronautical Charts and Airport/Facility Directories (A/FD) published for the affected area(s). Ideally, most changes to the NAS that meet NOTAM criteria are known sufficiently in advance to allow publication in these publications. When this cannot be done, changes are carried in the Notices to Airman Class II publication, or as a last resort, on the Service A telecommunications system as a NOTAM D item.

NOTAM D information printed in this publication will not be included on the Service A system and will not be provided during pilot briefings unless specifically requested by the pilot.

National Flight Data Center (FDC) NOTAMs primarily reflect changes to Standard Instrument Approach Procedures (SIAPs), Flight Restrictions, and aeronautical chart revisions. The last FDC NOTAM included in this issue is indicated by number and date above. This information insures that subsequent FDC NOTAMs, issued after the cutoff date, can be identified.

The Class II publication contains information of a temporary nature, which is expected to remain for an extended period. This temporary information is carried until it expires or is cancelled. Data of a permanent nature is sometimes carried in the Class II publication as an interim step prior to publication on the appropriate charts or in the A/FD.

The Class II publication is issued every 14 days. The A/FD is published every 56 days. Data in the Class II publication that is current on the effective date of the next A/FD will be transferred to the A/FD and removed from the Class II publication.

Facilities are responsible for forwarding data to the National Flight Data Center (NFDC). Data, still current for the next available Class II publication date, will be published.

This publication is divided into two sections:

1. Section One contains information divided into four categories:

a. GENERAL

b. AIRWAYS

c. FLIGHT RESTRICTIONS

d. AIRPORTS / FACILITIES / PROCEDURAL NOTAMS

The first subsection is listed in descending FDC NOTAM numerical order. The second and third subsections are listed by state. The fourth subsection is ordered by state, city, and airport name.

2. The second section contains special notices that are too long or that concern a wide or unspecified geographical area (which may overlap several states) and are not suitable for inclusion in the first section.

The content of these notices vary widely and are included because of their significant impact on flight safety.

NOTES

1. All times are indicated as UTC or local. During periods of Daylight Savings Time, effective hours in local time will be one hour earlier than shown. All states observe Daylight Savings Time except Arizona, that portion of Indiana in the Eastern Time Zone, Puerto Rico, and the Virgin Islands.

2. (|) Vertical line items indicate new information.

FDC NOTAM LEGEND

Code	Explanation
5/103	Accountability number assigned to the message originator.
FI/T	Flight information of a temporary nature.
FI/P	Flight information of a permanent nature.

(A) Information for Section 1 should be submitted to the National Flight Data Center (ATO-250).
(B) Camera-ready copy for Section 2 should be submitted to ATO-200.

ADDRESSING INFORMATION FOR SECTION 1

Federal Aviation Administration, National Flight Data Center (ATO-250), 800 Independence Ave, SW., Washington, DC 20591.

Phone: Commercial—202-267-9294/267-9288
Phone: FTS— 267-9294/267-9288

ADDRESSING INFORMATION FOR SECTION 2

Federal Aviation Administration, ATO-200, 800 Independence Ave, SW., Washington, DC 20591.

Phone: Commercial—202-267-9239/267-9240
Phone: FTS— 267-9239/267-9240

SUBSCRIPTION INFORMATION

HOW TO ORDER

The Notices to Airmen publication is available by subscription through the Superintendent of Documents. Subscriptions are accepted for a 1 year period. Remittance must be made in advance of shipment. Your check or money order must be made payable to the Superintendent of Documents. Orders can also be charged to your VISA or MASTERCARD account. Orders should be addressed to:

Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402,

or

Phone: (202)783-3238 (Order Desk).

ABBREVIATIONS

The following abbreviations are those most commonly used within this publication. Other abbreviations may be found in the Contraction Handbook, 7340.1.

Note: An "s" may be added for plural. Abbreviations used in FDC NOTAMs are italicized.

A	
/	and
AAS	Airport Advisory Service
AC	Approach Control
acft	aircraft
ACR	Air Carrier
ADF	Automatic Direction Finder
AER	Approach End Runway
AGL	above ground level
AIM	Airman's Information Manual
ALS	Approach light system
ALSF-1	Standard 2400' High-intensity Approach Lighting System with Sequenced Flashers, Category I Configuration
ALSF-2	Standard 2400' High-intensity Approach Lighting System with Sequenced Flashers, Category II Configuration
alt	altitude
altm	altimeter
altn	alternate
ALSTG	altimeter setting
amdt	amendment
apch	approach
apchg	approaching
aprx	approximate
arpt	airport
arr	arrive or arrival
ARSR	Air Route Surveillance Radar
ARTCC	Air Route Traffic Control Center
ASDE	airport surface detection equipment
ASR	Arpt Surveillance Radar
ATC	air traffic control
ATCT	air traffic control tower
ATIS	Automatic Terminal Information Service
avbl	available
awy	airway
B	
BC	back course
bcn	beacon
bcst	broadcast
bldg	building
brg	bearing
btn	between
byd	beyond
C	
cat	category
CFR	crash fire rescue
clnc	clearance
clsd	closed
cmsnd	commissioned
cntr	center
cntrln	centerline
Cmlo	Compass locator
const	construction
cpcty	capacity
crs	course
ctc	contact
CTLZ	Control Zone
D	
dalgt	daylight
dcmsnd	decommissioned
degs	degrees
dep	depart, departure
DF	direction finder
DH	decision height
DME	UHF standard TACAN compatible distance measuring equipment
dsplcd	displaced
dist	distance
durg	during
DVFR	Defense Visual Flight Rule
E	
E	east
EFAS	Enroute Flight Advisory Service
elev	elevation
emerg	emergency
eqpt	equipment
exc	except
F	
FAF	final approach fix
FAR	Federal Aviation Regulation
FDC	Flight Data Center
FI/P	flight information (permanent)
FI/T	flight information (temporary)
FL	Flight Level
FM	from
freq	frequency
FSS	Flight Service Station
ft	feet/foot
G	
govt	government
GS	glide slope
GWT	gross weight
H	
HAA	height above airport
HAT	height above touchdown
HIRL	High intensity Runway Lights
hol	holiday
hwy	highway
I	
IAF	initial approach fix
IAP	initial approach procedure
ident	identification
IF	intermediate fix
IFR	Instrument Flight Rules
IFSS	International Flight Service Station
ILS	instrument landing system
info	information
inop	inoperative
int	intersection
intl	international
intst	intensity
ISMLS	Interim Standard Microwave Landing System
J	
J-bar	jet runway barrier
K	
kHz	kilohertz
L	
L	left (used only to designate rwys) eg. rwy 12L
lat	latitude
lb	pounds (weight)
lctd	located
LDA	Localizer type directional aid
LDIN	Lead-in Lighting System
lgtd	lighted
LMM	compass locator at middle marker ILS
ldg	landing
loc	localizer
LOM	compass locator at outer marker ILS
long	longitude
M	
MAA	maximum authorized altitude
mag	magnetic
maint	maintain, maintenance
MALS	Medium Intensity Approach Light System
MALSR	Medium Intensity Approach Light System with Runway Alignment Indicator Lights
MAP	missed approach point
max	maximum
MCA	minimum crossing altitude
MDA	minimum descent altitude
MEA	minimum enroute IFR altitude
MHz	megahertz
min	minimum or minute
MIRL	Medium Intensity Runway Edge Lights
MLS	Microwave Landing System
MM	middle marker ILS
MOCA	minimum obstruction clearance altitude
MRA	minimum reception altitude
MSA	minimum safe altitude
MSL	mean sea level
muni	municipal
N	
N	north
NA	not authorized
natl	national
navaid	navigational aid
NDB	Non-directional Radio Beacon
NM	nautical mile(s)
NOPT	no procedure turn required
Nr	number
O	
obstn	obstruction
ODALS	Omnidirectional Approach Lighting System
OM	outer marker ILS
oper	operate
opn	operation
orig	original
OTS	Out of Service
ovrn	overrun
P	
PAR	Precision Apch Radar
pat	pattern
permly	permanently
PPR	Prior Permission Required
proc	procedure
Q	
quad	quadrant
R	
R	right (used only to designate rwys) eg. rwy 19R
RAPCON	radar approach control (USAF)
RCAG	Remote Center air/ground
RCLS	Runway Centerline Lights System
RCO	Remote Communications Outlet
rcv	receive
rcvg	receiving
REIL	Runway End Identifier Lights
req	request
RNAV	Area Navigation
RRP	Runway Reference Point
rstrd	restricted
RTS	returned to service
RVR	runway visual range
RVRM	Runway Visual Range Midpoint
RVRT	Runway Visual Range Touchdown
RVRR	Runway Visual Range Rollout
RVV	runway visibility values
rwy	Runway
S	
S	south/snow
SDF	Simplified Directional Facility
sec	second
sfc	surface
SFL	Sequenced Flashing Lights
SI	straight-in approach
SM	statute mile(s)
SR	sunrise
SS	sunset
SSAFL	Simplified Short Approach Lighting System with Sequenced Flashers
SSALS	Simplified Short Approach Lighting System
SSALR	Simplified Short Approach Lighting System with Runway Alignment Indicator Lights
STOL	Short take-off & landing runway
svc	service
T	
T	true (after a bearing)
TAC	Terminal Area Chart
TACAN	UHF navigational facility—omni-directional course and distance information
TCA	Terminal Control Area
TCH	Threshold Crossing Height
tfc	traffic
thr	threshold
thru	through
tkof	take-off
tmprly	temporarily
tmpry	temporary
TPA	Traffic Pattern Altitude
TRACON	Terminal Radar approach control
trml	terminal
TRSA	Terminal Radar Service Area
tsnt	transient
TWEB	transcribed weather bcst
twr	tower
twy	taxiway
U	
UHF	Ultra high frequency
unavbl	unavailable
unlgtd	unlighted
unmon	unmonitored
unusbl	unusable
V	
VASI	Visual Approach Slope Indicator
VDP	visual descent point
VFR	visual flight rules
VHF	Very high frequency
vis	visibility
VOR	VHF Omni-Directional Radio Range
VORTAC	Combined VOR and TACAN System
VOT	a VOR Receiver testing facility
visby	visibility
W	
W	west
wea	weather
wkday	weekday
wkend	weekend
wp	waypoint
wt	weight
Z	
Z	Coordinated Universal Time (UTC)

GENERAL

FDC 6/2036 FI/P CORRECT U.S. SECTIONAL CHART FOR SEATTLE. 31ST EDITION, DTD 3 JUL 86. CHANGE BAKER FSS /BKE/FREQ 122.4 TO FREQ 122.2.

FDC 6/1601 FI/P HI CORRECT U.S. SECTIONAL CHART HAWAIIAN ISLANDS 34TH EDITION DATED 5 JUN 86.. CHANGE BRADSHAW NDB IDENT /BSF/FREQ 349 TO FREQ 339.

FDC 6/995 U.S. CUSTOMS REGULATORY CHANGES. AIRCRAFT PENETRATING THE INNER ADIZ FM ANYWHERE IN THE WESTERN HEMISPHERE SOUTH OF THE U.S. MEXICAN BORDER, SOUTH OF 33 DEG NORTH LATITUDE ON THE PACIFIC COAST, SOUTH OF 30 DEGREES NORTH LATITUDE ON THE ATLANTIC COAST, OR SOUTH OF THE INNER ADIZ ON THE GULF COAST, MUST PROVIDE U.S. CUSTOMS AT LEAST ONE HOUR ADVANCE NOTICE OF PENETRATION OF U.S. AIRSPACE, EFFECTIVE APRIL 30. THIS REQUIREMENT WILL BE EXTENDED TO AIRCRAFT THAT HAVE NOT LANDED IN A FOREIGN PLACE AND AIRCRAFT FROM PUERTO RICO THAT ARE NOT FLYING UNDER IFR FLIGHT RULES. FILING A FLIGHT PLAN WITH THE NOTATION 'ADCUS' WITH THE U.S. FAA AT LEAST ONE HOUR IN ADVANCE OF PENETRATION OF THE ADIZ WILL SATISFY THIS REQUIREMENT. CONTRACTING U.S. CUSTOMS AT 305-536-6591, MIAMI, FL, OR 714-351-6674, RIVERSIDE, CA, AT LEAST ONE HOUR IN ADVANCE WILL ALSO MEET THE REQUIREMENT. LANDING AND INSPECTION REQUIREMENTS FOR AIRCRAFT ARRIVING FROM FOREIGN PLACES REMAIN UNCHANGED.

FDC 6/201 FI/P CORRECT U.S. GOVT WORLD AERONAUTICAL CHART CG21, 16TH EDITION DTD OCT 24, 1985. CHANGED HARRIS VORTAC /HRS/ FREQ 111.6 CHANNEL 053 TO FREQ 109.8 CHANNEL 035.

FDC 5/2508 AUTOMATED VOICE AIRPORT RESERVATION SYSTEM../AVARS/. IN ORDER TO IMPROVE THE AVARS CAPACITY THE FAA HAS INSTALLED TWO ADDITIONAL NON-TOLL FREE NUMBERS..617-275-4837/8. EFFECTIVE NOVEMBER 1 1985 TWO ADDITIONAL TOLL FREE LINES WILL BE AVAILABLE TO BE PART OF 1-800-FAA-1212 NUMBER. FAA PLANS TO CONTINUE THE DUAL /ARO/SYSTEM USING THE AUTOMATED SYSTEM ON 1-800-FAA-1212 AND THE MANUAL ARO SYSTEM WITH NEW YORK 718-632-7806/ CHICAGO 312-263-2575 AND WASHINGTON DC 202-426-9347 UNTIL FURTHER NOTICE. IN AREAS WHERE TOUCH TONE PHONE SYSTEMS ARE NOT AVAILABLE USERS MAY EITHER CONTACT THE NEAREST FAA FLIGHT SERVICE STATION OR THE /ARO/ AT THE NUMBERS LISTED ABOVE AND REQUEST A RESERVATION. USERS DEPARTING A TRANS-ATLANTIC AIRPORT FOR ARRIVAL TO A HIGH DENSITY AIRPORT SHOULD CONTINUE TO USE THE PROCEDURES OUTLINED IN ADVISORY CIRCULAR AC 90-43F PARA 5 DATED APRIL 22 1985 WHICH STATES CONTACT THE NEAREST FLIGHT SERVICE STATION.

FDC 5/594 AIRPORT RESERVATION OFFICE/ARO/ OPERATIONS... EFF APR 1, 1985...THE FOLLOWING GUIDELINES SHALL BE IN EFFECT... /ARO/WILL ACCEPT RSVNS FOR WASHINGTON NATIONAL AIRPORT /DCA, JOHN F. KENNEDY INTL ARPT /JFK, LA GUARDIA ARPT/LGA, AND CHICAGO O HARE INTL ARPT /ORD BEGINNING 48 HRS PRIOR TO THE PROPOSED TIME OF OPERATION AT THE AFFECTED ARPT. E.G REQ FOR 11 A.M. OPERATION ON THURSDAY WILL BE ACCEPTED STARTING 11 A.M. ON THE PRECEDING TUESDAY. AN EXCEPTION TO THE 48 HR LIMITATION IS MADE FOR WEEKENDS TO RECOGNIZE NORMAL BUSINESS HOURS. A RSVN REQ FOR AN IFR OPERATION ON MONDAY WILL BE ACCEPTED ON THE PREVIOUS THURSDAY STARTING AT THE PROPOSED HR OF OPERATION. REQUESTS FOR IFR OPERATION ON TUESDAY WILL BE ACCEPTED ON THE PREVIOUS FRIDAY STARTING AT THE PROPOSED HR OF OPERATION. E.G. REQ FOR 11 A.M. RSVN ON TUESDAY WOULD BE ACCEPTED BEGINNING 11 A.M. ON FRIDAY. IF THE PREVIOUS FRIDAY IS AN OBSERVED HOLIDAY THE PROCEDURE WILL BE IN EFFECT ON THURSDAY. A MAXIMUM OF TWO RSVNS PER PHONE CALL WILL BE ACCEPTED. E.G. A PILOT MAY REQ A RSVN FOR ARRIVAL AND DEPARTURE DURING THE SAME PHONE CALL PROVIDING BOTH FALL ON THE SAME CALENDAR DAY. E.G. A RSVN REQ FOR 11 A.M. ARRIVAL ON FRIDAY AND 4 P.M. DEPARTURE ON THE SAME DAY MAY BE MADE BEGINNING AT 11 A.M. ON WEDNESDAY.

HAZARDOUS INFLIGHT WEATHER ADVISORY SERVICE (HIWAS)

HIWAS is a national program for broadcasting hazardous weather information (SIGMET's, convective SIGMET's, Center Weather Advisories (CWA), AIRMET's, and urgent PIREP's) on a continuous basis over selected VOR's. The program is operational in the Jacksonville, Miami, and Houston Air Route Traffic Control Center (ARTCC) areas. The chart on the following page identifies the current broadcast outlet locations and frequencies. Frequencies shown in the Atlanta ARTCC area are for planning purposes only. HIWAS will be expanded on an ARTCC by ARTCC basis.

Pilots should be aware that:

* Flight service stations broadcast information on hazardous weather not yet covered by an advisory and make an announcement on their frequencies that new HIWAS information is available.

* Controllers in ARTCC's and air traffic control terminals announce updates to HIWAS information on all appropriate frequencies.

* Controllers and specialists will not routinely broadcast SIGMET's, convective SIGMET's, CWA's, AIRMET's, and urgent PIREP's in the commissioned HIWAS areas.

User comments regarding the effectiveness of the HIWAS program and any proposed revision to HIWAS procedures are solicited.

Mail comments to:

Department of Transportation
Federal Aviation Administration
ATTN: ATO-360
800 Independence Ave. S.W.
Washington, DC 20591

Note: For further information on the HIWAS program, refer to the Airman's Information Manual (AIM) and Airport/Facility Directory (AFD). Operational sites are published in the AFD under radio aids to navigation.

AIRPORT RADAR SERVICE AREAS (ARSA)

The National Airspace Review Terminal Airspace Task Group 1-2.2 recommended the ARSA Program as a replacement for the existing Terminal Radar Service Area Program and the FAA has adopted that recommendation. ARSA designations have been made, and effective dates established, for the locations listed below. The following is a summary of the pilot requirements and the ATC procedures for ARSA's. Graphic depictions of each ARSA are also included.

Unless otherwise authorized or required by ATC, the following provisions apply to aircraft operating within an ARSA:

1. Aircraft approaching that would penetrate the ARSA must establish two-way radio communications with ATC prior to entering the ARSA and maintain that communication while operating within the ARSA.

2. Aircraft departing the primary airport within the ARSA must establish two-way communications with ATC prior to departure and maintain that communication while operating within the ARSA. Aircraft departing a satellite airport within the ARSA must contact ATC as soon as practicable after takeoff.

3. Except in an emergency, all operations must be in compliance with ATC clearances and instructions.

4. All arrivals and departures within the ARSA must be in compliance with FAA arrival and departure traffic patterns.

5. Ultralight vehicles and parachute operations may not be conducted within the ARSA except under the terms of an ATC authorization.

6. NOTAM's pertaining to flight within the ARSA must be reviewed as a part of preflight action required by FAR 91.5.

Within ARSA's, ATC will provide the following services:

1. Radar sequencing of all arrivals.

2. Standard separation between all instrument flight rules (IFR) flights.

3. Traffic advisories and safety advisories to all aircraft.

4. Resolve any potential conflict between an aircraft operating IFR and an aircraft operating under visual flight rules by application of conflict resolution procedures.

ARSA's have been designated at the following locations to be effective June 5, 1986.

Albuquerque International Airport, NM
Greater Cincinnati International Airport, KY
Indianapolis International Airport, IN
Phoenix Sky Harbor International Airport, AZ
Tucson International Airport, AZ
Davis-Monthan Air Force Base, AZ
Wichita Mid-Continent Airport, KS

An ARSA has been designated at the following airport to be effective July 3, 1986.

Dallas Love Field, Texas

An ARSA has been designated at the following airport to be effective July 31, 1986.

Lafayette Regional Airport, LA

ARSA's have been designated at the following locations to be effective on August 28, 1986.

TERMINAL AREA GRAPHIC NOTICE
(NOT TO BE USED FOR NAVIGATION)

SOUTH LAKE TAHOE, CALIFORNIA
LAKE TAHOE AIRPORT

The Lake Tahoe Airport is closed to aircraft registering 77.1 or more decibles (as listed in FAA AC36-3 series) from 2000-0800 hours local time.

ARRIVAL PROCEDURES:

CAUTION: NORMALLY ASPIRATED PISTON ENGINES SHOULD BE LEANED TO PROVIDE A BEST-POWER MIXTURE DURING THE LANDING. DUE TO THE POSSIBILITY OF AN ABORTED APPROACH, PILOTS OF SUPERCHARGED AIRCRAFT SHOULD USE CAUTION WITH THEIR MIXTURE DUE TO FOULING OF THE SPARKPLUGS AT LOW POWER AND RICH MIXTURE.

RUNWAY 36: When arriving from the northwest through the east, enter the pattern on a wide right downwind, or as directed by the Tower.

When arriving from the southeast through the southwest, the Tower will normally direct you straight-in. If that is not practicable, request an over-flight for right traffic. Make your over-flight at or above 8000' MSL, and descend to pattern altitude on crosswind.

When arriving from the west, the Tower may direct you to cross over the field (mid-field crosswind) for right traffic.

High performance aircraft: Tower will normally assign a left downwind, fly base leg between the river and the ridge or as directed by Tower.

NOTE: CAUTION IS ADVISED DUE TO POSSIBLE DOWNDRAFTS, PARTICULARLY ON SHORT FINAL AND WHEN NORTHERLY WINDS EXCEED 15 KNOTS.

RUNWAY 18: When arriving from the northwest through the east, Tower may direct you to make a straight in. Descend north of the shoreline to cross the shoreline over the meadow, slightly west of "straight in", and at or above 7500' MSL.

When arriving from the southeast through the southwest, Tower will usually direct you to a wide left down-wind entry. If arriving from southwest to remain as far south as feasible until crossing the extended centerline.

Caution is advised due to possible traffic climbing out and/or circling the golf course to gain altitude.

When arriving from the west, Tower normally will advise you to make a straight in. Make your "base" leg north of the shoreline, and turn final at or above 7500' MSL.

CAUTION: ROTOR ACTIVITY (UP AND DOWN-DRAFTS) OFTEN EXISTS THROUGHOUT THE BASIN AND ESPECIALLY ON THE FINAL APPROACH WHEN SOUTHERLY WINDS EXIST. IF PRACTICABLE, MAKE YOUR AIM-POINT APPROXIMATELY ONE-THIRD OF THE WAY DOWN FROM THE RUNWAY (NEAR TAXIWAY "E"). OVER 5000' OF RUNWAY REMAINS FROM THAT POINT.

PATTERN ALTITUDES:

Small aircraft - 7500' MSL (1236' above the airport)
Large aircraft - 8000' MSL (1736' above the airport)

DEPARTURE PROCEDURES:

CAUTION: DENSITY ALTITUDE CAN AND DOES EXCEED 10,000'. PLEASE COMPUTE YOUR PERFORMANCE FACTORS ACCORDINGLY, USE DENSITY ALTITUDE LEANING TECHNIQUES APPROPRIATE TO YOUR AIRCRAFT PRIOR TO TAKEOFF AND ENSURE THAT YOUR WEIGHT AND BALANCE IS WELL WITHIN LIMITATIONS. (Suggestion: Reduce your useful load by at least 2.5% for each 1000' of density altitude, particularly in normally aspirated aircraft.)

NOTE: WE LIVE IN A VERY NOISE-SENSITIVE AREA. PLEASE HELP US BY CLIMBING AT YOUR BEST RATE OF CLIMB SPEED (Vy), AND BY REDUCING TO YOUR CLIMB-POWER SETTING AS SOON AS YOU FEEL IT IS PRACTICABLE.

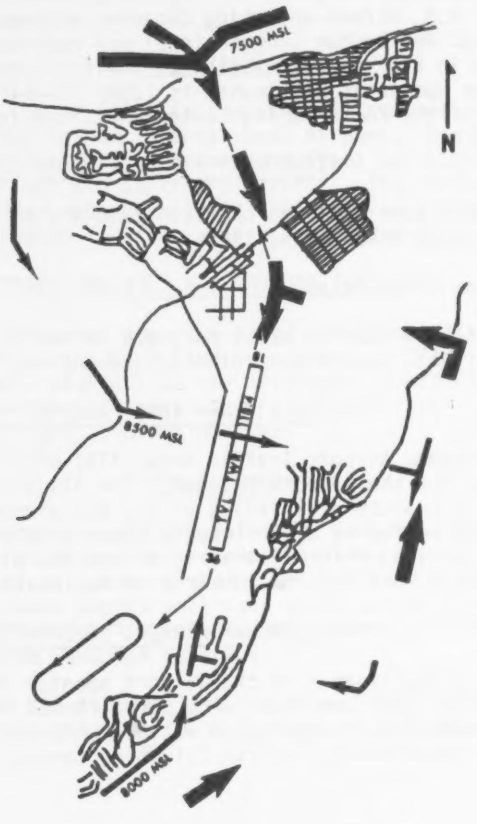
RUNWAY 36: Follow the extended centerline approximately 3/4 mile. At that point you will be abeam a white-fenced pasture and over a large red arrow. Make a slight left turn (to approximately 320 degrees) and follow the meadow to the shoreline. Once you have crossed the shoreline, and are above 7500' MSL turn to your departure heading.

NOTE: Aircraft remaining in closed traffic may make a normal traffic pattern.

RUNWAY 18:

CAUTION: **ALL TERRAIN SOUTH OF THE AIRPORT IS ABOVE THE AIRPORT ELEVATION. DOWNDRAFTS IN EXCESS OF 500FPM OFTEN EXIST THROUGHOUT THE DEPARTURE AREA. CHECK YOUR CLIMB GRADIENT AND OTHER PERFORMANCE FIGURES ACCORDINGLY.**

After clearing the airport boundary, make a slight right turn to follow the river. If making a downwind departure, do not turn crosswind until reaching 7500' MSL, make a wide downwind turn. If you need additional altitude, advise the Tower you will be climbing over the golf course. Use a right-turn climbing pattern, watch out for other traffic, and advise the Tower when you depart the golf course. Downdrafts often exist near the mountains - stay over the golf course.



EXPO '86

May 2, 1986, through October 13, 1986

In anticipation of a significant increase of aircraft activity to and from the Vancouver, British Columbia, Canada, area during the 1986 World Exposition, the following flight information is provided to enhance safety and minimize air traffic delays.

BELLINGHAM, WASHINGTON, AREA

The Bellingham area includes the following airports:

Bellingham International (BLI)
Blaine Municipal (WA09)
Lynden (WA33)

Bellingham International is a port of entry and customs services are available from 8 a.m. until 5 p.m., locally and at other times, upon 1 hours advance notice. U.S. Airmen departing Canadian airspace which intend to land and clear Customs at Bellingham International are reminded to annotate their Customs requests in the remarks section of their flight plan. The Customs office telephone number at Bellingham is (206) 734-5463 (local exchange). Responsibility for ensuring Customs notification rests with the pilot.

TEMPORARY FAA BELLINGHAM CONTROL TOWER

The control tower will be operated from 8 a.m. until 8 p.m., daily, from May 1, 1986, through October 25, 1986.

Bellingham frequencies:

Bellingham Tower - 124.9 MHz, 239.25 MHz
Bellingham Ground Control - 121.65 MHz

BELLINGHAM (BLI) AIRPORT TRAFFIC AREA

The Bellingham Airport Traffic Area (ATA) will be in effect during the hours of operation for the temporary tower. The ATA is described as that airspace within a 5 statute mile radius of the BLI airport up to, but not including, 3,000' AGL excluding that airspace known as the Abbotsford-Bellingham Flight Information area which lies north of the BLI airport. The Abbotsford-Bellingham Flight Information Area is delineated on aeronautical charts.

BELLINGHAM AIRPORT INFORMATION - GENERAL

The Port of Bellingham is the airport sponsor of the airport. The traffic pattern is 1,200' for fixed wing aircraft and 800' for helicopters. The sponsor has a local regulation which prohibits intersection departures at the airport. Abbotsford, British Columbia, Canada, tower provides limited traffic

information service on 119.4 MHz to VFR aircraft operating between 1,500' and 4,000' MSL in an area generally described as between the U.S./Canadian border and Ferndale, and between the shoreline and Highway 9.

VFR FLIGHT PLANS

All pilots are encouraged to file a flight plan. Arriving aircraft should close their flight plans by radio with Bellingham FSS, on 123.6 MHz or 122.3 MHz. If unable, pilots may call the Bellingham FSS at 734-6400 (local exchange) or 1-800-833-0310 upon arrival.

Canadian/U.S. rules require that all aircraft operating VFR must be on a VFR flight plan prior to crossing the Canadian/U.S. border. Airfiles are discouraged and pilots are requested to file their flight plans 1 hour in advance of proposed departure times.

Pilots departing the U.S. from the Bellingham area are reminded that significant differences exist between Canadian and U.S. rules and procedures. Canadian officials have requested all U.S. pilots be cognizant of the requirement that flight plans are mandatory while operating in Canadian airspace.

IFR TRAFFIC

Vancouver Area Control Center (ACC) is the controlling agency for IFR aircraft operating to/from the Bellingham International Airport. Due to the expected increase in the volume of traffic generated by Expo '86, some delays may be encountered for IFR arrival and departure traffic. The Vancouver ACC has requested that U.S. airmen not request VFR/IFR practice ILS Runway 16 approaches to the Bellingham International Airport during Expo '86.

IFR ARRIVALS BLI INTERNATIONAL

Be prepared to discontinue your approach based upon local traffic conditions and enter a VFR traffic pattern for landing sequence. Pilots arriving IFR are requested to be extremely vigilant as the instrument approaches serving the Bellingham International Airport enter an area of high traffic activity in the Abbotsford-Bellingham Flight Information area.

VFR FLIGHT

Aircraft landing in Vancouver, British Columbia, Canada, should be extremely alert while operating in the Vancouver Lower Mainland area. Numerous aerial demonstrations and other aviation related sport activities are planned for Expo '86. The majority of these events will take place in the Vancouver Harbour Central Zone. The following VFR egress/ingress routes are recommended for traffic operating to/from Canadian airspace:

Bellingham (BLI) to Abbotsford (YXX) northbound east of Lynden
Abbotsford (YXX) to Bellingham (BLI) southbound west of Lynden

BLI to Vancouver (YVR) via Interstate 5 (I-5) using right side separation east/west of the highway. Extreme caution should be taken in the vicinity of the Abbotsford Localizer.

U.S. Airmen desiring additional information on Canadian area airports, rules and regulations, and Custom services may request (in writing) an Air Tourist Information Guide which is available without charge from:

Transport Canada (EXPO Guide)
800 Burrard Street
P.O. Box 220
Vancouver, British Columbia, Canada V6Z2JB

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAM's ISSUED BY BOTH THE U.S. AND CANADA PRIOR TO CONDUCTING FLIGHT.

SPECIAL TRAFFIC MANAGEMENT PROGRAM
CAPE COD AND ADJACENT ISLAND AREA AIRPORTS
MAY 15 THROUGH OCTOBER 30, 1986

In anticipation of the large number of aircraft operating to and from the Cape Cod and adjacent Island areas during the period May 15 through October 30, the following procedures will be used to enhance safety and minimize air traffic delays.

****TRAFFIC MANAGEMENT PROGRAM****
CAPE COD AND ADJACENT ISLAND AREA

For the purpose of this Special Traffic Management Program, the Cape Cod and adjacent Island area includes the following airports:

Hyannis
  Barnstable Municipal-Boardman/Polando Field - HYA
Nantucket Memorial Airport - ACK
Martha's Vineyard Airport - MVY

****VFR ENROUTE AND HOLDING****

Pilots are urged to become familiar with VFR holding and reporting points (SEE GRAPHIC).

Arriving aircraft are encouraged to monitor ATIS, where available, and then contact the appropriate tower when 10-15 miles from the airport. Advise receipt of ATIS information on initial contact. Aircraft landing Martha's Vineyard are requested to monitor tower frequency far enough out to obtain and advise the tower on initial contact, "HAVE NUMBERS".

Aircraft enroute Hyannis Airport from Sagamore Bridge, Martha's Vineyard and Cotuit areas should exercise caution due to high density military traffic on IFR approach to runway 23, Otis Air National Guard Base.

Arrival Points	Arrival Direction	Holding Direction
HYANNIS AIRPORT		
Sandy Neck	North	North
Dennis Drive In	Northeast	Northeast
Sagamore Bridge	Northwest	Northwest
Cotuit	West	Southwest
Dennisport	East	Southeast
MARTHA'S VINEYARD AIRPORT		
Woods Hole	North	Northwest
Oak Bluffs	Northeast	East
Bounre Bridge	North	West
Cuttyhunk Island	West	Southwest
Katama Airpark	Southeast	South
NANTUCKET AIRPORT		
Great Point	North	East
Tuckernuck Island	West	Southwest

****IFR ARRIVAL/DEPARTURE****

Otis Terminal Radar Approach Control (TRACON) may assign a Control Departure Time (CDT) for IFR flights arriving or departing Hyannis, Nantucket or Martha's Vineyard Airports, whenever marginal VFR or IFR weather conditions exist.

Implementation of this part of the Special Traffic Management Program will be by special notice to flight service stations and area airport traffic control towers. Pilots may obtain current delay information during preflight and inflight briefings. During marginal weather conditions pilots are encouraged to contact the tower or flight service station, prior to engine start up, to obtain latest information.

To insure the success of this Special Traffic Management Program, aircraft departing Hyannis, New Bedford, Nantucket and Martha's Vineyard Airports are urged to depart within plus or minus 5 minutes of CDT. Departures from other airports should depart within 15 minutes before and not later than 5 minutes after CDT.

****FLIGHT PLANS****

Pilots are urged to file IFR flight plans at least 4 hours prior to proposed time of departure with the nearest flight service station.

Air filed flight plans may experience extensive delays awaiting integration into the IFR system while this program is in effect.

Commercial operators are requested to file flight plans for extra flight sections no less than 1 hour prior to proposed time of departure.

Pilots are encouraged to cancel VFR flight plans with Bridgeport Flight Service Station by radio. Transmit 122.1 mHz receive on appropriate VOR frequency. If unable to cancel by radio, contact appropriate flight service station by telephone.

LEGEND

🚩 VFR HOLDING / REPORTING POINTS

NOTE: CHART NOT TO SCALE AND IS NOT TO BE USED FOR NAVIGATION

T. F. Green State Airport, Warwick, R.I.

Closing certain runways and taxiways for installation of CAT II Lighting System.

Runway 5R-23L, Runway 10-28, Taxiway Alfa, Mike, Papa, Delta, Echo, and the portions of Sierra that is east of Runway 5L will be closed on September 2, 1986 at 6:00 a.m., and remain closed until 6:00 a.m., on October 2, 1986.

A portion of Runway 5R-23L from a point 200' south of the intersection with Taxiway Charlie to a point 200' north of the intersection with Taxiway Bravo will remain open for taxi purposes and use incidental to the operation of Runway 16-34.

The portions of Runway 10-28 that intersect Runway 16-34, Runway 5L-23R, Taxiway Bravo, Taxiway Foxtrot, will remain open for taxi purposes and use incidental to the operation of Runway 16-34 and Runway 5L-23R.

Runway 16-34 and the portion of Runway 5R-23L from a point 200' south of the intersection with Taxiway Charlie to a point 200' north of the intersection with Taxiway Bravo, will be closed from 12:00 midnight to 6:00 a.m., commencing September 17, 1986 through September 24, 1986, to allow fixture installation at the runway intersection.

HIGH ALTITUDE/EN ROUTE FLIGHT ADVISORY SERVICE (HA/EFAS)

HA/EFAS is an expansion of the current EFAS program (See AIM, paragraph 503). When fully implemented, it will provide a discrete frequency for each of the Air Route Traffic Control Center (ARTCC) areas for use by aircraft flying at altitudes of 18,000 feet and above within the center's area. The service expansion was initiated in July 1986 in the Salt Lake City ARTCC area on a frequency of 133.025 mHz.

As service in other areas becomes available the information will be published on charts located on the inside back cover of the Airport Facility Directories.

UNIVERSITY OF FLORIDA HOME FOOTBALL GAMES
SPECIAL TRAFFIC MANAGEMENT PROGRAM
GAINESVILLE, FLORIDA

In anticipation of the large number of aircraft operating to/from the Gainesville, Florida, area during the University of Florida home football games, special traffic management procedures will be used to enhance safety and minimize air traffic delays at Gainesville Regional Airport (GNV).

TRAFFIC MANAGEMENT PROGRAM

A Special Traffic Management Program will be in effect for IFR departures within the Jacksonville, Miami and Atlanta Center flight advisory areas. Jacksonville Center will assign a Controlled Departure Time (CDT) for unscheduled IFR flights arriving GNV, when this program is in effect. CDT's can be obtained from any flight service station when filing an IFR flight plan to GNV. This Special Traffic Management Program will be in effect:

Saturday	August 30	1400-2200 UTC
Saturday	September 6	1400-2200 UTC
Saturday	September 20	1230-1930 UTC
Saturday	October 4	1230-1930 UTC
Saturday	October 11	1230-1930 UTC
Saturday	November 1	1330-2030 UTC

Flight plans should be filed with the nearest flight service station (FSS) at least 4 hours prior to the proposed time of departure. Include the CDT in remarks section of the flight plan.

Except for emergency situations, Jacksonville Center will not accept IFR flight plans to Gainesville Regional Airport from airborne aircraft while this program is in effect. Airborne IFR flight plans filed with other facilities may experience extensive delays awaiting integration into the IFR system.

FLIGHT SERVICE STATION INFORMATION

VFR aircraft are encouraged to cancel/activate flight plans with Gainesville FSS when approaching/departing the city of Gainesville, or in person.

SUNBELT AGRICULTURAL EXPOSITION
SPECIAL TRAFFIC MANAGEMENT PROCEDURES
SPENCE AIRPORT
MOULTRIE, GEORGIA
OCTOBER 14 THROUGH 16, 1986

In anticipation of the large number of aircraft traveling to and from the Moultrie, Georgia, area during the Sunbelt Agricultural Exposition, the following procedures will be used to enhance safety and minimize air traffic delays.

CAUTION ADVISED: Aircraft operating from uncontrolled Moultrie, Georgia area airports.

****SPENCE TEMPORARY AIRPORT TRAFFIC CONTROL TOWER****

Spence temporary airport traffic control tower will operate daily, October 14 through 16, between the hours of 0800-1600 EDT (1300-2100 UTC).

FREQUENCIES

Local Control: 120.9 mHz Initial Contact
119.4 mHz Inside Airport Traffic Area

Ground Control: 121.7 mHz

****VALDOSTA APPROACH CONTROL****

Valdosta Approach Control will provide approach control services to aircraft arriving and departing Spence Airport (MUL). VFR radar advisories will be provided, workload permitting.

FREQUENCIES

124.6 mHz East of Valdosta
126.6 mHz West of Valdosta

****ALBANY (ABY) FLIGHT SERVICE STATION****

Flight planning and pre flight services will be provided by Albany Flight Service Station:

Phone Toll Free 1-800-342-6650.

Pilots are encouraged to file IFR/VFR flight plans at least four hours, but not less than one hour, prior to proposed time of departure with Albany Flight Service Station.

****VFR ARRIVALS****

The Bingham Lake arrival procedure (SEE GRAPHIC) should be used unless otherwise requested by Spence Tower.

Pilots are requested to contact Spence Tower 15 miles from the airport on 120.9 mHz. When over Bingham Lake monitor 119.4 mHz and report turning downwind.

All aircraft should enter the airport traffic area from over Bingham Lake. Unless requested by Spence Tower, make all traffic pattern entries on the downwind leg. Left traffic will be used for runway 14 and right traffic for runway 32.

Pilots are requested to fly a traffic pattern within close proximity of the airport boundary without jeopardizing safety.

****TRAFFIC PATTERN ALTITUDES****

Turbojet Aircraft 2,000 feet MSL
Propeller Aircraft 1,500 feet MSL

****VFR DEPARTURES****

Contact Ground Control on 121.7 mHz for taxi instructions.

When runway 32 is in use, departures will be instructed to taxi to the red barrels.

When runway 14 is in use departures will be instructed to taxi to the blue barrels.

****IFR ARRIVALS****

IFR arrivals are requested to discontinue IFR approach on final and enter the traffic pattern VFR, weather conditions permitting.

CAUTION ADVISED due to a large volume of aircraft with a wide variance of performance characteristics operating in the vicinity of Spence Airport.

****IFR DEPARTURES****

Contact Ground Control, 121.7 mHz, for IFR clearance. If IFR clearance has not been received prior to reaching the departure runway, taxi to a position that will allow other aircraft access to the departure runway.

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAMS AND ARRIVAL/DEPARTURE PROCEDURES PRIOR TO CONDUCTING FLIGHT.

ARRIVAL PROCEDURES

1. Contact Spence Tower on 120.9, 15 miles from the airport.
2. Change to 119.4 passing Lake Bingham and report turning downwind.
3. Left traffic to runway 14, right traffic to runway 32.
4. Turbojet aircraft enter the traffic pattern at 2000 feet; propeller aircraft enter the traffic pattern at 1500 feet.
5. After landing use overrun on south west side of runway to taxi.

"QUICK THRUST 1-87"

Effective 10/20/86 through 10/25/86, 1200-2200z daily extensive military air operations, both high and low speeds, will be conducted in an area bounded by the SAV, SSI, and DBN VORs, plus access corridors to and from offshore Warning Areas. These operations will consist of activities such as close air support, interdiction, air defense/counter air, electronic warfare, reconnisance, tactical airlift missions, and aerial refueling. It is estimated that approximately 120 aircraft will be utilized to conduct approximately 150-200 sorties a day.

The following areas will be used: R3005, R3007, Stewart MOAs B and C, and Quick Thrust MOAs E F G H I J L M and N.

Aircraft operations along V1 between RUBYS and STARY intersections, along V3-37 between HARPS intersection and SSI, along V437 between SAV and STARY, V362 between SSI and AMG, SAV to SSI will be affected.
Quick Thrust MOAs M and N between SAV, SSI, R3007, and W157 will be used at altitudes between 500AGL and 3000MSL and 11000MSL to 12000MSL. Other Quick Thrust area altitudes are from 100AGL to 14000MSL.

Real time exercise airspace status advisories can be obtained by contacting Savannah Approach Control, or Jacksonville Air Route Traffic Control Center.

AOPA CONVENTION

October 27 through November 2, 1986

A significant increase of aircraft activity is expected at Stinson Airport the week of the AOPA convention in San Antonio, Texas. The following flight information is provided to enhance safety and minimize air traffic delays.

SAN ANTONIO, TEXAS AREA

The following airports are in close proximity within San Antonio Terminal Approach Control airspace:

San Antonio International
Kelly AFB
Randolph AFB
Stinson Municipal

San Antonio Approach Control is the controlling agency for IFR aircraft operating to/from these airports. Some delays may be encountered by IFR arrivals/departures to Stinson Airport due to the anticipated increase of traffic.

VFR Arrival Procedures- - - - - - - - - - -

1. Prior to contacting Stinson Tower, close VFR flight plan with San Antonio FSS on 122.2

2. Monitor STINSON ATIS 132.05

3. Contact SAN ANTONIO APPROACH on 127.1 (northwest through east) or 125.1, for radar advisories.

4. Follow the applicable arrival route, as described below and depicted on the attached graphics.

ARRIVAL ROUTES--------------------

North through Northeast Arrivals--

From over the SAN MARCOS airport, fly magnetic course 190, 20 nautical miles to the town of SEGUIN. Maintain at or above 3,500 MSL due to concentrated T-38 jet traffic operating at the Randolph Air Force Base Auxillary airport and transiting the area between Randolph and Randolph Auxillary at 2,500 and 3,000.

Over Seguin, turn to fly magnetic course 220, 24 nautical miles to Calaveras Lake. Maintain at or above 3,500 MSL until crossing the extended centerline of Runway 14R/32L at Randolph AFB (or the RND VOR 145 Radial), then decend to 2,500 MSL or below to Calaveras Lake. Use caution for T-37 jet trainers transiting northwest and southeast bound between Randolph AFB and the Randolph MOA 1B.

At Calaveras Lake contact STINSON TOWER on 119.5 Fly the SMOKESTACK ARRIVAL (Runway 09) or continue either for the DOWNTOWN ARRIVAL or the VOR ARRIVAL (Runway 27).

East Arrivals--

Proceed to Seguin via Interstate Highway 10 at or above 3,500 MSL. Join the above routing and continue inbound.

Southeast through Southwest Arrivals--

Proceed directly to Calaveras Lake for the SMOKESTACK ARRIVAL (Runway 09) or to the Stinson VOR for the VOR ARRIVAL (Runway 27). Use caution for T-37 and T-38 jets transiting between Kelly and Randolph Air Force Bases, operating at and above 3,000 MSL 15-20 miles southeast of San Antonio.

Contact STINSON TOWER on 119.5 over Stinson VOR or Calaveras Lake.

Northwest through West Arrivals--

From over the KERRVILLE airport, fly magnetic course 145, 50 nautical miles to cross Interstate Highway 35, 10 miles southwest of Kelly Air Force Base. Turning eastbound, remain well south of Kelly and Mitchell Lake to either the Stinson VOR for the VOR ARRIVAL (Runway 27), or continue south of Braunig Lake to Calaveras Lake for the SMOKESTACK ARRIVAL (Runway 09).

Use caution for jet traffic departing Kelly Air Force Base from Runway 15, or on approach to Runway 33.

Contact STINSON TOWER on 119.5 at the Stinson VOR or Calaveras Lake.

AIRPORT ARRIVAL PROCEDURES- - - - - - - - - -

SMOKESTACK ARRIVAL (Runway 09 in use) - -

From the Calaveras Lake Smokestack, contact STINSON TOWER on 119.5 with the ATIS code. Fly heading 290 (use caution for TV Tower 1542 MSL northwest on lake) 6.1 nautical miles, decending to 1500 MSL.

At the northeast corner of Brooks Air Force Base (I-37 & S.E. Military Drive Cloverleaf), turn left, heading 270, to enter downwind for Runway 09. Traffic Pattern Altitude is 1400 MSL.

DOWNTOWN ARRIVAL (Runway 27 in use) - -

From Downtown San Antonio, contact STINSON TOWER on 119.5 with the ATIS code. From the Tower of the Americas, fly heading 180, 4.5 nautical miles, at or below 1900 MSL. Over the Twin Drive-In Theatres (2 mi nnw), turn left to enter downwind for Runway 27. Traffic Pattern Altitude is 1400 MSL.

VOR ARRIVAL (Runway 27 in use) - -

Over the Stinson VOR (SSF, 108.4), contact STINSON TOWER on 119.5 with the ATIS code. Fly outbound on the SSF 320 Radial, 4 nautical miles, decending to Traffic Pattern Altitude of 1400 MSL. Abeam the Tank Farm, turn right to enter downwind for Runway 27.

IFR Arrivals - - - - - - - - - -

Expect the VOR RWY 32 Approach, Circle-to-Land to Runway 09 or 27, or...

Request vectors for the "SMOKESTACK," DOWNTOWN," or "VOR" ARRIVAL, (as appropriate). Cancel IFR prior to the entry point and proceed VFR via the procedure.

CONFEDERATE AIR FORCE AIRSHO '86

HARLINGEN, TEXAS

OCTOBER 09 - 12, 1986

In anticipation of the large number of aircraft traveling to and from the Harlingen, Texas area during the Confederate Air Force Airsho, special Air Traffic procedures will be used to enhance safety and minimize air traffic delays at Rio Grande Valley International Airport. These procedures are in effect from October 09 - October 12, 1986.

The limited runway availability during this event, coupled with the expected large number of arriving and departing aircraft, may still lead to lengthy delays at Rio Grande Valley International Airport. Pilots are encouraged to use outlying airports with ground transportation as an alternative.

Aircraft not landing in the Harlingen area are requested to avoid overflight below 10,000 feet with-in a 15 mile radius of the Rio Grande Valley Airport.

All pilots are encouraged to monitor the ATIS for information on the status of operations in the Harlingen area. Pilots operating to Rio Grande Valley International Airport are expected to have the current ATIS information prior to contacting Harlingen Tower.

* * * RIO GRANDE VALLEY INTERNATIONAL AIRPORT CLOSING * * *

Rio Grande Valley International Airport will be closed to all aircraft except scheduled air carriers on the following dates and times:

Thursday October 09 & Friday October 10, 1986	1315 (L) to 1630 (L)
Saturday October 11 & Sunday October 12, 1986	1100 (L) to 1700 (L)

* * * HARLINGEN TOWER * * *

The radio call for Rio Grande Valley International Airport is "HARLINGEN TOWER".
Harlingen Tower will be in operation from 0630 to 2200 CDT Daily.

HARLINGEN FREQUENCIES:

Harlingen VOR/DME	108.8 / Ch. 25
Single & light twin ATIS	126.0
Heavy twin & Hi-performance ATIS	124.85
Harlingen Control Tower (WEST)	119.3
Harlingen Control Tower (EAST)	118.2
Harlingen Ground Control	121.7
Harlingen Clearance Delivery	120.2

* * * VFR ARRIVALS TO RIO GRANDE VALLEY INTERNATIONAL AIRPORT * * *

ALL VFR AIRCRAFT MUST USE THE AIRSHO '86 VFR ARRIVAL PROCEDURES (see graphic). Monitor the appropriate ATIS frequency within 30 miles of the airport. Instructions for contacting Harlingen Tower will be broadcast on the respective ATIS frequency.

* Single engine and light twin-engine aircraft monitor ATIS on 126.0 MHz for arrival information. Plan to cross the Harlingen VOR at your traffic pattern altitude of 1000 feet MSL. Proceed southeast to the checkered water tower located immediately west of the airport. Remaining at 1000 feet MSL, cross the middle portion of the airport and enter the appropriate downwind leg East of the airport. Do not descend until well established on the downwind leg.

* Heavy twin-engine and Hi-performance aircraft monitor ATIS on 124.85 MHz for arrival information. Plan to cross the Harlingen VOR at your traffic pattern altitude of 1500 feet MSL. Proceed southeast to the checkered water tower located immediately west of the airport. Remaining at 1500 feet MSL, enter the appropriate downwind leg on the WEST side of the airport. Do not descend until well established on the downwind leg.

AFTER INITIAL CONTACT WITH THE HARLINGEN AIR TRAFFIC FACILITY, DO NOT CONTACT THE CONTROLLERS BY RADIO UNLESS SPECIFICALLY REQUESTED TO DO SO.

IMPORTANT: REMAIN IN TRAIL - NO SIDE - BY - SIDE SEPARATION.

* * * VFR HOLDING * * *

If holding of VFR arrival traffic prior to the Harlingen VOR becomes necessary instructions will be issued on the arrival ATIS frequencies. Plan on a large holding pattern between the Harlingen VOR and the town of Raymondville. Make all turns to the right, maintain the appropriate altitude for your type aircraft (1000 or 1500) feet MSL and remain in VFR conditions. Holding will normally not exceed 10 minutes. Adherence to this procedure will enhance your safety and prevent aircraft from "bunching" at the Harlingen VOR during holding periods.

* * * AFTER LANDING AT RIO GRANDE VALLEY INTERNATIONAL AIRPORT * * *

AFTER LANDING, EXIT THE RUNWAY AS SOON AS POSSIBLE. EXPEDITIOUS CLEARING OF THE RUNWAY IS REQUESTED AS THERE IS A CONTINUOUS FLOW OF TRAFFIC BEHIND YOU. Pilots are expected to provide their own tie-downs. The Airport Management advises that all operations and tie-downs will be at your own risk and the airport will not be responsible for damage to aircraft. Security of the aircraft is the responsibility of the owner and the airport operator will not be responsible for lost or stolen aircraft equipment.

* * * VFR DEPARTURE PROCEDURES AFTER AIRSHOWS * * *

Monitor the departure ATIS on the appropriate frequency (126.0 EAST side - 124.85 WEST side) for current information prior to starting your engine(s). All Pilots are REQUIRED to RECEIVE A TAXI CLEARANCE FROM GROUND CONTROL PRIOR TO MOVING THEIR AIRCRAFT. NO PERMISSION TO TAXI WILL BE GRANTED PRIOR TO THE END OF THE AIRSHOW.

CONFEDERATE AIR FORCE and VINTAGE AIRCRAFT are requested to remain on the ground for at least an hour after the AIRSHO is over to allow TRANSIENT aircraft time to arrive or depart the Harlingen area.

Blanket instructions to aircraft may be issued on ground control frequency 121.7 MHz. While taxiing, monitor the tower frequency (119.3) for further instructions. Remain in line and taxi to the runway, Call the Tower when you are in the number one position for departure. DO NOT ENTER THE RUNWAY UNTIL THE TOWER SPECIFICALLY CLEARS YOU TO DO SO. WHEN EXITING THE AIRPORT TRAFFIC AREA, follow the control tower instructions and be especially vigilant for aircraft operating to and from the satellite airports.

* * * * IFR FLIGHT * * * *

The anticipated demand of IFR aircraft does not indicate a need for any special flow control procedures. However, if traffic conditions warrant, a flow management program to balance the arrival and departure flow of IFR aircraft will be implemented. Both IFR arrivals and IFR departures may experience considerable delay. Aircraft wishing to operate IFR may find it more expeditious to arrive and depart the Harlingen area VFR.

IFR AIR FILED FLIGHT PLANS WILL NOT BE ACCEPTED BY BROWNSVILLE APPROACH CONTROL, McALLEN APPROACH CONTROL, OR HOUSTON CENTER. PILOTS MUST FILE A FLIGHT PLAN THROUGH THE APPROPRIATE FSS. (San Antonio FSS Telephone 1-800-292-5493 or Frequency 122.35 MHz)....(McAllen FSS Telephone Area Code 512-682-2878 or Frequency 122.2 MHz).

.* * * NO RADIO AIRCRAFT * * *

AIRCRAFT NOT EQUIPPED WITH A FUNCTIONING TWO-WAY RADIO WILL NOT BE PREMITTED.

WAKE TURBULENCE ADVISORY

Due to the number of large civil and military aircraft operations in the vicinity of Rio Grande Valley International Airport, pilots, should be aware that a significant amount of wake turbulence may exist. Pilots are urged to exercise extreme caution when operating within 30 miles of Harlingen.

PILOTS ARE URGED TO REVIEW ALL APPLICABLE NOTAMS AND ARRIVAL -

DEPARTURE PROCEDURES PRIOR TO CONDUCTING FLIGHT.

Flight Service Stations	Commissionings, Decommissionings, Hours of Operation; Commissionings, Decommissionings of RCO; Changes in Monitoring Status of RCO; Outages of RCO (with Effective Dates).
Weather	AWOS (System and Frequency).

FOREWORD

The primary references for changes to the National Airspace System (NAS) are Aeronautical Charts and Airport/Facility Directories (A/FD) published for the affected area(s). Ideally, most changes to the NAS that meet NOTAM criteria are known sufficiently in advance to allow publication in these publications. When this cannot be done, changes are carried in the Notices to Airman Class II publication, or as a last resort, on the Service A telecommunications system as a NOTAM D item.

NOTAM D information printed in this publication will not be included on the Service A system and will not be provided during pilot briefings unless specifically requested by the pilot.

National Flight Data Center (FDC) NOTAMs primarily reflect changes to Standard Instrument Approach Procedures (SIAPs), Flight Restrictions, and aeronautical chart revisions. The last FDC NOTAM included in this issue is indicated by number and date above. This information insures that subsequent FDC NOTAMs, issued after the cutoff date, can be identified.

The Class II publication contains information of a temporary nature, which is expected to remain for an extended period. This temporary information is carried until it expires or is cancelled. Data of a permanent nature is sometimes carried in the Class II publication as an interim step prior to publication on the appropriate charts or in the A/FD.

The Class II publication is issued every 14 days. The A/FD is published every 56 days. Data in the Class II publication that is current on the effective date of the next A/FD will be transferred to the A/FD and removed from the Class II publication.

Facilities are responsible for forwarding data to the National Flight Data Center (NFDC). Data, still current for the next available Class II publication date, will be published.

This publication is divided into two sections:

1. Section One contains information divided into four categories:

   a. GENERAL

   b. AIRWAYS

   c. FLIGHT RESTRICTIONS

   d. AIRPORTS / FACILITIES / PROCEDURAL NOTAMS

The first subsection is listed in descending FDC NOTAM numerical order. The second and third subsections are listed by state. The fourth subsection is ordered by state, city, and airport name.

2. The second section contains special notices that are too long or that concern a wide or unspecified geographical area (which may overlap several states) and are not suitable for inclusion in the first section.

The content of these notices vary widely and are included because of their significant impact on flight safety.

NOTES

1. All times are indicated as UTC or local. During periods of Daylight Savings Time, effective hours in local time will be one hour earlier than shown. All states observe Daylight Savings Time except Arizona, that portion of Indiana in the Eastern Time Zone, Puerto Rico, and the Virgin Islands.

2. (¦) Vertical line items indicate new information.

FDC NOTAM LEGEND

Code	Explanation
5/103	Accountability number assigned to the message originator.
FI/T	Flight information of a temporary nature.
FI/P	Flight information of a permanent nature.

GENERAL

FDC 6/2748 FI/T CORRECTION TO PACIFIC CHART SUPPLEMENT AMENDMENT NOTICE EFFECTIVE 25 SEP 1986 TO 23 OCT 1986. MAG VARIATION FOR HONOLULU /HNL/ VORTAC SHOULD READ ELEVEN EAST /11E/..AMENDMENT ISSUED IN ERROR.

FDC 6/2036 FI/P CORRECT U.S. SECTIONAL CHART FOR SEATTLE. 31ST EDITION, DTD 3 JUL 86. CHANGE BAKER FSS /BKE/FREQ 122.4 TO FREQ 122.2.

FDC 6/1601 FI/P HI CORRECT U.S. SECTIONAL CHART HAWAIIAN ISLANDS 34TH EDITION DATED 5 JUN 86.. CHANGE BRADSHAW NDB IDENT /BSF/FREQ 349 TO FREQ 339.

FDC 6/995 U.S. CUSTOMS REGULATORY CHANGES. AIRCRAFT PENETRATING THE INNER ADIZ FM ANYWHERE IN THE WESTERN HEMISPHERE SOUTH OF THE U.S. MEXICAN BORDER, SOUTH OF 33 DEG NORTH LATITUDE ON THE PACIFIC COAST, SOUTH OF 30 DEGREES NORTH LATITUDE ON THE ATLANTIC COAST, OR SOUTH OF THE INNER ADIZ ON THE GULF COAST, MUST PROVIDE U.S. CUSTOMS AT LEAST ONE HOUR ADVANCE NOTICE OF PENETRATION OF U.S. AIRSPACE, EFFECTIVE APRIL 30. THIS REQUIREMENT WILL BE EXTENDED TO AIRCRAFT THAT HAVE NOT LANDED IN A FOREIGN PLACE AND AIRCRAFT FROM PUERTO RICO THAT ARE NOT FLYING UNDER IFR FLIGHT RULES. FILING A FLIGHT PLAN WITH THE NOTATION 'ADCUS' WITH THE U.S. FAA AT LEAST ONE HOUR IN ADVANCE OF PENETRATION OF THE ADIZ WILL SATISFY THIS REQUIREMENT. CONTRACTING U.S. CUSTOMS AT 305-536-6591, MIAMI, FL. OR 714-351-6674, RIVERSIDE, CA, AT LEAST ONE HOUR IN ADVANCE WILL ALSO MEET THE REQUIREMENT. LANDING AND INSPECTION REQUIREMENTS FOR AIRCRAFT ARRIVING FROM FOREIGN PLACES REMAIN UNCHANGED.

FDC 6/201 FI/P CORRECT U.S. GOVT WORLD AERONAUTICAL CHART CG21, 16TH EDITION DTD OCT 24, 1985. CHANGED HARRIS VORTAC /HRS/ FREQ 111.6 CHANNEL 053 TO FREQ 109.8 CHANNEL 035.

FDC 5/2608 AUTOMATED VOICE AIRPORT RESERVATION SYSTEM../AVARS/. IN ORDER TO IMPROVE THE AVARS CAPACITY THE FAA HAS INSTALLED TWO ADDITIONAL NON-TOLL FREE NUMBERS..617-275-4837/8. EFFECTIVE NOVEMBER 1 1985 TWO ADDITIONAL TOLL FREE LINES WILL BE AVAILABLE TO BE PART OF 1-800-FAA-1212 NUMBER. FAA PLANS TO CONTINUE THE DUAL /ARO/SYSTEM USING THE AUTOMATED SYSTEM ON 1-800-FAA-1212 AND THE MANUAL ARO SYSTEM WITH NEW YORK 718-632-7806/ CHICAGO 312-263-2575 AND WASHINGTON DC 202-426-9347 UNTIL FURTHER NOTICE. IN AREAS WHERE TOUCH TONE PHONE SYSTEMS ARE NOT AVAILABLE USERS MAY EITHER CONTACT THE NEAREST FAA FLIGHT SERVICE STATION OR THE /ARO/ AT THE NUMBERS LISTED ABOVE AND REQUEST A RESERVATION. USERS DEPARTING A TRANS-ATLANTIC AIRPORT FOR ARRIVAL TO A HIGH DENSITY AIRPORT SHOULD CONTINUE TO USE THE PROCEDURES OUTLINED IN ADVISORY CIRCULAR AC 90-43F PARA 5 DATED APRIL 22 1985 WHICH STATES CONTACT THE NEAREST FLIGHT SERVICE STATION.

FDC 5/694 AIRPORT RESERVATION OFFICE/ARO/ OPERATIONS.. EFF APR 1, 1985..THE FOLLOWING GUIDELINES SHALL BE IN EFFECT.. /ARO/WILL ACCEPT RSVNS FOR WASHINGTON NATIONAL AIRPORT /DCA, JOHN F. KENNEDY INTL ARPT /JFK, LA GUARDIA ARPT/LGA, AND CHICAGO O HARE INTL ARPT /ORD BEGINNING 48 HRS PRIOR TO THE PROPOSED TIME OF OPERATION AT THE AFFECTED ARPT. E.G REQ FOR 11 A.M. OPERATION ON THURSDAY WILL BE ACCEPTED STARTING 11 A.M. ON THE PRECEDING TUESDAY. AN EXCEPTION TO THE 48 HR LIMITATION IS MADE FOR WEEKENDS TO RECOGNIZE NORMAL BUSINESS HOURS. A RSVN REQ FOR AN IFR OPERATION ON MONDAY WILL BE ACCEPTED ON THE PREVIOUS THURSDAY STARTING AT THE PROPOSED HR OF OPERATION. REQUESTS FOR IFR OPERATION ON TUESDAY WILL BE ACCEPTED ON THE PREVIOUS FRIDAY STARTING AT THE PROPOSED HR OF OPERATION. E.G. REQ FOR 11 A.M. RSVN ON TUESDAY WOULD BE ACCEPTED BEGINNING 11 A.M. ON FRIDAY. IF THE PREVIOUS FRIDAY IS AN OBSERVED HOLIDAY THE PROCEDURE WILL BE IN EFFECT ON THURSDAY. A MAXIMUM OF TWO RSVNS PER PHONE CALL WILL BE ACCEPTED. E.G. A PILOT MAY REQ A RSVN FOR ARRIVAL AND DEPARTURE DURING THE SAME PHONE CALL PROVIDING BOTH FALL ON THE SAME CALENDAR DAY. E.G. A RSVN REQ FOR 11 A.M. ARRIVAL ON FRIDAY AND 4 P.M. DEPARTURE ON THE SAME DAY MAY BE MADE BEGINNING AT 11 A.M. ON WEDNESDAY.

HAZARDOUS INFLIGHT WEATHER ADVISORY SERVICE (HIWAS)

HIWAS is a national program for broadcasting hazardous weather information (SIGMET's, convective SIGMET's, Center Weather Advisories (CWA), AIRMET's, and urgent PIREP's) on a continuous basis over selected VOR's. The program is operational in the Jacksonville, Miami, and Houston Air Route Traffic Control Center (ARTCC) areas. The chart on the following page identifies the current broadcast outlet locations and frequencies. Frequencies shown in the Atlanta ARTCC area are for planning purposes only. HIWAS will be expanded on an ARTCC by ARTCC basis.

Pilots should be aware that:

* Flight service stations broadcast information on hazardous weather not yet covered by an advisory and make an announcement on their frequencies that new HIWAS information is available.

* Controllers in ARTCC's and air traffic control terminals announce updates to HIWAS information on all appropriate frequencies.

* Controllers and specialists will not routinely broadcast SIGMET's, convective SIGMET's, CWA's, AIRMET's, and urgent PIREP's in the commissioned HIWAS areas.

User comments regarding the effectiveness of the HIWAS program and any proposed revision to HIWAS procedures are solicited.

Mail comments to:

Department of Transportation
Federal Aviation Administration
ATTN: ATO-360
800 Independence Ave. S.W.
Washington, DC 20591

Note: For further information on the HIWAS program, refer to the Airman's Information Manual (AIM) and Airport/Facility Directory (AFD). Operational sites are published in the AFD under radio aids to navigation.

AIRPORT RADAR SERVICE AREAS (ARSA)

The National Airspace Review Terminal Airspace Task Group 1-2.2 recommended the ARSA Program as a replacement for the existing Terminal Radar Service Area Program and the FAA has adopted that recommendation. ARSA designations have been made, and effective dates established, for the locations listed below. The following is a summary of the pilot requirements and the ATC procedures for ARSA's. Graphic depictions of each ARSA are also included.

Unless otherwise authorized or required by ATC, the following provisions apply to aircraft operating within an ARSA:

1. Aircraft approaching that would penetrate the ARSA must establish two-way radio communications with ATC prior to entering the ARSA and maintain that communication while operating within the ARSA.
2. Aircraft departing the primary airport within the ARSA must establish two-way communications with ATC prior to departure and maintain that communication while operating within the ARSA. Aircraft departing a satellite airport within the ARSA must contact ATC as soon as practicable after takeoff.
3. Except in an emergency, all operations must be in compliance with ATC clearances and instructions.
4. All arrivals and departures within the ARSA must be in compliance with FAA arrival and departure traffic patterns.
5. Ultralight vehicles and parachute operations may not be conducted within the ARSA except under the terms of an ATC authorization.
6. NOTAM's pertaining to flight within the ARSA must be reviewed as a part of preflight action required by FAR 91.5.

Within ARSA's, ATC will provide the following services:

1. Radar sequencing of all arrivals.
2. Standard separation between all instrument flight rules (IFR) flights.
3. Traffic advisories and safety advisories to all aircraft.
4. Resolve any potential conflict between an aircraft operating IFR and an aircraft operating under visual flight rules by application of conflict resolution procedures.

ARSA's have been designated at the following locations to be effective June 5, 1986.

Albuquerque International Airport, NM
Greater Cincinnati International Airport, KY
Indianapolis International Airport, IN
Phoenix Sky Harbor International Airport, AZ
Tucson International Airport, AZ
Davis-Monthan Air Force Base, AZ
Wichita Mid-Continent Airport, KS

An ARSA has been designated at the following airport to be effective July 3, 1986.

Dallas Love Field, Texas

An ARSA has been designated at the following airport to be effective July 31, 1986.

Lafayette Regional Airport, LA

ARSA's have been designated at the following locations to be effective on August 28, 1986.

Raleigh-Durham, NC

Dulles International Airport, Washington, DC

TERMINAL AREA GRAPHIC NOTICE
(NOT TO BE USED FOR NAVIGATION)

SOUTH LAKE TAHOE, CALIFORNIA
LAKE TAHOE AIRPORT

The Lake Tahoe Airport is closed to aircraft registering 77.1 or more decibles (as listed in FAA AC36-3 series) from 2000-0800 hours local time.

ARRIVAL PROCEDURES:

CAUTION: NORMALLY ASPIRATED PISTON ENGINES SHOULD BE LEANED TO PROVIDE A BEST-POWER MIXTURE DURING THE LANDING. DUE TO THE POSSIBILITY OF AN ABORTED APPROACH, PILOTS OF SUPERCHARGED AIRCRAFT SHOULD USE CAUTION WITH THEIR MIXTURE DUE TO FOULING OF THE SPARKPLUGS AT LOW POWER AND RICH MIXTURE.

RUNWAY 36: When arriving from the northwest through the east, enter the pattern on a wide right downwind, or as directed by the Tower.

When arriving from the southeast through the southwest, the Tower will normally direct you straight-in. If that is not practicable, request an over-flight for right traffic. Make your over-flight at or above 8000' MSL, and descend to pattern altitude on crosswind.

When arriving from the west, the Tower may direct you to cross over the field (mid-field crosswind) for right traffic.

High performance aircraft: Tower will normally assign a left downwind, fly base leg between the river and the ridge or as directed by Tower.

NOTE: CAUTION IS ADVISED DUE TO POSSIBLE DOWNDRAFTS, PARTICULARLY ON SHORT FINAL AND WHEN NORTHERLY WINDS EXCEED 15 KNOTS.

RUNWAY 18: When arriving from the northwest through the east, Tower may direct you to make a straight in. Descend north of the shoreline to cross the shoreline over the meadow, slightly west of "straight in", and at or above 7500' MSL.

When arriving from the southeast through the southwest, Tower will usually direct you to a wide left down-wind entry. If arriving from southwest to remain as far south as feasible until crossing the extended centerline.

Caution is advised due to possible traffic climbing out and/or circling the golf course to gain altitude.

When arriving from the west, Tower normally will advise you to make a straight in. Make your "base" leg north of the shoreline, and turn final at or above 7500' MSL.

CAUTION: ROTOR ACTIVITY (UP AND DOWN-DRAFTS) OFTEN EXISTS THROUGHOUT THE BASIN AND ESPECIALLY ON THE FINAL APPROACH WHEN SOUTHERLY WINDS EXIST. IF PRACTICABLE, MAKE YOUR AIM-POINT APPROXIMATELY ONE-THIRD OF THE WAY DOWN FROM THE RUNWAY (NEAR TAXIWAY "E"). OVER 5000' OF RUNWAY REMAINS FROM THAT POINT.

PATTERN ALTITUDES:

Small aircraft - 7500' MSL (1236' above the airport)
Large aircraft - 8000' MSL (1736' above the airport)

DEPARTURE PROCEDURES:

CAUTION: DENSITY ALTITUDE CAN AND DOES EXCEED 10,000'. PLEASE COMPUTE YOUR PERFORMANCE FACTORS ACCORDINGLY, USE DENSITY ALTITUDE LEANING TECHNIQUES APPROPRIATE TO YOUR AIRCRAFT PRIOR TO TAKEOFF AND ENSURE THAT YOUR WEIGHT AND BALANCE IS WELL WITHIN LIMITATIONS. (Suggestion: Reduce your useful load by at least 2.5% for each 1000' of density altitude, particularly in normally aspirated aircraft.)

NOTE: WE LIVE IN A VERY NOISE-SENSITIVE AREA. PLEASE HELP US BY CLIMBING AT YOUR BEST RATE OF CLIMB SPEED (Vy), AND BY REDUCING TO YOUR CLIMB-POWER SETTING AS SOON AS YOU FEEL IT IS PRACTICABLE.

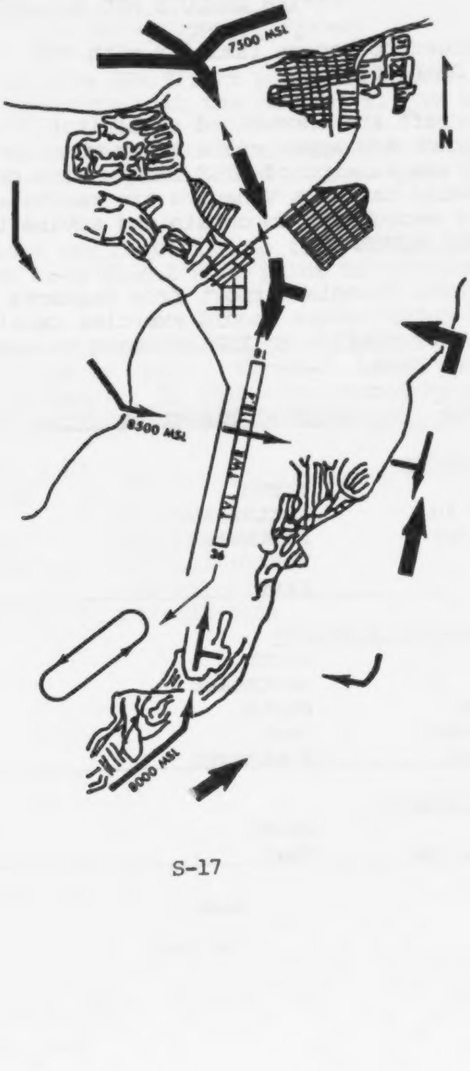
RUNWAY 36: Follow the extended centerline approximately 3/4 mile. At that point you will be abeam a white-fenced pasture and over a large red arrow. Make a slight left turn (to approximately 320 degrees) and follow the meadow to the shoreline. Once you have crossed the shoreline, and are above 7500' MSL turn to your departure heading.

NOTE: Aircraft remaining in closed traffic may make a normal traffic pattern.

RUNWAY 18:

CAUTION: **ALL TERRAIN SOUTH OF THE AIRPORT IS ABOVE THE AIRPORT ELEVATION. DOWNDRAFTS IN EXCESS OF 500FPM OFTEN EXIST THROUGHOUT THE DEPARTURE AREA. CHECK YOUR CLIMB GRADIENT AND OTHER PERFORMANCE FIGURES ACCORDINGLY.**

After clearing the airport boundary, make a slight right turn to follow the river. If making a downwind departure, do not turn crosswind until reaching 7500' MSL, make a wide downwind turn. If you need additional altitude, advise the Tower you will be climbing over the golf course. Use a right-turn climbing pattern, watch out for other traffic, and advise the Tower when you depart the golf course. Downdrafts often exist near the mountains - stay over the golf course.



SPECIAL TRAFFIC MANAGEMENT PROGRAM
CAPE COD AND ADJACENT ISLAND AREA AIRPORTS
MAY 15 THROUGH OCTOBER 30, 1986

In anticipation of the large number of aircraft operating to and from the Cape Cod and adjacent Island areas during the period May 15 through October 30, the following procedures will be used to enhance safety and minimize air traffic delays.

****TRAFFIC MANAGEMENT PROGRAM****
CAPE COD AND ADJACENT ISLAND AREA

For the purpose of this Special Traffic Management Program, the Cape Cod and adjacent Island area includes the following airports:

Hyannis Barnstable Municipal-Boardman/Polando Field	- HYA
Nantucket Memorial Airport	- ACK
Martha's Vineyard Airport	- MVY

****VFR ENROUTE AND HOLDING****

Pilots are urged to become familiar with VFR holding and reporting points (SEE GRAPHIC).

Arriving aircraft are encouraged to monitor ATIS, where available, and then contact the appropriate tower when 10-15 miles from the airport. Advise receipt of ATIS information on initial contact. Aircraft landing Martha's Vineyard are requested to monitor tower frequency far enough out to obtain and advise the tower on initial contact, "HAVE NUMBERS".

Aircraft enroute Hyannis Airport from Sagamore Bridge, Martha's Vineyard and Cotuit areas should exercise caution due to high density military traffic on IFR approach to runway 23, Otis Air National Guard Base.

Arrival Points	Arrival Direction	Holding Direction
HYANNIS AIRPORT		
Sandy Neck	North	North
Dennis Drive In	Northeast	Northeast
Sagamore Bridge	Northwest	Northwest
Cotuit	West	Southwest
Dennisport	East	Southeast
MARTHA'S VINEYARD AIRPORT		
Woods Hole	North	Northwest
Oak Bluffs	Northeast	East
Bounre Bridge	North	West
Cuttyhunk Island	West	Southwest
Katama Airpark	Southeast	South
NANTUCKET AIRPORT		
Great Point	North	East
Tuckernuck Island	West	Southwest

****IFR ARRIVAL/DEPARTURE****

Otis Terminal Radar Approach Control (TRACON) may assign a Control Departure Time (CDT) for IFR flights arriving or departing Hyannis, Nantucket or Martha's Vineyard Airports, whenever marginal VFR or IFR weather conditions exist.

Implementation of this part of the Special Traffic Management Program will be by special notice to flight service stations and area airport traffic control towers. Pilots may obtain current delay information during preflight and inflight briefings. During marginal weather conditions pilots are encouraged to contact the tower or flight service station, prior to engine start up, to obtain latest information.

To insure the success of this Special Traffic Management Program, aircraft departing Hyannis, New Bedford, Nantucket and Martha's Vineyard Airports are urged to depart within plus or minus 5 minutes of CDT. Departures from other airports should depart within 15 minutes before and not later than 5 minutes after CDT.

****FLIGHT PLANS****

Pilots are urged to file IFR flight plans at least 4 hours prior to proposed time of departure with the nearest flight service station.

Air filed flight plans may experience extensive delays awaiting integration into the IFR system while this program is in effect.

Commercial operators are requested to file flight plans for extra flight sections no less than 1 hour prior to proposed time of departure.

Pilots are encouraged to cancel VFR flight plans with Bridgeport Flight Service Station by radio. Transmit 122.1 mHz receive on appropriate VOR frequency. If unable to cancel by radio, contact appropriate flight service station by telephone.

VFR HOLDING/REPORTING POINTS

NOTE: CHART NOT TO SCALE AND IS NOT TO BE USED FOR NAVIGATION

T. F. Green State Airport, Warwick, R.I.

Closing certain runways and taxiways for installation of CAT II Lighting System.

Runway 5R-23L, Runway 10-28, Taxiway Alfa, Mike, Papa, Delta, Echo, and the portions of Sierra that is east of Runway 5L will be closed on September 2, 1986 at 6:00 a.m., and remain closed until 6:00 a.m., on October 2, 1986.

A portion of Runway 5R-23L from a point 200' south of the intersection with Taxiway Charlie to a point 200' north of the intersection with Taxiway Bravo will remain open for taxi purposes and use incidental to the operation of Runway 16-34.

The portions of Runway 10-28 that intersect Runway 16-34, Runway 5L-23R, Taxiway Bravo, Taxiway Foxtrot, will remain open for taxi purposes and use incidental to the operation of Runway 16-34 and Runway 5L-23R.

Runway 16-34 and the portion of Runway 5R-23L from a point 200' south of the intersection with Taxiway Charlie to a point 200' north of the intersection with Taxiway Bravo, will be closed from 12:00 midnight to 6:00 a.m., commencing September 17, 1986 through September 24, 1986, to allow fixture installation at the runway intersection.

HIGH ALTITUDE/EN ROUTE FLIGHT ADVISORY SERVICE (HA/EFAS)

HA/EFAS is an expansion of the current EFAS program (See AIM, paragraph 503). When fully implemented, it will provide a discrete frequency for each of the Air Route Traffic Control Center (ARTCC) areas for use by aircraft flying at altitudes of 18,000 feet and above within the center's area. The service expansion was initiated in July 1986 in the Salt Lake City ARTCC area on a frequency of 133.025 mHz.

As service in other areas becomes available the information will be published on charts located on the inside back cover of the Airport Facility Directories.

UNIVERSITY OF FLORIDA HOME FOOTBALL GAMES
SPECIAL TRAFFIC MANAGEMENT PROGRAM
GAINESVILLE, FLORIDA

In anticipation of the large number of aircraft operating to/from the Gainesville, Florida, area during the University of Florida home football games, special traffic management procedures will be used to enhance safety and minimize air traffic delays at Gainesville Regional Airport (GNV).

TRAFFIC MANAGEMENT PROGRAM

A Special Traffic Management Program will be in effect for IFR departures within the Jacksonville, Miami and Atlanta Center flight advisory areas. Jacksonville Center will assign a Controlled Departure Time (CDT) for unscheduled IFR flights arriving GNV, when this program is in effect. CDT's can be obtained from any flight service station when filing an IFR flight plan to GNV. This Special Traffic Management Program will be in effect:

Saturday	August 30	1400-2200 UTC
Saturday	September 6	1400-2200 UTC
Saturday	September 20	1230-1930 UTC
Saturday	October 4	1230-1930 UTC
Saturday	October 11	1230-1930 UTC
Saturday	November 1	1330-2030 UTC

Flight plans should be filed with the nearest flight service station (FSS) at least 4 hours prior to the proposed time of departure. Include the CDT in remarks section of the flight plan.

Except for emergency situations, Jacksonville Center will not accept IFR flight plans to Gainesville Regional Airport from airborne aircraft while this program is in effect. Airborne IFR flight plans filed with other facilities may experience extensive delays awaiting integration into the IFR system.

FLIGHT SERVICE STATION INFORMATION

VFR aircraft are encouraged to cancel/activate flight plans with Gainesville FSS when approaching/departing the city of Gainesville, or in person.

HEMINGWAY TEMPORARY MOAs

OCT 7-9 and OCT 28-30 1986

"QUICK THRUST 1-87"

Effective 10/20/86 through 10/25/86, 1200-2200z daily extensive military air operations, both high and low speeds, will be conducted in an area bounded by the SAV, SSI, and DBN VORs, plus access corridors to and from offshore Warning Areas. These operations will consist of activities such as close air support, interdiction, air defense/counter air, electronic warfare, reconnisance, tactical airlift missions, and aerial refueling. It is estimated that approximately 120 aircraft will be utilized to conduct approximately 150-200 sorties a day.

The following areas will be used: R3005, R3007, Stewart MOAs B and C, and Quick Thrust MOAs E F G H I J L M and N.

Aircraft operations along V1 between RUBYS and STARY intersections, along V3-37 between HARPS intersection and SSI, along V437 between SAV and STARY, V362 between SSI and AMG, SAV to SSI will be affected.
Quick Thrust MOAs M and N between SAV, SSI, R3007, and W157 will be used at altitudes between 500AGL and 3000MSL and 11000MSL to 12000MSL. Other Quick Thrust area altitudes are from 100AGL to 14000MSL.

Real time exercise airspace status advisories can be obtained by contacting Savannah Approach Control, or Jacksonville Air Route Traffic Control Center.

AOPA CONVENTION

October 27 through November 2, 1986

A significant increase of aircraft activity is expected at Stinson Airport the week of the AOPA convention in San Antonio, Texas. The following flight information is provided to enhance safety and minimize air traffic delays.

SAN ANTONIO, TEXAS AREA

The following airports are in close proximity within San Antonio Terminal Approach Control airspace:

San Antonio International
Kelly AFB
Randolph AFB
Stinson Municipal

San Antonio Approach Control is the controlling agency for IFR aircraft operating to/from these airports. Some delays may be encountered by IFR arrivals/departures to Stinson Airport due to the anticipated increase of traffic.

VFR Arrival Procedures- - - - - - - - - -

1. Prior to contacting Stinson Tower, close VFR flight plan with San Antonio FSS on 122.2
2. Monitor STINSON ATIS 132.05
3. Contact SAN ANTONIO APPROACH on 127.1 (northwest through east) or 125.1, for radar advisories.
4. Follow the applicable arrival route, as described below and depicted on the attached graphics.

ARRIVAL ROUTES--------------------

North through Northeast Arrivals--

From over the SAN MARCOS airport, fly magnetic course 190, 20 nautical miles to the town of SEGUIN. Maintain at or above 3,500 MSL due to concentrated T-38 jet traffic operating at the Randolph Air Force Base Auxillary airport and transiting the area between Randolph and Randolph Auxillary at 2,500 and 3,000.

Over Seguin, turn to fly magnetic course 220, 24 nautical miles to Calaveras Lake. Maintain at or above 3,500 MSL until crossing the extended centerline of Runway 14R/32L at Randolph AFB (or the RND VOR 145 Radial), then decend to 2,500 MSL or below to Calaveras Lake. Use caution for T-37 jet trainers transiting northwest and southeast bound between Randolph AFB and the Randolph MOA 1B.

At Calaveras Lake contact STINSON TOWER on 119.5 Fly the SMOKESTACK ARRIVAL (Runway 09) or continue either for the DOWNTOWN ARRIVAL or the VOR ARRIVAL (Runway 27).

East Arrivals--

Proceed to Seguin via Interstate Highway 10 at or above 3,500 MSL. Join the above routing and continue inbound.

Southeast through Southwest Arrivals--

Proceed directly to Calaveras Lake for the SMOKESTACK ARRIVAL (Runway 09) or to the Stinson VOR for the VOR ARRIVAL (Runway 27). Use caution for T-37 and T-38 jets transiting between Kelly and Randolph Air Force Bases, operating at and above 3,000 MSL 15-20 miles southeast of San Antonio.

Contact STINSON TOWER on 119.5 over Stinson VOR or Calaveras Lake.

Northwest through West Arrivals--

From over the KERRVILLE airport, fly magnetic course 145, 50 nautical miles to cross Interstate Highway 35, 10 miles southwest of Kelly Air Force Base. Turning eastbound, remain well south of Kelly and Mitchell Lake to either the Stinson VOR for the VOR ARRIVAL (Runway 27), or continue south of Braunig Lake to Calaveras Lake for the SMOKESTACK ARRIVAL (Runway 09).

Use caution for jet traffic departing Kelly Air Force Base from Runway 15, or on approach to Runway 33.

Contact STINSON TOWER on 119.5 at the Stinson VOR or Calaveras Lake.

AIRPORT ARRIVAL PROCEDURES- - - - - - - - - -

SMOKESTACK ARRIVAL (Runway 09 in use) - -

From the Calaveras Lake Smokestack, contact STINSON TOWER on 119.5 with the ATIS code. Fly heading 290 (use caution for TV Tower 1542 MSL northwest on lake) 6.1 nautical miles, decending to 1500 MSL.

At the northeast corner of Brooks Air Force Base (I-37 & S.E. Military Drive Cloverleaf), turn left, heading 270, to enter downwind for Runway 09. Traffic Pattern Altitude is 1400 MSL.

DOWNTOWN ARRIVAL (Runway 27 in use) - -

From Downtown San Antonio, contact STINSON TOWER on 119.5 with the ATIS code. From the Tower of the Americas, fly heading 180, 4.5 nautical miles, at or below 1900 MSL. Over the Twin Drive-In Theatres (2 mi nnw), turn left to enter downwind for Runway 27. Traffic Pattern Altitude is 1400 MSL.

VOR ARRIVAL (Runway 27 in use) - -

Over the Stinson VOR (SSF, 108.4), contact STINSON TOWER on 119.5 with the ATIS code. Fly outbound on the SSF 320 Radial, 4 nautical miles, decending to Traffic Pattern Altitude of 1400 MSL. Abeam the Tank Farm, turn right to enter downwind for Runway 27.

IFR Arrivals - - - - - - - - - -

Expect the VOR RWY 32 Approach, Circle-to-Land to Runway 09 or 27, or...

Request vectors for the "SMOKESTACK," DOWNTOWN," or "VOR" ARRIVAL, (as appropriate). Cancel IFR prior to the entry point and proceed VFR via the procedure.

NOTICES TO AIRMEN
CONTENT CRITERIA
Revised 1985

ALL AIRPORTS

TABLE 1

Information Category	Content Criteria
Airports	Abandonments (If currently listed in Airport/Facility Directory), Openings, Closings.
Runways	Openings, Closings, Commissionings, Permanent Closures.

NOTAM D AIRPORTS

TABLE 2

Information Category	Content Criteria
Airport Operating Restriction	CFR, ACR, etc.
Approach Light Systems	Commissionings, Changes, Decommissionings, Outages (with Effective Dates), Pilot Control (Commissionings, Decommissionings, Outages (with Effective Dates)).
Control Zones	Hours of Operation (in Local Time).
Displaced Thresholds	Implementation and Changes.
Runways	Ident Changes, Length, Width, Surface Composition Changes.
Runway Light Systems	Commissionings, Changes, Outages (with Effective Dates), Pilot Control (Commissionings, Decommissionings, Outages (with Effective Dates)).

NAVAIDS, COMMUNICATIONS, OTHER SERVICES

TABLE 3

Information Category	Content Criteria
Navigational Facilities	Commissionings (including Ident and Frequency), Decommissionings (including Ident and Frequency), Frequency Changes, Changes in Monitoring Facility and/or Status, Restrictions, Outages (with Effective Dates).
Air Traffic Control Towers, Approach Controls	Commissionings (including Frequencies), Hours of Operation, Decommissionings.
Flight Service Stations	Commissionings, Decommissionings, Hours of Operation; Commissionings, Decommissionings of RCO; Changes in Monitoring Status of RCO; Outages of RCO (with Effective Dates).
Weather	AWOS (System and Frequency).

For sale by the Superintendent of Documents, U.S. Government Printing Office Washington, D.C. 20402

FOREWORD

The primary references for changes to the National Airspace System (NAS) are Aeronautical Charts and Airport/Facility Directories (A/FD) published for the affected area(s). Ideally, most changes to the NAS that meet NOTAM criteria are known sufficiently in advance to allow publication in these publications. When this cannot be done, changes are carried in the Notices to Airman Class II publication, or as a last resort, on the Service A telecommunications system as a NOTAM D item.

NOTAM D information printed in this publication will not be included on the Service A system and will not be provided during pilot briefings unless specifically requested by the pilot.

National Flight Data Center (FDC) NOTAMs primarily reflect changes to Standard Instrument Approach Procedures (SIAPs), Flight Restrictions, and aeronautical chart revisions. The last FDC NOTAM included in this issue is indicated by number and date above. This information insures that subsequent FDC NOTAMs, issued after the cutoff date, can be identified.

The Class II publication contains information of a temporary nature, which is expected to remain for an extended period. This temporary information is carried until it expires or is cancelled. Data of a permanent nature is sometimes carried in the Class II publication as an interim step prior to publication on the appropriate charts or in the A/FD.

The Class II publication is issued every 14 days. The A/FD is published every 56 days. Data in the Class II publication that is current on the effective date of the next A/FD will be transferred to the A/FD and removed from the Class II publication.

Facilities are responsible for forwarding data to the National Flight Data Center (NFDC). Data, still current for the next available Class II publication date, will be published.

This publication is divided into two sections:

1. Section One contains information divided into four categories:

   a. GENERAL

   b. AIRWAYS

   c. FLIGHT RESTRICTIONS

   d. AIRPORTS / FACILITIES / PROCEDURAL NOTAMS

   The first subsection is listed in descending FDC NOTAM numerical order. The second and third subsections are listed by state. The fourth subsection is ordered by state, city, and airport name.

2. The second section contains special notices that are too long or that concern a wide or unspecified geographical area (which may overlap several states) and are not suitable for inclusion in the first section.

The content of these notices vary widely and are included because of their significant impact on flight safety.

NOTES

1. All times are indicated as UTC or local. During periods of Daylight Savings Time, effective hours in local time will be one hour earlier than shown. All states observe Daylight Savings Time except Arizona, that portion of Indiana in the Eastern Time Zone, Puerto Rico, and the Virgin Islands.

2. (|) Vertical line items indicate new information.

FDC NOTAM LEGEND

Code	Explanation
5/103	Accountability number assigned to the message originator.
FI/T	Flight information of a temporary nature.
FI/P	Flight information of a permanent nature.

excp	except

F

FAF	final approach fix
FAR	Federal Aviation Regulation
FDC	Flight Data Center
FI/P	flight information (permanent)
FI/T	flight information (temporary)
FL	Flight Level
FM	from
freq	frequency
FSS	Flight Service Station
ft	feet/foot

G

govt	government
GS	glide slope
GWT	gross weight

H

HAA	height above airport
HAT	height above touchdown
HIRL	High intensity Runway Lights
hol	holiday
hwy	highway

I

IAF	initial approach fix
IAP	initial approach procedure
ident	identification
IF	intermediate fix
IFR	Instrument Flight Rules
IFSS	International Flight Service Station
ILS	instrument landing system
info	information
inop	inoperative
int	intersection
intl	international
intst	intensity
ISMLS	Interim Standard Microwave Landing System

J

J-bar	jet runway barrier

K

kHz	kilohertz

L

L	left (used only to designate rwys) eg. rwy 12L
lat	latitude
lb	pounds (weight)
lctd	located
LDA	Localizer type directional aid
LDIN	Lead-in Lighting System
lgtd	lighted
LMM	compass locator at middle marker ILS
lndg	landing
loc	localizer
LOM	compass locator at outer marker ILS
long	longitude

M

MAA	maximum authorized altitude
mag	magnetic
maint	maintain, maintenance
MALS	Medium Intensity Approach Light System
MALSR	Medium Intensity Approach Light System with Runway Alignment Indicator Lights
MAP	missed approach point
max	maximum
MCA	minimum crossing altitude
MDA	minimum descent altitude
MEA	minimum enroute IFR altitude
MHz	megahertz
min	minimum or minute
MIRL	Medium Intensity Runway Edge Lights
MLS	Microwave Landing System
MM	middle marker ILS
MOCA	minimum obstruction clearance altitude
MRA	minimum reception altitude
MSA	minimum safe altitude
MSL	mean sea level
muni	municipal

N

N	north
NA	not authorized
natl	national
navaid	navigational aid
NDB	Non-directional Radio Beacon
NM	nautical mile(s)
NOPT	no procedure turn required
Nr	number

O

obstn	obstruction
ODALS	Omnidirectional Approach Lighting System
OM	outer marker ILS
oper	operate
opn	operation
orig	original
OTS	Out of Service
ovrn	overrun

P

PAR	Precision Apch Radar
pat	pattern
permly	permanently
PPR	Prior Permission Required
proc	procedure

Q

quad	quadrant

R

R	right (used only to designate rwys) eg. rwy 19R
RAPCON	radar approach control (USAF)
RCAG	Remote Center air/ground
RCLS	Runway Centerline Lights System
RCO	Remote Communications Outlet
rcv	receive
rcvg	receiving
REIL	Runway End Identifier Lights
req	request
RNAV	Area Navigation
RRP	Runway Reference Point
rstrd	restricted
RTS	returned to service
RVR	runway visual range
RVRM	Runway Visual Range Midpoint
RVRT	Runway Visual Range Touchdown
RVRR	Runway Visual Range Rollout
RVV	runway visibility values
rwy	Runway

S

S	south/snow
SDF	Simplified Directional Facility
sec	second
sfc	surface
SFL	Sequenced Flashing Lights
SI	straight-in approach
SM	statute mile(s)
SR	sunrise
SS	sunset
SSAFL	Simplified Short Approach Lighting System with Sequenced Flashers
SSALS	Simplified Short Approach Lighting System
SSALR	Simplified Short Approach Lighting System with Runway Alignment Indicator Lights
STOL	Short take-off & landing runway
svc	service

T

T	true (after a bearing)
TAC	Terminal Area Chart
TACAN	UHF navigational facility—omnidirectional course and distance information
TCA	Terminal Control Area
TCH	Threshold Crossing Height
tfc	traffic

FDC 6/2748 CORRECTION TO PACIFIC CHART SUPPLEMENT AMENDMENT NOTICE EFFECTIVE 25 SEP 1986 TO 23 OCT 1986. MAG VARIATION FOR HONOLULU /HNL/VORTAC SHOULD READ ELEVEN EAST /11E/..AMENDMENT ISSUED IN ERROR.

FDC 6/2036 FI/P CORRECT U.S. SECTIONAL CHART FOR SEATTLE. 31ST EDITION, DTD 3 JUL 86. CHANGE BAKER FSS /BKE/FREQ 122.4 TO FREQ 122.2.

FDC 6/1601 FI/P HI CORRECT U.S. SECTIONAL CHART HAWAIIAN ISLANDS 34TH EDITION DATED 5 JUN 86.. CHANGE BRADSHAW NDB IDENT /BSF/FREQ 349 TO FREQ 339.

FDC 6/995 U.S. CUSTOMS REGULATORY CHANGES. AIRCRAFT PENETRATING THE INNER ADIZ FM ANYWHERE IN THE WESTERN HEMISPHERE SOUTH OF THE U.S. MEXICAN BORDER, SOUTH OF 33 DEG NORTH LATITUDE ON THE PACIFIC COAST, SOUTH OF 30 DEGREES NORTH LATITUDE ON THE ATLANTIC COAST, OR SOUTH OF THE INNER ADIZ ON THE GULF COAST, MUST PROVIDE U.S. CUSTOMS AT LEAST ONE HOUR ADVANCE NOTICE OF PENETRATION OF U.S. AIRSPACE, EFFECTIVE APRIL 30. THIS REQUIREMENT WILL BE EXTENDED TO AIRCRAFT THAT HAVE NOT LANDED IN A FOREIGN PLACE AND AIRCRAFT FROM PUERTO RICO THAT ARE NOT FLYING UNDER IFR FLIGHT RULES. FILING A FLIGHT PLAN WITH THE NOTATION 'ADCUS' WITH THE U.S. FAA AT LEAST ONE HOUR IN ADVANCE OF PENETRATION OF THE ADIZ WILL SATISFY THIS REQUIREMENT. CONTRACTING U.S. CUSTOMS AT 305-536-6591, MIAMI, FL. OR 714-351-6674, RIVERSIDE, CA, AT LEAST ONE HOUR IN ADVANCE WILL ALSO MEET THE REQUIREMENT. LANDING AND INSPECTION REQUIREMENTS FOR AIRCRAFT ARRIVING FROM FOREIGN PLACES REMAIN UNCHANGED.

FDC 6/201 FI/P CORRECT U.S. GOVT WORLD AERONAUTICAL CHART CG21, 16TH EDITION DTD OCT 24, 1985. CHANGED HARRIS VORTAC /HRS/ FREQ 111.6 CHANNEL 053 TO FREQ 109.8 CHANNEL 035.

FDC 5/2508 AUTOMATED VOICE AIRPORT RESERVATION SYSTEM../AVARS/. IN ORDER TO IMPROVE THE AVARS CAPACITY THE FAA HAS INSTALLED TWO ADDITIONAL NON-TOLL FREE NUMBERS.617-275-4837/8. EFFECTIVE NOVEMBER 1 1985 TWO ADDITIONAL TOLL FREE LINES WILL BE AVAILABLE TO BE PART OF 1-800-FAA-1212 NUMBER. FAA PLANS TO CONTINUE THE DUAL /ARO/SYSTEM USING THE AUTOMATED SYSTEM ON 1-800-FAA-1212 AND THE MANUAL ARO SYSTEM WITH NEW YORK 718-632-7806/ CHICAGO 312-263-2575 AND WASHINGTON DC 202-426-8347 UNTIL FURTHER NOTICE. IN AREAS WHERE TOUCH TONE PHONE SYSTEMS ARE NOT AVAILABLE USERS MAY EITHER CONTACT THE NEAREST FAA FLIGHT SERVICE STATION OR THE /ARO/ AT THE NUMBERS LISTED ABOVE AND REQUEST A RESERVATION. USERS DEPARTING A TRANS-ATLANTIC AIRPORT FOR ARRIVAL TO A HIGH DENSITY AIRPORT SHOULD CONTINUE TO USE THE PROCEDURES OUTLINED IN ADVISORY CIRCULAR AC 90-43F PARA 6 DATED APRIL 22 1985 WHICH STATES CONTACT THE NEAREST FLIGHT SERVICE STATION.

FDC 5/594 AIRPORT RESERVATION OFFICE/ARO/ OPERATIONS.. EFF APR 1, 1985..THE FOLLOWING GUIDELINES SHALL BE IN EFFECT.. /ARO/WILL ACCEPT RSVNS FOR WASHINGTON NATIONAL AIRPORT /DCA, JOHN F. KENNEDY INTL ARPT /JFK, LA GUARDIA ARPT/LGA, AND CHICAGO O HARE INTL ARPT /ORD BEGINNING 48 HRS PRIOR TO THE PROPOSED TIME OF OPERATION AT THE AFFECTED ARPT. E.G REQ FOR 11 A.M. OPERATION ON THURSDAY WILL BE ACCEPTED STARTING 11 A.M. ON THE PRECEDING TUESDAY. AN EXCEPTION TO THE 48 HR LIMITATION IS MADE FOR WEEKENDS TO RECOGNIZE NORMAL BUSINESS HOURS. A RSVN REQ FOR AN IFR OPERATION ON MONDAY WILL BE ACCEPTED ON THE PREVIOUS THURSDAY STARTING AT THE PROPOSED HR OF OPERATION. REQUESTS FOR IFR OPERATION ON TUESDAY WILL BE ACCEPTED ON THE PREVIOUS FRIDAY STARTING

AT THE PROPOSED HR OF OPERATION. E.G. REQ FOR 11 A.M. RSVN ON TUESDAY WOULD BE ACCEPTED BEGINNING 11 A.M. ON FRIDAY. IF THE PREVIOUS FRIDAY IS AN OBSERVED HOLIDAY THE PROCEDURE WILL BE IN EFFECT ON THURSDAY. A MAXIMUM OF TWO RSVNS PER PHONE CALL WILL BE ACCEPTED. E.G. A PILOT MAY REQ A RSVN FOR ARRIVAL AND DEPARTURE DURING THE SAME PHONE CALL PROVIDING BOTH FALL ON THE SAME CALENDAR DAY. E.G. A RSVN REQ FOR 11 A.M. ARRIVAL ON FRIDAY AND 4 P.M. DEPARTURE ON THE SAME DAY MAY BE MADE BEGINNING AT 11 A.M. ON WEDNESDAY.

HAZARDOUS INFLIGHT WEATHER ADVISORY SERVICE (HIWAS)

HIWAS is a national program for broadcasting hazardous weather information (SIGMET's, convective SIGMET's, Center Weather Advisories (CWA), AIRMET's, and urgent PIREP's) on a continuous basis over selected VOR's. The program is operational in the Jacksonville, Miami, and Houston Air Route Traffic Control Center (ARTCC) areas. The chart on the following page identifies the current broadcast outlet locations and frequencies. Frequencies shown in the Atlanta ARTCC area are for planning purposes only. HIWAS will be expanded on an ARTCC by ARTCC basis.

Pilots should be aware that:

- Flight service stations broadcast information on hazardous weather not yet covered by an advisory and make an announcement on their frequencies that new HIWAS information is available.
- Controllers in ARTCC's and air traffic control terminals announce updates to HIWAS information on all appropriate frequencies.
- Controllers and specialists will not routinely broadcast SIGMET's, convective SIGMET's, CWA's, AIRMET's, and urgent PIREP's in the commissioned HIWAS areas.

User comments regarding the effectiveness of the HIWAS program and any proposed revision to HIWAS procedures are solicited.

Mail comments to:

Department of Transportation
Federal Aviation Administration
ATTN: ATO-360
800 Independence Ave. S.W.
Washington, DC 20591

Note: For further information on the HIWAS program, refer to the Airman's Information Manual (AIM) and Airport/Facility Directory (AFD). Operational sites are published in the AFD under radio aids to navigation.

AIRPORT RADAR SERVICE AREAS (ARSA)

The National Airspace Review Terminal Airspace Task Group 1-2.2 recommended the ARSA Program as a replacement for the existing Terminal Radar Service Area Program and the FAA has adopted that recommendation. ARSA designations have been made, and effective dates established, for the locations listed below. The following is a summary of the pilot requirements and the ATC procedures for ARSA's. Graphic depictions of each ARSA are also included.

Unless otherwise authorized or required by ATC, the following provisions apply to aircraft operating within an ARSA:

1. Aircraft approaching that would penetrate the ARSA must establish two-way radio communications with ATC prior to entering the ARSA and maintain that communication while operating within the ARSA.
2. Aircraft departing the primary airport within the ARSA must establish two-way communications with ATC prior to departure and maintain that communication while operating within the ARSA. Aircraft departing a satellite airport within the ARSA must contact ATC as soon as practicable after takeoff.
3. Except in an emergency, all operations must be in compliance with ATC clearances and instructions.
4. All arrivals and departures within the ARSA must be in compliance with FAA arrival and departure traffic patterns.
5. Ultralight vehicles and parachute operations may not be conducted within the ARSA except under the terms of an ATC authorization.
6. NOTAM's pertaining to flight within the ARSA must be reviewed as a part of preflight action required by FAR 91.5.

Within ARSA's, ATC will provide the following services:

1. Radar sequencing of all arrivals.
2. Standard separation between all instrument flight rules (IFR) flights.
3. Traffic advisories and safety advisories to all aircraft.
4. Resolve any potential conflict between an aircraft operating IFR and an aircraft operating under visual flight rules by application of conflict resolution procedures.

ARSA's have been designated at the following locations to be effective June 5, 1986.

Albuquerque International Airport, NM
Greater Cincinnati International Airport, KY
Indianapolis International Airport, IN
Phoenix Sky Harbor International Airport, AZ
Tucson International Airport, AZ
Davis-Monthan Air Force Base, AZ
Wichita Mid-Continent Airport, KS

An ARSA has been designated at the following airport to be effective July 3, 1986.

Dallas Love Field, Texas

An ARSA has been designated at the following airport to be effective July 31, 1986.

Lafayette Regional Airport, LA

ARSA's have been designated at the following locations to be effective on August 28, 1986.

Raleigh-Durham, NC

Dulles International Airport, Washington, DC

TERMINAL AREA GRAPHIC NOTICE
(NOT TO BE USED FOR NAVIGATION)

SOUTH LAKE TAHOE, CALIFORNIA
LAKE TAHOE AIRPORT

The Lake Tahoe Airport is closed to aircraft registering 77.1 or more decibles (as listed in FAA AC36-3 series) from 2000-0800 hours local time.

ARRIVAL PROCEDURES:

CAUTION: NORMALLY ASPIRATED PISTON ENGINES SHOULD BE LEANED TO PROVIDE A BEST-POWER MIXTURE DURING THE LANDING. DUE TO THE POSSIBILITY OF AN ABORTED APPROACH, PILOTS OF SUPERCHARGED AIRCRAFT SHOULD USE CAUTION WITH THEIR MIXTURE DUE TO FOULING OF THE SPARKPLUGS AT LOW POWER AND RICH MIXTURE.

RUNWAY 36: When arriving from the northwest through the east, enter the pattern on a wide right downwind, or as directed by the Tower.

When arriving from the southeast through the southwest, the Tower will normally direct you straight-in. If that is not practicable, request an over-flight for right traffic. Make your over-flight at or above 8000' MSL, and descend to pattern altitude on crosswind.

When arriving from the west, the Tower may direct you to cross over the field (mid-field crosswind) for right traffic.

High performance aircraft: Tower will normally assign a left downwind, fly base leg between the river and the ridge or as directed by Tower.

NOTE: CAUTION IS ADVISED DUE TO POSSIBLE DOWNDRAFTS, PARTICULARLY ON SHORT FINAL AND WHEN NORTHERLY WINDS EXCEED 15 KNOTS.

RUNWAY 18: When arriving from the northwest through the east, Tower may direct you to make a straight in. Descend north of the shoreline to cross the shoreline over the meadow, slightly west of "straight in", and at or above 7500' MSL.

When arriving from the southeast through the southwest, Tower will usually direct you to a wide left down-wind entry. If arriving from southwest to remain as far south as feasible until crossing the extended centerline.

Caution is advised due to possible traffic climbing out and/or circling the golf course to gain altitude.

When arriving from the west, Tower normally will advise you to make a straight in. Make your "base" leg north of the shoreline, and turn final at or above 7500' MSL.

CAUTION: ROTOR ACTIVITY (UP AND DOWN-DRAFTS) OFTEN EXISTS THROUGHOUT THE BASIN AND ESPECIALLY ON THE FINAL APPROACH WHEN SOUTHERLY WINDS EXIST. IF PRACTICABLE, MAKE YOUR AIM-POINT APPROXIMATELY ONE-THIRD OF THE WAY DOWN FROM THE RUNWAY (NEAR TAXIWAY "E"). OVER 5000' OF RUNWAY REMAINS FROM THAT POINT.

PATTERN ALTITUDES:

Small aircraft - 7500' MSL (1236' above the airport)
Large aircraft - 8000' MSL (1736' above the airport)

DEPARTURE PROCEDURES:

CAUTION: DENSITY ALTITUDE CAN AND DOES EXCEED 10,000'. PLEASE COMPUTE YOUR PERFORMANCE FACTORS ACCORDINGLY, USE DENSITY ALTITUDE LEANING TECHNIQUES APPROPRIATE TO YOUR AIRCRAFT PRIOR TO TAKEOFF AND ENSURE THAT YOUR WEIGHT AND BALANCE IS WELL WITHIN LIMITATIONS. (Suggestion: Reduce your useful load by at least 2.5% for each 1000' of density altitude, particularly in normally aspirated aircraft.)

NOTE: WE LIVE IN A VERY NOISE-SENSITIVE AREA. PLEASE HELP US BY CLIMBING AT YOUR BEST RATE OF CLIMB SPEED (Vy), AND BY REDUCING TO YOUR CLIMB-POWER SETTING AS SOON AS YOU FEEL IT IS PRACTICABLE.

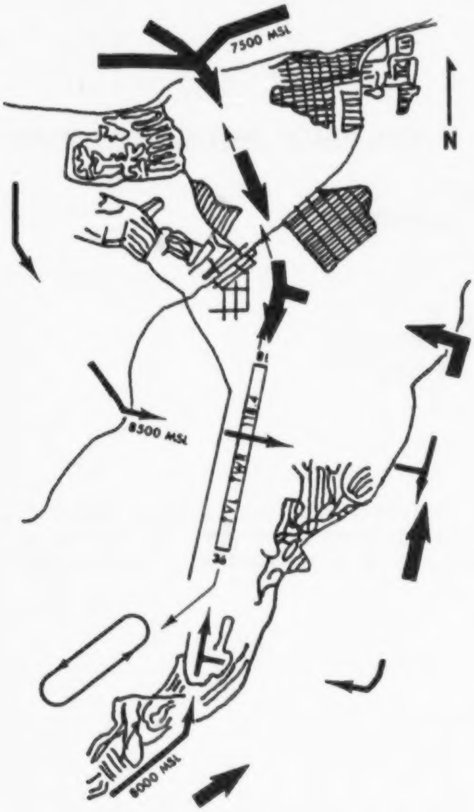
RUNWAY 36: Follow the extended centerline approximately 3/4 mile. At that point you will be abeam a white-fenced pasture and over a large red arrow. Make a slight left turn (to approximately 320 degrees) and follow the meadow to the shoreline. Once you have crossed the shoreline, and are above 7500' MSL turn to your departure heading.

NOTE: Aircraft remaining in closed traffic may make a normal traffic pattern.

RUNWAY 18:

CAUTION: **ALL TERRAIN SOUTH OF THE AIRPORT IS ABOVE THE AIRPORT ELEVATION. DOWNDRAFTS IN EXCESS OF 500FPM OFTEN EXIST THROUGHOUT THE DEPARTURE AREA. CHECK YOUR CLIMB GRADIENT AND OTHER PERFORMANCE FIGURES ACCORDINGLY.**

After clearing the airport boundary, make a slight right turn to follow the river. If making a downwind departure, do not turn crosswind until reaching 7500' MSL, make a wide downwind turn. If you need additional altitude, advise the Tower you will be climbing over the golf course. Use a right-turn climbing pattern, watch out for other traffic, and advise the Tower when you depart the golf course. Downdrafts often exist near the mountains - stay over the golf course.



HIGH ALTITUDE/EN ROUTE FLIGHT ADVISORY SERVICE (HA/EFAS)

HA/EFAS is an expansion of the current EFAS program (See AIM, paragraph 503). When fully implemented, it will provide a discrete frequency for each of the Air Route Traffic Control Center (ARTCC) areas for use by aircraft flying at altitudes of 18,000 feet and above within the center's area. The service expansion was initiated in July 1986 in the Salt Lake City ARTCC area on a frequency of 133.025 mHz.

As service in other areas becomes available the information will be published on charts located on the inside back cover of the Airport Facility Directories.

ALTOONA, PA, AUTOMATED FLIGHT SERVICE STATION

THE ALTOONA, PA AUTOMATED FLIGHT SERVICE STATION (AFSS WAS COMMISSIONED ON AUGUST 26, 1986. ALL SERVICES PROVIDED BY THE ALTOONA FLIGHT SERVICE STATION (FSS) HAVE BEEN TRANSFERRED TO THE AFSS. ALTOONA AFSS HAS ALSO ASSUMED CONTROL OF REMOTE COMMUNICATIONS OUTLET (RCO), AND VERY-HIGH OMNI (VOR) VOICE FREQUENCIES FORMERLY CONTROLLED BY AOO FSS , AS WELL AS ALL FACILITIES CONTROLLED BY PHILIPSBURG, PA FLIGHT SERVICE STATION.

AREA SERVED: THE ALTOONA AFSS'S GEOGRAPHIC AREA OF RESPONSIBILITY IS SW PENNSYLVANIA FOR ALL SERVICES EXCEPT EFAS.

NOTICES TO AIRMEN
CONTENT CRITERIA
Revised 1985

ALL AIRPORTS

TABLE 1

Information Category	Content Criteria
Airports	Abandonments (If currently listed in Airport/Facility Directory), Openings, Closings.
Runways	Openings, Closings, Commissionings, Permanent Closures.

NOTAM D AIRPORTS

TABLE 2

Information Category	Content Criteria
Airport Operating Restriction	CFR, ACR, etc.
Approach Light Systems	Commissionings, Changes, Decommissionings, Outages (with Effective Dates), Pilot Control (Commissionings, Decommissionings, Outages (with Effective Dates)).
Control Zones	Hours of Operation (in Local Time).
Displaced Thresholds	Implementation and Changes.
Runways	Ident Changes, Length, Width, Surface Composition Changes.
Runway Light Systems	Commissionings, Changes, Outages (with Effective Dates), Pilot Control (Commissionings, Decommissionings, Outages (with Effective Dates)).

NAVAIDS, COMMUNICATIONS, OTHER SERVICES

TABLE 3

Information Category	Content Criteria
Navigational Facilities	Commissionings (including Ident and Frequency), Decommissionings (including Ident and Frequency), Frequency Changes, Changes in Monitoring Facility and/or Status, Restrictions, Outages (with Effective Dates).
Air Traffic Control Towers, Approach Controls	Commissionings (including Frequencies), Hours of Operation, Decommissionings.
Flight Service Stations	Commissionings, Decommissionings, Hours of Operation; Commissionings, Decommissionings of RCO; Changes in Monitoring Status of RCO; Outages of RCO (with Effective Dates).
Weather	AWOS (System and Frequency).

FOREWORD

The primary references for changes to the National Airspace System (NAS) are Aeronautical Charts and Airport/Facility Directories (A/FD) published for the affected area(s). Ideally, most changes to the NAS that meet NOTAM criteria are known sufficiently in advance to allow publication in these publications. When this cannot be done, changes are carried in the Notices to Airman Class II publication, or as a last resort, on the Service A telecommunications system as a NOTAM D item.

NOTAM D information printed in this publication will not be included on the Service A system and will not be provided during pilot briefings unless specifically requested by the pilot.

National Flight Data Center (FDC) NOTAMs primarily reflect changes to Standard Instrument Approach Procedures (SIAPs), Flight Restrictions, and aeronautical chart revisions. The last FDC NOTAM included in this issue is indicated by number and date above. This information insures that subsequent FDC NOTAMs, issued after the cutoff date, can be identified.

The Class II publication contains information of a temporary nature, which is expected to remain for an extended period. This temporary information is carried until it expires or is cancelled. Data of a permanent nature is sometimes carried in the Class II publication as an interim step prior to publication on the appropriate charts or in the A/FD.

The Class II publication is issued every 14 days. The A/FD is published every 56 days. Data in the Class II publication that is current on the effective date of the next A/FD will be transferred to the A/FD and removed from the Class II publication.

Facilities are responsible for forwarding data to the National Flight Data Center (NFDC). Data, still current for the next available Class II publication date, will be published.

This publication is divided into two sections:

1. Section One contains information divided into four categories:

   a. GENERAL

   b. AIRWAYS

   c. FLIGHT RESTRICTIONS

   d. AIRPORTS / FACILITIES / PROCEDURAL NOTAMS

   The first subsection is listed in descending FDC NOTAM numerical order. The second and third subsections are listed by state. The fourth subsection is ordered by state, city, and airport name.

2. The second section contains special notices that are too long or that concern a wide or unspecified geographical area (which may overlap several states) and are not suitable for inclusion in the first section.

The content of these notices vary widely and are included because of their significant impact on flight safety.

NOTES

1. All times are indicated as UTC or local. During periods of Daylight Savings Time, effective hours in local time will be one hour earlier than shown. All states observe Daylight Savings Time except Arizona, that portion of Indiana in the Eastern Time Zone, Puerto Rico, and the Virgin Islands.

2. (|) Vertical line items indicate new information.

FDC NOTAM LEGEND

Code	Explanation
5/103	Accountability number assigned to the message originator.
FI/T	Flight information of a temporary nature.
FI/P	Flight information of a permanent nature.

Phone: FTS— 267-9294

ADDRESSING INFORMATION FOR SECTION 2

Federal Aviation Administration, ATO-200, 800 Independence Ave, SW., Washington, DC 20591.

Phone: Commercial— 202-267-8783
Phone: FTS— 267-8783

SUBSCRIPTION INFORMATION

HOW TO ORDER

The Notices to Airmen publication is available by subscription through the Superintendent of Documents. Subscriptions are accepted for a 1 year period. Remittance must be made in advance of shipment. Your check or money order must be made payable to the Superintendent of Documents. Orders can also be charged to your VISA or MASTERCARD account. Orders should be addressed to:

Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402,

or

Phone: (202)783-3238 (Order Desk).

ABBREVIATIONS

The following abbreviations are those most commonly used within this publication. Other abbreviations may be found in the Contraction Handbook, 7340.1.

Note: An "s" may be added for plural. Abbreviations used in FDC NOTAMs are italicized.

A

&	and
AAS	Airport Advisory Service
A/C	Approach Control
acft	aircraft
ACR	Air Carrier
ADF	Automatic Direction Finder
AER	Approach End Runway
AGL	above ground level
AIM	Airman's Information Manual
ALS	Approach light system
ALSF-1	Standard 2400' High-intensity Approach Lighting System with Sequenced Flashers, Category I Configuration
ALSF-2	Standard 2400' High-intensity Approach Lighting System with Sequenced Flashers, Category II Configuration
alt	altitude
altm	altimeter
aln	alternate
ALSTG	altimeter setting
amdt	amendment
apch	approach
apchg	approaching
aprx	approximate
arpt	airport
arr	arrive or arrival
ARSR	Air Route Surveillance Radar
ARTCC	Air Route Traffic Control Center
ASDE	airport surface detection equipment
ASR	Arpt Surveillance Radar
ATC	air traffic control
ATCT	air traffic control tower
ATIS	Automatic Terminal Information Service
avbl	available
awy	airway

B

BC	back course
bcn	beacon
bcst	broadcast
bldg	building
brg	bearing
btn	between
byd	beyond

C

cat	category
CFR	crash fire rescue
clnc	clearance
clsd	closed
cmsnd	commissioned
cntr	center
cntrln	centerline
Comlo	Compass locator
const	construction
cpty	capacity
crs	course
ctc	contact
CTLZ	Control Zone

D

dalgt	daylight
dcmsnd	decommissioned
degs	degrees
dep	depart, departure
DF	direction finder
DH	decision height
DME	UHF standard TACAN compatible distance measuring equipment
dsplcd	displaced
dist	distance
durg	during
DVFR	Defense Visual Flight Rule

E

E	east
EFAS	Enroute Flight Advisory Service
elev	elevation
emerg	emergency
equip	equipment
excp	except

F

FAF	final approach fix
FAR	Federal Aviation Regulation
FDC	Flight Data Center
FI/P	flight information (permanent)
FI/T	flight information (temporary)
FL	Flight Level
FM	from
freq	frequency
FSS	Flight Service Station
ft	feet/foot

G

govt	government
GS	glide slope
GWT	gross weight

H

HAA	height above airport
HAT	height above touchdown
HIRL	High intensity Runway Lights
hol	holiday
hwy	highway

I

IAF	initial approach fix
IAP	initial approach procedure
ident	identification
IF	intermediate fix
IFR	Instrument Flight Rules
IFSS	International Flight Service Station
ILS	instrument landing system
info	information
inop	inoperative
int	intersection
intl	international
intst	intensity
ISMLS	Interim Standard Microwave Landing System

J

J-bar	jet runway barrier

K

kHz	kilohertz

L

L	left (used only to designate rwys) eg. rwy 12L
lat	latitude
lb	pounds (weight)
lctd	located
LDA	Localizer type directional aid
LDIN	Lead-in Lighting System
lgtd	lighted
LMM	compass locator at middle marker ILS
lndg	landing
loc	localizer
LOM	compass locator at outer marker ILS
long	longitude

M

MAA	maximum authorized altitude
mag	magnetic
maint	maintain, maintenance
MALS	Medium Intensity Approach Light System
MALSR	Medium Intensity Approach Light System with Runway Alignment Indicator Lights
MAP	missed approach point
max	maximum
MCA	minimum crossing altitude
MDA	minimum descent altitude
MEA	minimum enroute IFR altitude
MHz	megahertz
min	minimum or minute
MIRL	Medium Intensity Runway Edge Lights
MLS	Microwave Landing System
MM	middle marker ILS
MOCA	minimum obstruction clearance altitude
MRA	minimum reception altitude
MSA	minimum safe altitude
MSL	mean sea level
muni	municipal

N

N	north
NA	not authorized
natl	national
navaid	navigational aid
NDB	Non-directional Radio Beacon
NM	nautical mile(s)
NOPT	no procedure turn required
Nr	number

O

obstn	obstruction
ODALS	Omnidirectional Approach Lighting System
OM	outer marker ILS
oper	operate
opn	operation
orig	original
OTS	Out of Service
ovrn	overrun

P

PAR	Precision Apch Radar
pat	pattern
permly	permanently
PPR	Prior Permission Required
proc	procedure

Q

quad	quadrant

R

R	right (used only to designate rwys) eg. rwy 19R
RAPCON	radar approach control (USAF)
RCAG	Remote Center air/ground
RCLS	Runway Centerline Lights System
RCO	Remote Communications Outlet
rcv	receive
rcvg	receiving
REIL	Runway End Identifier Lights
req	request
RNAV	Area Navigation
RRP	Runway Reference Point
rstrd	restricted
RTS	returned to service
RVR	runway visual range
RVRM	Runway Visual Range Midpoint
RVRT	Runway Visual Range Touchdown
RVRR	Runway Visual Range Rollout
RVV	runway visibility values
rwy	Runway

S

S	south/snow
SDF	Simplified Directional Facility
sec	second
sfc	surface
SFL	Sequenced Flashing Lights
SI	straight-in approach
SM	statute mile(s)
SR	sunrise
SS	sunset
SSAFL	Simplified Short Approach Lighting System with Sequenced Flashers
SSALS	Simplified Short Approach Lighting System
SSALR	Simplified Short Approach Lighting System with Runway Alignment Indicator Lights
STOL	Short take-off & landing runway
svc	service

T

T	true (after a bearing)
TAC	Terminal Area Chart
TACAN	UHF navigational facility—omnidirectional course and distance information
TCA	Terminal Control Area
TCH	Threshold Crossing Height
tfc	traffic
thr	threshold
thru	through
tkof	take-off
tmprly	temporarily
tmpry	temporary
TPA	Traffic Pattern Altitude
TRACON	Terminal Radar approach control
trml	terminal
TRSA	Terminal Radar Service Area
tsnt	transient
TWEB	transcribed weather bcst
twr	tower
twy	taxiway

U

UHF	Ultra high frequency
unavbl	unavailable
unlgtd	unlighted
unmon	unmonitored
unusbl	unusable

V

VASI	Visual Approach Slope Indicator
VDP	visual descent point
VFR	visual flight rules
VHF	Very high frequency
vis	visibility
VOR	VHF Omni-Directional Radio Range
VORTAC	Combined VOR and TACAN System
VOT	a VOR Receiver testing facility
vsby	visibility

W

W	west
wea	weather
wkday	weekday
wkend	weekend
wp	waypoint
wt	weight

Z

Z	Coordinated Universal Time (UTC)

GENERAL

FDC 6/2036 FI/P CORRECT U.S. SECTIONAL CHART FOR SEATTLE 31ST EDITION, DTD 3 JUL 86. CHANGE BAKER FSS /BKE/FREQ 122.4 TO FREQ 122.2.

FDC 6/1601 FI/P HI CORRECT U.S. SECTIONAL CHART HAWAIIAN ISLANDS 34TH EDITION DATED 5 JUN 86. CHANGE PRADSHAW NDB IDENT /BSF/FREQ 349 TO FREQ 339.

FDC 6/995 U.S. CUSTOMS REGULATORY CHANGES. AIRCRAFT PENETRATING THE INNER ADIZ FM ANYWHERE IN THE WESTERN HEMISPHERE SOUTH OF THE U.S. MEXICAN BORDER, SOUTH OF 33 DEG NORTH LATITUDE ON THE PACIFIC COAST, SOUTH OF 30 DEGREES NORTH LATITUDE ON THE ATLANTIC COAST, OR SOUTH OF THE INNER ADIZ ON THE GULF COAST, MUST PROVIDE U.S. CUSTOMS AT LEAST ONE HOUR ADVANCE NOTICE OF PENETRATION OF U.S. AIRSPACE, EFFECTIVE APRIL 30. THIS REQUIREMENT WILL BE EXTENDED TO AIRCRAFT THAT HAVE NOT LANDED IN A FOREIGN PLACE AND AIRCRAFT FROM PUERTO RICO THAT ARE NOT FLYING UNDER IFR FLIGHT RULES. FILING A FLIGHT PLAN WITH THE NOTATION 'ADCUS' WITH THE U.S. FAA AT LEAST ONE HOUR IN ADVANCE OF PENETRATION OF THE ADIZ WILL SATISFY THIS REQUIREMENT. CONTRACTING U.S. CUSTOMS AT 305-536-5591, MIAMI, FL, OR 714-351-6674, RIVERSIDE, CA, AT LEAST ONE HOUR IN ADVANCE WILL ALSO MEET THE REQUIREMENT. LANDING AND INSPECTION REQUIREMENTS FOR AIRCRAFT ARRIVING FROM FOREIGN PLACES REMAIN UNCHANGED.

FDC 6/201 FI/P CORRECT U.S. GOVT WORLD AERONAUTICAL CHART CG21, 18TH EDITION DTD OCT 24, 1985. CHANGED HARRIS VORTAC /HRS/ FREQ 111.6 CHANNEL 053 TO FREQ 109.8 CHANNEL 035.

FDC 5/2508 AUTOMATED VOICE AIRPORT RESERVATION SYSTEM../AVARS/. IN ORDER TO IMPROVE THE AVARS CAPACITY THE FAA HAS INSTALLED TWO ADDITIONAL NON-TOLL FREE NUMBERS..617-275-4837/8. EFFECTIVE NOVEMBER 1 1985 TWO ADDITIONAL TOLL FREE LINES WILL BE AVAILABLE TO BE PART OF 1-800-FAA-1212 NUMBER. FAA PLANS TO CONTINUE THE DUAL /ARO/SYSTEM USING THE AUTOMATED SYSTEM ON 1-800-FAA-1212 AND THE MANUAL ARO SYSTEM WITH NEW YORK 718-632-7806/ CHICAGO 312-263-2575 AND WASHINGTON DC 202-426-9347 UNTIL FURTHER NOTICE. IN AREAS WHERE TOUCH TONE PHONE SYSTEMS ARE NOT AVAILABLE USERS MAY EITHER CONTACT THE NEAREST FAA FLIGHT SERVICE STATION OR THE /ARO/ AT THE NUMBERS LISTED ABOVE AND REQUEST A RESERVATION. USERS DEPARTING A TRANS-ATLANTIC AIRPORT FOR ARRIVAL TO A HIGH DENSITY AIRPORT SHOULD CONTINUE TO USE THE PROCEDURES OUTLINED IN ADVISORY CIRCULAR AC 90-43F PARA 5 DATED APRIL 22 1985 WHICH STATES CONTACT THE NEAREST FLIGHT SERVICE STATION.

FDC 5/594 AIRPORT RESERVATION OFFICE/ARO/ OPERATIONS.. EFF APR 1, 1985..THE FOLLOWING GUIDELINES SHALL BE IN EFFECT.. /ARO/WILL ACCEPT RSVNS FOR WASHINGTON NATIONAL AIRPORT /DCA, JOHN F. KENNEDY INTL ARPT /JFK, LA GUARDIA ARPT/LGA, AND CHICAGO O HARE INTL ARPT /ORD BEGINNING 48 HRS PRIOR TO THE PROPOSED TIME OF OPERATION AT THE AFFECTED ARPT. E.G REQ FOR 11 A.M. OPERATION ON THURSDAY WILL BE ACCEPTED STARTING 11 A.M. ON THE PRECEDING TUESDAY. AN EXCEPTION TO THE 48 HR LIMITATION IS MADE FOR WEEKENDS TO RECOGNIZE NORMAL BUSINESS HOURS. A RSVN REQ FOR AN IFR OPERATION ON MONDAY WILL BE ACCEPTED ON THE PREVIOUS THURSDAY STARTING AT THE PROPOSED HR OF OPERATION. REQUESTS FOR IFR OPERATION ON TUESDAY WILL BE ACCEPTED ON THE PREVIOUS FRIDAY STARTING AT THE PROPOSED HR OF OPERATION. E.G. REQ FOR 11 A.M. RSVN ON TUESDAY WOULD BE ACCEPTED BEGINNING 11 A.M. ON FRIDAY. IF THE PREVIOUS FRIDAY IS AN OBSERVED HOLIDAY THE PROCEDURE WILL BE IN EFFECT ON THURSDAY. A MAXIMUM OF TWO RSVNS PER PHONE CALL WILL BE ACCEPTED. E.G. A PILOT MAY REQ A RSVN FOR ARRIVAL AND DEPARTURE DURING THE SAME PHONE CALL PROVIDING BOTH FALL ON THE SAME CALENDAR DAY. E.G. A RSVN REQ FOR 11 A.M. ARRIVAL ON FRIDAY AND 4 P.M. DEPARTURE ON THE SAME DAY MAY BE MADE BEGINNING AT 11 A.M. ON WEDNESDAY.

HAZARDOUS INFLIGHT WEATHER ADVISORY SERVICE (HIWAS)

HIWAS is a national program for broadcasting hazardous weather information (SIGMET's, convective SIGMET's, Center Weather Advisories (CWA), AIRMET's, and urgent PIREP's) on a continuous basis over selected VOR's. The program is operational in the Jacksonville, Miami, and Houston Air Route Traffic Control Center (ARTCC) areas. The chart on the following page identifies the current broadcast outlet locations and frequencies. Frequencies shown in the Atlanta ARTCC area are for planning purposes only. HIWAS will be expanded on an ARTCC by ARTCC basis.

Pilots should be aware that:

- Flight service stations broadcast information on hazardous weather not yet covered by an advisory and make an announcement on their frequencies that new HIWAS information is available.

- Controllers in ARTCC's and air traffic control terminals announce updates to HIWAS information on all appropriate frequencies.

- Controllers and specialists will not routinely broadcast SIGMET's, convective SIGMET's, CWA's, AIRMET's, and urgent PIREP's in the commissioned HIWAS areas.

User comments regarding the effectiveness of the HIWAS program and any proposed revision to HIWAS procedures are solicited.

Mail comments to:

Department of Transportation
Federal Aviation Administration
ATTN: ATO-360
800 Independence Ave. S.W.
Washington, DC 20591

Note: For further information on the HIWAS program, refer to the Airman's Information Manual (AIM) and Airport/Facility Directory (AFD). Operational sites are published in the AFD under radio aids to navigation.

AIRPORT RADAR SERVICE AREAS (ARSA)

The National Airspace Review Terminal Airspace Task Group 1-2.2 recommended the ARSA Program as a replacement for the existing Terminal Radar Service Area Program and the FAA has adopted that recommendation. ARSA designations have been made, and effective dates established, for the locations listed below. The following is a summary of the pilot requirements and the ATC procedures for ARSA's. Graphic depictions of each ARSA are also included.

Unless otherwise authorized or required by ATC, the following provisions apply to aircraft operating within an ARSA:

1. Aircraft approaching that would penetrate the ARSA must establish two-way radio communications with ATC prior to entering the ARSA and maintain that communication while operating within the ARSA.
2. Aircraft departing the primary airport within the ARSA must establish two-way communications with ATC prior to departure and maintain that communication while operating within the ARSA. Aircraft departing a satellite airport within the ARSA must contact ATC as soon as practicable after takeoff.
3. Except in an emergency, all operations must be in compliance with ATC clearances and instructions.
4. All arrivals and departures within the ARSA must be in compliance with FAA arrival and departure traffic patterns.
5. Ultralight vehicles and parachute operations may not be conducted within the ARSA except under the terms of an ATC authorization.
6. NOTAM's pertaining to flight within the ARSA must be reviewed as a part of preflight action required by FAR 91.5.

Within ARSA's, ATC will provide the following services:

1. Radar sequencing of all arrivals.
2. Standard separation between all instrument flight rules (IFR) flights.
3. Traffic advisories and safety advisories to all aircraft.
4. Resolve any potential conflict between an aircraft operating IFR and an aircraft operating under visual flight rules by application of conflict resolution procedures.

ARSA's have been designated at the following locations to be effective June 5, 1986.

Albuquerque International Airport, NM
Greater Cincinnati International Airport, KY
Indianapolis International Airport, IN
Phoenix Sky Harbor International Airport, AZ
Tucson International Airport, AZ
Davis-Monthan Air Force Base, AZ
Wichita Mid-Continent Airport, KS

An ARSA has been designated at the following airport to be effective July 3, 1986.

Dallas Love Field, Texas

An ARSA has been designated at the following airport to be effective July 31, 1986.

Lafayette Regional Airport, LA

ARSA's have been designated at the following locations to be effective on August 28, 1986.

Raleigh-Durham, NC

TERMINAL AREA GRAPHIC NOTICE
(NOT TO BE USED FOR NAVIGATION)

SOUTH LAKE TAHOE, CALIFORNIA
LAKE TAHOE AIRPORT

The Lake Tahoe Airport is closed to aircraft registering 77.1 or more decibles (as listed in FAA AC36-3 series) from 2000-0800 hours local time.

ARRIVAL PROCEDURES:

CAUTION: NORMALLY ASPIRATED PISTON ENGINES SHOULD BE LEANED TO PROVIDE A BEST-POWER MIXTURE DURING THE LANDING. DUE TO THE POSSIBILITY OF AN ABORTED APPROACH, PILOTS OF SUPERCHARGED AIRCRAFT SHOULD USE CAUTION WITH THEIR MIXTURE DUE TO FOULING OF THE SPARKPLUGS AT LOW POWER AND RICH MIXTURE.

RUNWAY 36: When arriving from the northwest through the east, enter the pattern on a wide right downwind, or as directed by the Tower.

When arriving from the southeast through the southwest, the Tower will normally direct you straight-in. If that is not practicable, request an over-flight for right traffic. Make your over-flight at or above 8000' MSL, and descend to pattern altitude on crosswind.

When arriving from the west, the Tower may direct you to cross over the field (mid-field crosswind) for right traffic.

High performance aircraft: Tower will normally assign a left downwind, fly base leg between the river and the ridge or as directed by Tower.

NOTE: CAUTION IS ADVISED DUE TO POSSIBLE DOWNDRAFTS, PARTICULARLY ON SHORT FINAL AND WHEN NORTHERLY WINDS EXCEED 15 KNOTS.

RUNWAY 18: When arriving from the northwest through the east, Tower may direct you to make a straight in. Descend north of the shoreline to cross the shoreline over the meadow, slightly west of "straight in", and at or above 7500' MSL.

When arriving from the southeast through the southwest, Tower will usually direct you to a wide left down-wind entry. If arriving from southwest to remain as far south as feasible until crossing the extended centerline.

Caution is advised due to possible traffic climbing out and/or circling the golf course to gain altitude.

When arriving from the west, Tower normally will advise you to make a straight in. Make your "base" leg north of the shoreline, and turn final at or above 7500' MSL.

CAUTION: ROTOR ACTIVITY (UP AND DOWN-DRAFTS) OFTEN EXISTS THROUGHOUT THE BASIN AND ESPECIALLY ON THE FINAL APPROACH WHEN SOUTHERLY WINDS EXIST. IF PRACTICABLE, MAKE YOUR AIM-POINT APPROXIMATELY ONE-THIRD OF THE WAY DOWN FROM THE RUNWAY (NEAR TAXIWAY "E"). OVER 5000' OF RUNWAY REMAINS FROM THAT POINT.

PATTERN ALTITUDES:

Small aircraft - 7500' MSL (1236' above the airport)
Large aircraft - 8000' MSL (1736' above the airport)

DEPARTURE PROCEDURES:

CAUTION: DENSITY ALTITUDE CAN AND DOES EXCEED 10,000'. PLEASE COMPUTE YOUR PERFORMANCE FACTORS ACCORDINGLY, USE DENSITY ALTITUDE LEANING TECHNIQUES APPROPRIATE TO YOUR AIRCRAFT PRIOR TO TAKEOFF AND ENSURE THAT YOUR WEIGHT AND BALANCE IS WELL WITHIN LIMITATIONS. (Suggestion: Reduce your useful load by at least 2.5% for each 1000' of density altitude, particularly in normally aspirated aircraft.)

NOTE: WE LIVE IN A VERY NOISE-SENSITIVE AREA. PLEASE HELP US BY CLIMBING AT YOUR BEST RATE OF CLIMB SPEED (Vy), AND BY REDUCING TO YOUR CLIMB-POWER SETTING AS SOON AS YOU FEEL IT IS PRACTICABLE.

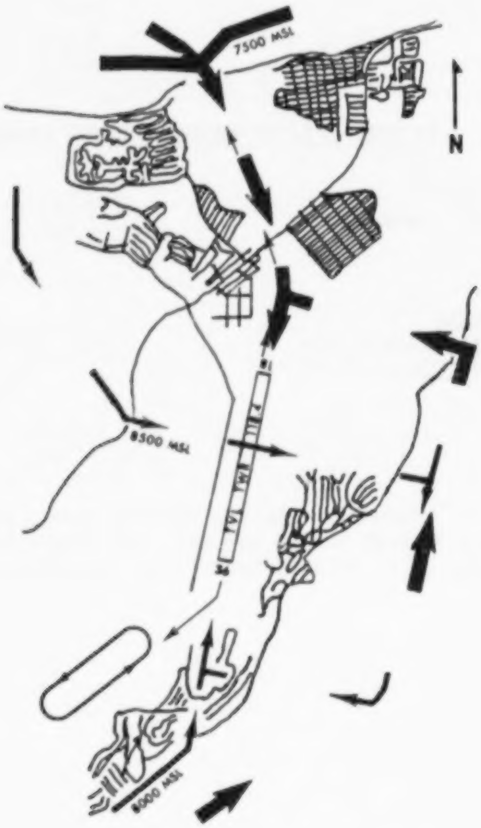
RUNWAY 36: Follow the extended centerline approximately 3/4 mile. At that point you will be abeam a white-fenced pasture and over a large red arrow. Make a slight left turn (to approximately 320 degrees) and follow the meadow to the shoreline. Once you have crossed the shoreline, and are above 7500' MSL turn to your departure heading.

NOTE: Aircraft remaining in closed traffic may make a normal traffic pattern.

RUNWAY 18:

CAUTION: ALL TERRAIN SOUTH OF THE AIRPORT IS ABOVE THE AIRPORT ELEVATION. DOWNDRAFTS IN EXCESS OF 500FPM OFTEN EXIST THROUGHOUT THE DEPARTURE AREA. CHECK YOUR CLIMB GRADIENT AND OTHER PERFORMANCE FIGURES ACCORDINGLY.

After clearing the airport boundary, make a slight right turn to follow the river. If making a downwind departure, do not turn crosswind until reaching 7500' MSL, make a wide downwind turn. If you need additional altitude, advise the Tower you will be climbing over the golf course. Use a right-turn climbing pattern, watch out for other traffic, and advise the Tower when you depart the golf course. Downdrafts often exist near the mountains - stay over the golf course.



HIGH ALTITUDE/EN ROUTE FLIGHT ADVISORY SERVICE (HA/EFAS)

HA/EFAS is an expansion of the current EFAS program (See AIM, paragraph 503). When fully implemented, it will provide a discrete frequency for each of the Air Route Traffic Control Center (ARTCC) areas for use by aircraft flying at altitudes of 18,000 feet and above within the center's area. The service expansion was initiated in July 1986 in the Salt Lake City ARTCC area on a frequency of 133.025 mHz.

As service in other areas becomes available the information will be published on charts located on the inside back cover of the Airport Facility Directories.

ALTOONA, PA, AUTOMATED FLIGHT SERVICE STATION

THE ALTOONA, PA AUTOMATED FLIGHT SERVICE STATION (AFSS WAS COMMISSIONED ON AUGUST 26, 1986. ALL SERVICES PROVIDED BY THE ALTOONA FLIGHT SERVICE STATION (FSS) HAVE BEEN TRANSFERRED TO THE AFSS. ALTOONA AFSS HAS ALSO ASSUMED CONTROL OF REMOTE COMMUNICATIONS OUTLET (RCO), AND VERY-HIGH OMNI (VOR) VOICE FREQUENCIES FORMERLY CONTROLLED BY AOO FSS , AS WELL AS ALL FACILITIES CONTROLLED BY PHILIPSBURG, PA FLIGHT SERVICE STATION.

AREA SERVED: THE ALTOONA AFSS'S GEOGRAPHIC AREA OF RESPONSIBILITY IS SW PENNSYLVANIA FOR ALL SERVICES EXCEPT EFAS.

COLORADO SKI COUNTRY AIRPORTS
SPECIAL AIR TRAFFIC MANAGEMENT PROGRAM

In anticipation of the large number of aircraft operating into and out of Colorado Ski Country Airports during the 1986-1987 ski season, the following procedures have been implemented to enhance safety and minimize traffic delays during this ski season.

These procedures for Colorado Ski Country Airports shall be in effect from November 14, 1986, through April 13, 1987.

FLIGHT PLANS

For the purpose of flight planning the Colorado Ski Country includes the following airports:

- Aspen, Colorado
  - Aspen-Pitkin County/Sardy Field Airport (ASE)
- Eagle, Colorado
  - Eagle County Airport (EGE)
- Gunnison, Colorado
  - Gunnison County Airport (GUC)
- Rifle, Colorado
  - Garfield County Airport (RIL)
- Hayden, Colorado
  - Yampa Valley Airport (HDN)

Pilots are urged to file IFR flight plans at least 4 hours prior to proposed time of departure with the nearest flight service station.

Air field flight plans and flight plans filed less than 4 hours prior to proposed departure times, may experience delays awaiting integration into the IFR system while this program is in effect.

PREFERRED ARRIVAL ROUTING

Unscheduled IFR flights operating into a Colorado Ski Country Airport should file an appropriate preferred route during the hours 1400 UTC and 0300 UTC (0700 MST-2000 MST) daily.

To Aspen, Colorado (ASE) and Rifle, Colorado (RIL)

Route 1	From over fixes between DEN clockwise to COS; file via DEN...DBL...ASE/RIL
Route 2	From over fixes between COS clockwise to GUC; file via GUC...DBL...ASE/RIL
Route 3	From over fixes between GUC clockwise to DEN; file via DBL...ASE/RIL

To Eagle, Colorado (EGE)

Route 1	From over fixes between CHE clockwise to IOC; file via RLG..RLG189R..STUPE ..EGE
Route 2	From over fixes between IOC clockwise to FMN; file via GUC..V421..HAMPS..EGE
Route 3	From over fixes between FMN clockwise to PUC; file via JNC..V134..DBL..V421 ..HAMPS..EGE
Route 4	From over fixes between PUC clockwise to CHE; file via ERR..V200..RLG..RLG189R ..STUPE..EGE

To Gunnison, Colorado (GUC)

Via Airways

Exception: TRAFFIC WILL NOT BE ROUTED DEN J10/J128 GUC.

IFR ARRIVAL/DEPARTURE/PROCEDURES FOR ASPEN

Denver Air Route Traffic Control Center (ARTCC) Traffic Management Unit (TMU) may assign a control departure time (CDT) for IFR flights arriving or departing Aspen-Pitken County/Sardy Field (ASE) whenever marginal weather conditions exist.

Implementation of this part of the special Traffic Management Program will be by special notice. Pilots may obtain current delay information during during preflight and inflight briefings. During marginal weather conditions, pilots are encouraged to contact the tower or flight service station prior to engine startup to obtain latest information.

To ensure the success of this special Traffic Management Program, aircraft inbound to ASE are urged to depart within plus or minus 5 minutes of CDT.

GENERAL INFORMATION

Advise ATC or alternate airport prior to starting approach.

Additional routing may be assigned to ATC based on weather and traffic density.

Pilots destined for Ski Country Airports are encouraged to plan their arrivals Monday through Thursday to avoid extensive arrival delays.

Extensive arrival delays can be anticipated between the hours of 1900 UTC and 0100 UTC (1200 MST - 1800 MST) Friday, Saturday, and Sunday.

Pilots may obtain additional traffic management information from the nearest flight service station.

NOTICES TO AIRMEN
CONTENT CRITERIA
Revised 1985

ALL AIRPORTS

TABLE 1

Information Category	Content Criteria
Airports	Abandonments (If currently listed in Airport/Facility Directory), Openings, Closings.
Runways	Openings, Closings, Commissionings, Permanent Closures.

NOTAM D AIRPORTS

TABLE 2

Information Category	Content Criteria
Airport Operating Restriction	CFR, ACR, etc.
Approach Light Systems	Commissionings, Changes, Decommissionings, Outages (with Effective Dates), Pilot Control (Commissionings, Decommissionings, Outages (with Effective Dates)).
Control Zones	Hours of Operation (in Local Time).
Displaced Thresholds	Implementation and Changes.
Runways	Ident Changes, Length, Width, Surface Composition Changes.
Runway Light Systems	Commissionings, Changes, Outages (with Effective Dates), Pilot Control (Commissionings, Decommissionings, Outages (with Effective Dates)).

NAVAIDS, COMMUNICATIONS, OTHER SERVICES

TABLE 3

Information Category	Content Criteria
Navigational Facilities	Commissionings (including Ident and Frequency), Decommissionings (including Ident and Frequency), Frequency Changes, Changes in Monitoring Facility and/or Status, Restrictions, Outages (with Effective Dates).
Air Traffic Control Towers, Approach Controls	Commissionings (including Frequencies), Hours of Operation, Decommissionings.
Flight Service Stations	Commissionings, Decommissionings, Hours of Operation; Commissionings, Decommissionings of RCO; Changes in Monitoring Status of RCO; Outages of RCO (with Effective Dates).
Weather	AWOS (System and Frequency).

FOREWORD

The primary references for changes to the National Airspace System (NAS) are Aeronautical Charts and Airport/Facility Directories (A/FD) published for the affected area(s). Ideally, most changes to the NAS that meet NOTAM criteria are known sufficiently in advance to allow publication in these publications. When this cannot be done, changes are carried in the Notices to Airman Class II publication, or as a last resort, on the Service A telecommunications system as a NOTAM D item.

NOTAM D information printed in this publication will not be included on the Service A system and will not be provided during pilot briefings unless specifically requested by the pilot.

National Flight Data Center (FDC) NOTAMs primarily reflect changes to Standard Instrument Approach Procedures (SIAPs), Flight Restrictions, and aeronautical chart revisions. The last FDC NOTAM included in this issue is indicated by number and date above. This information insures that subsequent FDC NOTAMs, issued after the cutoff date, can be identified.

The Class II publication contains information of a temporary nature, which is expected to remain for an extended period. This temporary information is carried until it expires or is cancelled. Data of a permanent nature is sometimes carried in the Class II publication as an interim step prior to publication on the appropriate charts or in the A/FD.

The Class II publication is issued every 14 days. The A/FD is published every 56 days. Data in the Class II publication that is current on the effective date of the next A/FD will be transferred to the A/FD and removed from the Class II publication.

Facilities are responsible for forwarding data to the National Flight Data Center (NFDC). Data, still current for the next available Class II publication date, will be published.

This publication is divided into two sections:

1. Section One contains information divided into four categories:

   a. GENERAL

   b. AIRWAYS

   c. FLIGHT RESTRICTIONS

   d. AIRPORTS / FACILITIES / PROCEDURAL NOTAMS

The first subsection is listed in descending FDC NOTAM numerical order. The second and third subsections are listed by state. The fourth subsection is ordered by state, city, and airport name.

2. The second section contains special notices that are too long or that concern a wide or unspecified geographical area (which may overlap several states) and are not suitable for inclusion in the first section.

The content of these notices vary widely and are included because of their significant impact on flight safety.

NOTES

1. All times are indicated as UTC or local. During periods of Daylight Savings Time, effective hours in local time will be one hour earlier than shown. All states observe Daylight Savings Time except Arizona, that portion of Indiana in the Eastern Time Zone, Puerto Rico, and the Virgin Islands.

2. (|) Vertical line items indicate new information.

FDC NOTAM LEGEND

Code	Explanation
5/103	Accountability number assigned to the message originator.
FI/T	Flight information of a temporary nature.
FI/P	Flight information of a permanent nature.

Z	
Z	Coordinated Universal Time (UTC)

GENERAL

FDC 6/2036 FI/P CORRECT U.S. SECTIONAL CHART FOR SEATTLE. 31ST EDITION, DTD 3 JUL 86. CHANGE BAKER FSS /BKE/FREQ 122.4 TO FREQ 122.2.

FDC 6/1601 FI/P HI CORRECT U.S. SECTIONAL CHART HAWAIIAN ISLANDS 34TH EDITION DATED 5 JUN 86. CHANGE BRADSHAW NDB IDENT /BSF/FREQ 349 TO FREQ 339.

FDC 6/995 U.S. CUSTOMS REGULATORY CHANGES. AIRCRAFT PENETRATING THE INNER ADIZ FM ANYWHERE IN THE WESTERN HEMISPHERE SOUTH OF THE U.S. MEXICAN BORDER, SOUTH OF 33 DEG NORTH LATITUDE ON THE PACIFIC COAST, SOUTH OF 30 DEGREES NORTH LATITUDE ON THE ATLANTIC COAST, OR SOUTH OF THE INNER ADIZ ON THE GULF COAST, MUST PROVIDE U.S. CUSTOMS AT LEAST ONE HOUR ADVANCE NOTICE OF PENETRATION OF U.S. AIRSPACE, EFFECTIVE APRIL 30. THIS REQUIREMENT WILL BE EXTENDED TO AIRCRAFT THAT HAVE NOT LANDED IN A FOREIGN PLACE AND AIRCRAFT FROM PUERTO RICO THAT ARE NOT FLYING UNDER IFR FLIGHT RULES. FILING A FLIGHT PLAN WITH THE NOTATION 'ADCUS' WITH THE U.S. FAA AT LEAST ONE HOUR IN ADVANCE OF PENETRATION OF THE ADIZ WILL SATISFY THIS REQUIREMENT. CONTRACTING U.S. CUSTOMS AT 305-536-6591, MIAMI, FL, OR 714-351-6674, RIVERSIDE, CA, AT LEAST ONE HOUR IN ADVANCE WILL ALSO MEET THE REQUIREMENT. LANDING AND INSPECTION REQUIREMENTS FOR AIRCRAFT ARRIVING FROM FOREIGN PLACES REMAIN UNCHANGED.

FDC 6/201 FI/P CORRECT U.S. GOVT WORLD AERONAUTICAL CHART CG21, 18TH EDITION DTD OCT 24, 1985. CHANGED HARRIS VORTAC /HRS/ FREQ 111.6 CHANNEL 053 TO FREQ 109.8 CHANNEL 035.

FDC 5/2508 AUTOMATED VOICE AIRPORT RESERVATION SYSTEM../AVARS/. IN ORDER TO IMPROVE THE AVARS CAPACITY THE FAA HAS INSTALLED TWO ADDITIONAL NON-TOLL FREE NUMBERS..617-275-4837/8. EFFECTIVE NOVEMBER 1 1985 TWO ADDITIONAL TOLL FREE LINES WILL BE AVAILABLE TO BE PART OF 1-800-FAA-1212 NUMBER. FAA PLANS TO CONTINUE THE DUAL /ARO/SYSTEM USING THE AUTOMATED SYSTEM ON 1-800-FAA-1212 AND THE MANUAL ARO SYSTEM WITH NEW YORK 718-632-7806/ CHICAGO 312-263-2576 AND WASHINGTON DC 202-426-9347 UNTIL FURTHER NOTICE. IN AREAS WHERE TOUCH TONE PHONE SYSTEMS ARE NOT AVAILABLE USERS MAY EITHER CONTACT THE NEAREST FAA FLIGHT SERVICE STATION OR THE /ARO/ AT THE NUMBERS LISTED ABOVE AND REQUEST A RESERVATION. USERS DEPARTING A TRANS-ATLANTIC AIRPORT FOR ARRIVAL TO A HIGH DENSITY AIRPORT SHOULD CONTINUE TO USE THE PROCEDURES OUTLINED IN ADVISORY CIRCULAR AC 90-43F PARA 5 DATED APRIL 22 1985 WHICH STATES CONTACT THE NEAREST FLIGHT SERVICE STATION.

FDC 5/594 AIRPORT RESERVATION OFFICE/ARO/ OPERATIONS.. EFF APR 1, 1985..THE FOLLOWING GUIDELINES SHALL BE IN EFFECT.. /ARO/WILL ACCEPT RSVNS FOR WASHINGTON NATIONAL AIRPORT /DCA, JOHN F. KENNEDY INTL ARPT /JFK, LA GUARDIA ARPT/LGA, AND CHICAGO O HARE INTL ARPT /ORD BEGINNING 48 HRS PRIOR TO THE PROPOSED TIME OF OPERATION AT THE AFFECTED ARPT. E.G REQ FOR 11 A.M. OPERATION ON THURSDAY WILL BE ACCEPTED STARTING 11 A.M. ON THE PRECEDING TUESDAY. AN EXCEPTION TO THE 48 HR LIMITATION IS MADE FOR WEEKENDS TO RECOGNIZE NORMAL BUSINESS HOURS. A RSVN REQ FOR AN IFR OPERATION ON MONDAY WILL BE ACCEPTED ON THE PREVIOUS THURSDAY STARTING AT THE PROPOSED HR OF OPERATION. REQUESTS FOR IFR OPERATION ON TUESDAY WILL BE ACCEPTED ON THE PREVIOUS FRIDAY STARTING AT THE PROPOSED HR OF OPERATION. E.G. REQ FOR 11 A.M. RSVN ON TUESDAY WOULD BE ACCEPTED BEGINNING 11 A.M. ON FRIDAY. IF THE PREVIOUS FRIDAY IS AN OBSERVED HOLIDAY THE PROCEDURE WILL BE IN EFFECT ON THURSDAY. A MAXIMUM OF TWO RSVNS PER PHONE CALL WILL BE ACCEPTED. E.G. A PILOT MAY REQ A RSVN FOR ARRIVAL AND DEPARTURE DURING THE SAME PHONE CALL PROVIDING BOTH FALL ON THE SAME CALENDAR DAY. E.G. A RSVN REQ FOR 11 A.M. ARRIVAL ON FRIDAY AND 4 P.M. DEPARTURE ON THE SAME DAY MAY BE MADE BEGINNING AT 11 A.M. ON WEDNESDAY.

HAZARDOUS INFLIGHT WEATHER ADVISORY SERVICE (HIWAS)

HIWAS is a national program for broadcasting hazardous weather information (SIGMET's, convective SIGMET's, Center Weather Advisories (CWA), AIRMET's, and urgent PIREP's) on a continuous basis over selected VOR's. The program is operational in the Jacksonville, Miami, and Houston Air Route Traffic Control Center (ARTCC) areas. The chart on the following page identifies the current broadcast outlet locations and frequencies. Frequencies shown in the Atlanta ARTCC area are for planning purposes only. HIWAS will be expanded on an ARTCC by ARTCC basis.

Pilots should be aware that:

* Flight service stations broadcast information on hazardous weather not yet covered by an advisory and make an announcement on their frequencies that new HIWAS information is available.

* Controllers in ARTCC's and air traffic control terminals announce updates to HIWAS information on all appropriate frequencies.

* Controllers and specialists will not routinely broadcast SIGMET's, convective SIGMET's, CWA's, AIRMET's, and urgent PIREP's in the commissioned HIWAS areas.

User comments regarding the effectiveness of the HIWAS program and any proposed revision to HIWAS procedures are solicited.

Mail comments to:

Department of Transportation
Federal Aviation Administration
ATTN: ATO-360
800 Independence Ave. S.W.
Washington, DC 20591

Note: For further information on the HIWAS program, refer to the Airman's Information Manual (AIM) and Airport/Facility Directory (AFD). Operational sites are published in the AFD under radio aids to navigation.

AIRPORT RADAR SERVICE AREAS (ARSA)

The National Airspace Review Terminal Airspace Task Group 1-2.2 recommended the ARSA Program as a replacement for the existing Terminal Radar Service Area Program and the FAA has adopted that recommendation. ARSA designations have been made, and effective dates established, for the locations listed below. The following is a summary of the pilot requirements and the ATC procedures for ARSA's. Graphic depictions of each ARSA are also included.

Unless otherwise authorized or required by ATC, the following provisions apply to aircraft operating within an ARSA:

1. Aircraft approaching that would penetrate the ARSA must establish two-way radio communications with ATC prior to entering the ARSA and maintain that communication while operating within the ARSA.

2. Aircraft departing the primary airport within the ARSA must establish two-way communications with ATC prior to departur and maintain that communication while operating within the ARSA. Aircraft departing a satellite airport within the ARSA must contact ATC as soon as practicable after takeoff.

3. Except in an emergency, all operations must be in complianc with ATC clearances and instructions.

4. All arrivals and departures within the ARSA must be in compliance with FAA arrival and departure traffic patterns.

5. Ultralight vehicles and parachute operations may not be conducted within the ARSA except under the terms of an ATC authorization.

6. NOTAM's pertaining to flight within the ARSA must be reviewed as a part of preflight action required by FAR 91.5

Within ARSA's, ATC will provide the following services:

1. Radar sequencing of all arrivals.

2. Standard separation between all instrument flight rules (IFR) flights.

3. Traffic advisories and safety advisories to all aircraft.

4. Resolve any potential conflict between an aircraft operatin IFR and an aircraft operating under visual flight rules by application of conflict resolution procedures.

An ARSA has been designated at the following location to be effective November 20, 1986.

Louisville, KY, Standiford Field.

ARSA's have been established at the following locations to be effective December 18, 1986.

Mobile, AL, Bates Field

Providence, RI, Theodore Francis Green State Airport.

An ARSA has been designated at the following airport to become effective on November 20, 1986

TERMINAL AREA GRAPHIC NOTICE
(NOT TO BE USED FOR NAVIGATION)

SOUTH LAKE TAHOE, CALIFORNIA
LAKE TAHOE AIRPORT

The Lake Tahoe Airport is closed to aircraft registering 77.1 or more decibles (as listed in FAA AC36-3 series) from 2000-0800 hours local time.

ARRIVAL PROCEDURES:

CAUTION: NORMALLY ASPIRATED PISTON ENGINES SHOULD BE LEANED TO PROVIDE A BEST-POWER MIXTURE DURING THE LANDING. DUE TO THE POSSIBILITY OF AN ABORTED APPROACH, PILOTS OF SUPERCHARGED AIRCRAFT SHOULD USE CAUTION WITH THEIR MIXTURE DUE TO FOULING OF THE SPARKPLUGS AT LOW POWER AND RICH MIXTURE.

RUNWAY 36: When arriving from the northwest through the east, enter the pattern on a wide right downwind, or as directed by the Tower.

When arriving from the southeast through the southwest, the Tower will normally direct you straight-in. If that is not practicable, request an over-flight for right traffic. Make your over-flight at or above 8000' MSL, and descend to pattern altitude on crosswind.

When arriving from the west, the Tower may direct you to cross over the field (mid-field crosswind) for right traffic.

High performance aircraft: Tower will normally assign a left downwind, fly base leg between the river and the ridge or as directed by Tower.

NOTE: CAUTION IS ADVISED DUE TO POSSIBLE DOWNDRAFTS, PARTICULARLY ON SHORT FINAL AND WHEN NORTHERLY WINDS EXCEED 15 KNOTS.

RUNWAY 18: When arriving from the northwest through the east, Tower may direct you to make a straight in. Descend north of the shoreline to cross the shoreline over the meadow, slightly west of "straight in", and at or above 7500' MSL.

When arriving from the southeast through the southwest, Tower will usually direct you to a wide left down-wind entry. If arriving from southwest to remain as far south as feasible until crossing the extended centerline.

Caution is advised due to possible traffic climbing out and/or circling the golf course to gain altitude.

When arriving from the west, Tower normally will advise you to make a straight in. Make your "base" leg north of the shoreline, and turn final at or above 7500' MSL.

CAUTION: ROTOR ACTIVITY (UP AND DOWN-DRAFTS) OFTEN EXISTS THROUGHOUT THE BASIN AND ESPECIALLY ON THE FINAL APPROACH WHEN SOUTHERLY WINDS EXIST. IF PRACTICABLE, MAKE YOUR AIM-POINT APPROXIMATELY ONE-THIRD OF THE WAY DOWN FROM THE RUNWAY (NEAR TAXIWAY "E"). OVER 5000' OF RUNWAY REMAINS FROM THAT POINT.

PATTERN ALTITUDES:

Small aircraft - 7500' MSL (1236' above the airport)
Large aircraft - 8000' MSL (1736' above the airport)

DEPARTURE PROCEDURES:

CAUTION: DENSITY ALTITUDE CAN AND DOES EXCEED 10,000'. PLEASE COMPUTE YOUR PERFORMANCE FACTORS ACCORDINGLY, USE DENSITY ALTITUDE LEANING TECHNIQUES APPROPRIATE TO YOUR AIRCRAFT PRIOR TO TAKEOFF AND ENSURE THAT YOUR WEIGHT AND BALANCE IS WELL WITHIN LIMITATIONS. (Suggestion: Reduce your useful load by at least 2.5% for each 1000' of density altitude, particularly in normally aspirated aircraft.)

NOTE: WE LIVE IN A VERY NOISE-SENSITIVE AREA. PLEASE HELP US BY CLIMBING AT YOUR BEST RATE OF CLIMB SPEED (Vy), AND BY REDUCING TO YOUR CLIMB-POWER SETTING AS SOON AS YOU FEEL IT IS PRACTICABLE.

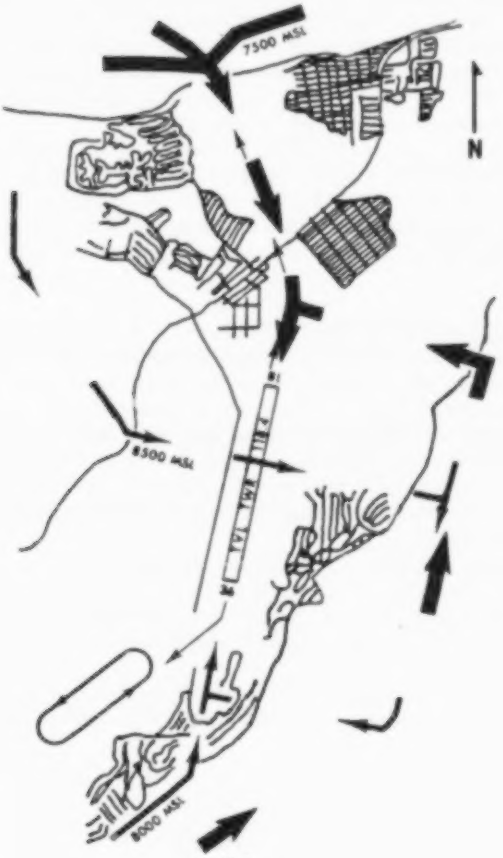
RUNWAY 36: Follow the extended centerline approximately 3/4 mile. At that point you will be abeam a white-fenced pasture and over a large red arrow. Make a slight left turn (to approximately 320 degrees) and follow the meadow to the shoreline. Once you have crossed the shoreline, and are above 7500' MSL turn to your departure heading.

NOTE: Aircraft remaining in closed traffic may make a normal traffic pattern.

RUNWAY 18:

CAUTION: **ALL TERRAIN SOUTH OF THE AIRPORT IS ABOVE THE AIRPORT ELEVATION. DOWNDRAFTS IN EXCESS OF 500FPM OFTEN EXIST THROUGHOUT THE DEPARTURE AREA. CHECK YOUR CLIMB GRADIENT AND OTHER PERFORMANCE FIGURES ACCORDINGLY.**

After clearing the airport boundary, make a slight right turn to follow the river. If making a downwind departure, do not turn crosswind until reaching 7500' MSL, make a wide downwind turn. If you need additional altitude, advise the Tower you will be climbing over the golf course. Use a right-turn climbing pattern, watch out for other traffic, and advise the Tower when you depart the golf course. Downdrafts often exist near the mountains - stay over the golf course.



S-10

HIGH ALTITUDE/EN ROUTE FLIGHT ADVISORY SERVICE (HA/EFAS)

HA/EFAS is an expansion of the current EFAS program (See AIM, paragraph 503). When fully implemented, it will provide a discrete frequency for each of the Air Route Traffic Control Center (ARTCC) areas for use by aircraft flying at altitudes of 18,000 feet and above within the center's area. The service expansion was initiated in July 1986 in the Salt Lake City ARTCC area on a frequency of 133.025 mHz.

As service in other areas becomes available the information will be published on charts located on the inside back cover of the Airport Facility Directories.

ALTOONA, PA, AUTOMATED FLIGHT SERVICE STATION

THE ALTOONA, PA AUTOMATED FLIGHT SERVICE STATION (AFSS WAS COMMISSIONED ON AUGUST 26, 1986. ALL SERVICES PROVIDED BY THE ALTOONA FLIGHT SERVICE STATION (FSS) HAVE BEEN TRANSFERRED TO THE AFSS. ALTOONA AFSS HAS ALSO ASSUMED CONTROL OF REMOTE COMMUNICATIONS OUTLET (RCO), AND VERY-HIGH OMNI (VOR) VOICE FREQUENCIES FORMERLY CONTROLLED BY AOO FSS , AS WELL AS ALL FACILITIES CONTROLLED BY PHILIPSBURG, PA FLIGHT SERVICE STATION.

AREA SERVED: THE ALTOONA AFSS'S GEOGRAPHIC AREA OF RESPONSIBILITY IS SW PENNSYLVANIA FOR ALL SERVICES EXCEPT EFAS.

RADIO AIDS

A. NAVIGATIONAL AIDS WITH VOICE CAPABILITY, (PILOTS TRANSMIT ON 122.1 AND RECEIVE ON THE VOR FREQUENCY.)

COLORADO SKI COUNTRY AIRPORTS
SPECIAL AIR TRAFFIC MANAGEMENT PROGRAM

In anticipation of the large number of aircraft operating into and out of Colorado Ski Country Airports during the 1986-1987 ski season, the following procedures have been implemented to enhance safety and minimize traffic delays during this ski season.

These procedures for Colorado Ski Country Airports shall be in effect from November 14, 1986, through April 13, 1987.

FLIGHT PLANS

For the purpose of flight planning the Colorado Ski Country includes the following airports:

Aspen, Colorado
    Aspen-Pitkin County/Sardy Field Airport (ASE)

Eagle, Colorado
    Eagle County Airport (EGE)

Gunnison, Colorado
    Gunnison County Airport (GUC)

Rifle, Colorado
    Garfield County Airport (RIL)

Hayden, Colorado
    Yampa Valley Airport (HDN)

Pilots are urged to file IFR flight plans at least 4 hours prior to proposed time of departure with the nearest flight service station.

Air filed flight plans and flight plans filed less than 4 hours prior to proposed departure times, may experience delays awaiting integration into the IFR system while this program is in effect.

(Revised 11/19/86)

PREFERRED ARRIVAL ROUTING

Unscheduled IFR flights operating into a Colorado Ski Country Airport should file an appropriate preferred route during the hours 1400 UTC and 0300 UTC (0700 MST-2000 MST) daily.

To Aspen, Colorado (ASE) and Rifle, Colorado (RIL)

Route 1	From over fixes between DEN clockwise to COS; file via DEN..DBL..ASE/RIL
Route 2	From over fixes between COS clockwise to HBU; file via HBU..DBL..ASE/RIL
Route 3	From over fixes between GUC clockwise to DEN; file via DBL..ASE/RIL

To Eagle, Colorado (EGE)

Route 1	From over fixes between CHE clockwise to IOC; file via RLG.RLG189R.STUPE ..EGE
Route 2	From over fixes between IOC clockwise to FMN; file via HBU.V421.HAMPS..EGE
Route 3	From over fixes between FMN clockwise to PUC; file via JNC.V134.DBL.V421 .HAMPS..EGE
Route 4	From over fixes between PUC clockwise to CHE; file via EKR.V200.RLG.RLG189R .STUPE..EGE

To Gunnison, Colorado (GUC)

Via Airways

Exception: TRAFFIC WILL NOT BE ROUTED DEN J10/J128 HBU.

(Revised 11/19/86)

IFR ARRIVAL/DEPARTURE/PROCEDURES FOR ASPEN

Denver Air Route Traffic Control Center (ARTCC) Traffic Management Unit (TMU) may assign a control departure time (CDT) for IFR flights arriving or departing Aspen-Pitken County/Sardy Field (ASE) whenever marginal weather conditions exist.

Implementation of this part of the special Traffic Management Program will be by special notice. Pilots may obtain current delay information during preflight and inflight briefings. During marginal weather conditions, pilots are encouraged to contact the tower or flight service station prior to engine startup to obtain latest information.

To ensure the success of this special Traffic Management Program, aircraft inbound to ASE are urged to depart within plus or minus 5 minutes of CDT.

GENERAL INFORMATION

Advise ATC of alternate airport prior to starting approach.

Additional routing may be assigned by ATC based on weather and traffic density.

Pilots destined for Ski Country Airports are encouraged to plan their arrivals Monday through Thursday to avoid extensive arrival delays.

Extensive arrival delays can be anticipated between the hours of 1900 UTC and 0100 UTC (1200 MST - 1800 MST) Friday, Saturday, and Sunday.

Pilots may obtain additional traffic management information from the nearest flight service station.

(Revised 11/19/86)

ALL AIRPORTS

TABLE 1

Information Category	Content Criteria
Airports	Abandonments (If currently listed in Airport/Facility Directory), Openings, Closings.
Runways	Openings, Closings, Commissionings, Permanent Closures.

NOTAM D AIRPORTS

TABLE 2

Information Category	Content Criteria
Airport Operating Restriction	CFR, ACR, etc.
Approach Light Systems	Commissionings, Changes, Decommissionings, Outages (with Effective Dates), Pilot Control (Commissionings, Decommissionings, Outages (with Effective Dates)).
Control Zones	Hours of Operation (in Local Time).
Displaced Thresholds	Implementation and Changes.
Runways	Ident Changes, Length, Width, Surface Composition Changes.
Runway Light Systems	Commissionings, Changes, Outages (with Effective Dates), Pilot Control (Commissionings, Decommissionings, Outages (with Effective Dates)).

NAVAIDS, COMMUNICATIONS, OTHER SERVICES

TABLE 3

Information Category	Content Criteria
Navigational Facilities	Commissionings (including Ident and Frequency), Decommissionings (including Ident and Frequency), Frequency Changes, Changes in Monitoring Facility and/or Status, Restrictions, Outages (with Effective Dates).
Air Traffic Control Towers, Approach Controls	Commissionings (including Frequencies), Hours of Operation, Decommissionings.
Flight Service Stations	Commissionings, Decommissionings, Hours of Operation; Commissionings, Decommissionings of RCO; Changes in Monitoring Status of RCO; Outages of RCO (with Effective Dates).
Weather	AWOS (System and Frequency).

FOREWORD

The primary references for changes to the National Airspace System (NAS) are Aeronautical Charts and Airport/Facility Directories (A/FD) published for the affected area(s). Ideally, most changes to the NAS that meet NOTAM criteria are known sufficiently in advance to allow publication in these publications. When this cannot be done, changes are carried in the Notices to Airman Class II publication, or as a last resort, on the Service A telecommunications system as a NOTAM D item.

NOTAM D information printed in this publication will not be included on the Service A system and will not be provided during pilot briefings unless specifically requested by the pilot.

National Flight Data Center (FDC) NOTAMs primarily reflect changes to Standard Instrument Approach Procedures (SIAPs), Flight Restrictions, and aeronautical chart revisions. The last FDC NOTAM included in this issue is indicated by number and date above. This information insures that subsequent FDC NOTAMs, issued after the cutoff date, can be identified.

The Class II publication contains information of a temporary nature, which is expected to remain for an extended period. This temporary information is carried until it expires or is cancelled. Data of a permanent nature is sometimes carried in the Class II publication as an interim step prior to publication on the appropriate charts or in the A/FD.

The Class II publication is issued every 14 days. The A/FD is published every 56 days. Data in the Class II publication that is current on the effective date of the next A/FD will be transferred to the A/FD and removed from the Class II publication.

Facilities are responsible for forwarding data to the National Flight Data Center (NFDC). Data, still current for the next available Class II publication date, will be published.

This publication is divided into two sections:

1. Section One contains information divided into four categories:

a. GENERAL

b. AIRWAYS

c. FLIGHT RESTRICTIONS

d. AIRPORTS / FACILITIES / PROCEDURAL NOTAMS

The first subsection is listed in descending FDC NOTAM numerical order. The second and third subsections are listed by state. The fourth subsection is ordered by state, city, and airport name.

2. The second section contains special notices that are too long or that concern a wide or unspecified geographical area (which may overlap several states) and are not suitable for inclusion in the first section.

The content of these notices vary widely and are included because of their significant impact on flight safety.

NOTES

1. All times are indicated as UTC or local. During periods of Daylight Savings Time, effective hours in local time will be one hour earlier than shown. All states observe Daylight Savings Time except Arizona, that portion of Indiana in the Eastern Time Zone, Puerto Rico, and the Virgin Islands.

2. (|) Vertical line items indicate new information.

FDC NOTAM LEGEND

Code	Explanation
5/103	Accountability number assigned to the message originator.
FI/T	Flight information of a temporary nature.
FI/P	Flight information of a permanent nature.

HAZARDOUS INFLIGHT WEATHER ADVISORY SERVICE (HIWAS)

HIWAS is a national program for broadcasting hazardous weather information (AWW's, SIGMET's, convective SIGMET's, CWA's, AIRMET's, and urgent PIREP's) on a continuous basis over selected VOR's. The program is operational in the Jacksonville, Miami, and Houston Air Route Traffic Control Center (ARTCC) areas. The chart on the following page identifies the current broadcast outlet locations and frequencies. Frequencies shown in the Atlanta ARTCC area are for planning purposes only. HIWAS will be expanded on an ARTCC by ARTCC basis.

Pilots should be aware that:

* Flight service stations broadcast information on hazardous weather not yet covered by an advisory and make an announcement on their frequencies that new HIWAS information is available.

* Controllers in ARTCC's and air traffic control terminals announce updates to HIWAS information on all appropriate frequencies.

* Controllers and specialists will not routinely broadcast AWW's, SIGMET's, convective SIGMET's, CWA's, AIRMET's, and urgent PIREP's in the commissioned HIWAS areas.

User comments regarding the effectiveness of the HIWAS program and any proposed revision to HIWAS procedures are solicited.

Mail comments to:

Department of Transportation
Federal Aviation Administration
ATTN: ATO-310
800 Independence Avenue, S.W.
Washington, D.C. 20591

Note: For further information on the HIWAS program, refer to the Airman's Information Manual (AIM) and Airport/Facility Directory (AFD). Operational sites are published in the AFD under radio aids to navigation.

AIRPORT RADAR SERVICE AREAS (ARSA)

The National Airspace Review Terminal Airspace Task Group 1-2.2 recommended the ARSA Program as a replacement for the existing Terminal Radar Service Area Program and the FAA has adopted that recommendation. ARSA designations have been made, and effective dates established, for the locations listed below. The following is a summary of the pilot requirements and the ATC procedures for ARSA's. Graphic depictions of each ARSA are also included.

Unless otherwise authorized or required by ATC, the following provisions apply to aircraft operating within an ARSA:

1. Aircraft approaching that would penetrate the ARSA must establish two-way radio communications with ATC prior to entering the ARSA and maintain that communication while operating within the ARSA.
2. Aircraft departing the primary airport within the ARSA must establish two-way communications with ATC prior to departure and maintain that communication while operating within the ARSA. Aircraft departing a satellite airport within the ARSA must contact ATC as soon as practicable after takeoff.
3. Except in an emergency, all operations must be in compliance with ATC clearances and instructions.
4. All arrivals and departures within the ARSA must be in compliance with FAA arrival and departure traffic patterns.
5. Ultralight vehicles and parachute operations may not be conducted within the ARSA except under the terms of an ATC authorization.
6. NOTAM's pertaining to flight within the ARSA must be reviewed as a part of preflight action required by FAR 91.5

Within ARSA's, ATC will provide the following services:

1. Radar sequencing of all arrivals.
2. Standard separation between all instrument flight rules (IFR) flights.
3. Traffic advisories and safety advisories to all aircraft.
4. Resolve any potential conflict between an aircraft operating IFR and an aircraft operating under visual flight rules by application of conflict resolution procedures.

An ARSA has been designated at the following location to be effective November 20, 1986.

Louisville, KY, Standiford Field.

ARSA's have been established at the following locations to be effective December 18, 1986.

Mobile, AL, Bates Field

Providence, RI, Theodore Francis Green State Airport.

An ARSA has been designated at the following airport to become effective on November 20, 1986

TERMINAL AREA GRAPHIC NOTICE
(NOT TO BE USED FOR NAVIGATION)

SOUTH LAKE TAHOE, CALIFORNIA
LAKE TAHOE AIRPORT

The Lake Tahoe Airport is closed to aircraft registering 77.1 or more decibles (as listed in FAA AC36-3 series) from 2000-0800 hours local time.

ARRIVAL PROCEDURES:

CAUTION: NORMALLY ASPIRATED PISTON ENGINES SHOULD BE LEANED TO PROVIDE A BEST-POWER MIXTURE DURING THE LANDING. DUE TO THE POSSIBILITY OF AN ABORTED APPROACH, PILOTS OF SUPERCHARGED AIRCRAFT SHOULD USE CAUTION WITH THEIR MIXTURE DUE TO FOULING OF THE SPARKPLUGS AT LOW POWER AND RICH MIXTURE.

RUNWAY 36: When arriving from the northwest through the east, enter the pattern on a wide right downwind, or as directed by the Tower.

When arriving from the southeast through the southwest, the Tower will normally direct you straight-in. If that is not practicable, request an over-flight for right traffic. Make your over-flight at or above 8000' MSL, and descend to pattern altitude on crosswind.

When arriving from the west, the Tower may direct you to cross over the field (mid-field crosswind) for right traffic.

High performance aircraft: Tower will normally assign a left downwind, fly base leg between the river and the ridge or as directed by Tower.

NOTE: CAUTION IS ADVISED DUE TO POSSIBLE DOWNDRAFTS, PARTICULARLY ON SHORT FINAL AND WHEN NORTHERLY WINDS EXCEED 15 KNOTS.

RUNWAY 18: When arriving from the northwest through the east, Tower may direct you to make a straight in. Descend north of the shoreline to cross the shoreline over the meadow, slightly west of "straight in", and at or above 7500' MSL.

When arriving from the southeast through the southwest, Tower will usually direct you to a wide left down-wind entry. If arriving from southwest to remain as far south as feasible until crossing the extended centerline.

Caution is advised due to possible traffic climbing out and/or circling the golf course to gain altitude.

When arriving from the west, Tower normally will advise you to make a straight in. Make your "base" leg north of the shoreline, and turn final at or above 7500' MSL.

CAUTION: ROTOR ACTIVITY (UP AND DOWN-DRAFTS) OFTEN EXISTS THROUGHOUT THE BASIN AND ESPECIALLY ON THE FINAL APPROACH WHEN SOUTHERLY WINDS EXIST. IF PRACTICABLE, MAKE YOUR AIM-POINT APPROXIMATELY ONE-THIRD OF THE WAY DOWN FROM THE RUNWAY (NEAR TAXIWAY "E"). OVER 5000' OF RUNWAY REMAINS FROM THAT POINT.

PATTERN ALTITUDES:

Small aircraft - 7500' MSL (1236' above the airport)
Large aircraft - 8000' MSL (1736' above the airport)

DEPARTURE PROCEDURES:

CAUTION: DENSITY ALTITUDE CAN AND DOES EXCEED 10,000'. PLEASE COMPUTE YOUR PERFORMANCE FACTORS ACCORDINGLY, USE DENSITY ALTITUDE LEANING TECHNIQUES APPROPRIATE TO YOUR AIRCRAFT PRIOR TO TAKEOFF AND ENSURE THAT YOUR WEIGHT AND BALANCE IS WELL WITHIN LIMITATIONS. (Suggestion: Reduce your useful load by at least 2.5% for each 1000' of density altitude, particularly in normally aspirated aircraft.)

NOTE: WE LIVE IN A VERY NOISE-SENSITIVE AREA. PLEASE HELP US BY CLIMBING AT YOUR BEST RATE OF CLIMB SPEED (Vy), AND BY REDUCING TO YOUR CLIMB-POWER SETTING AS SOON AS YOU FEEL IT IS PRACTICABLE.

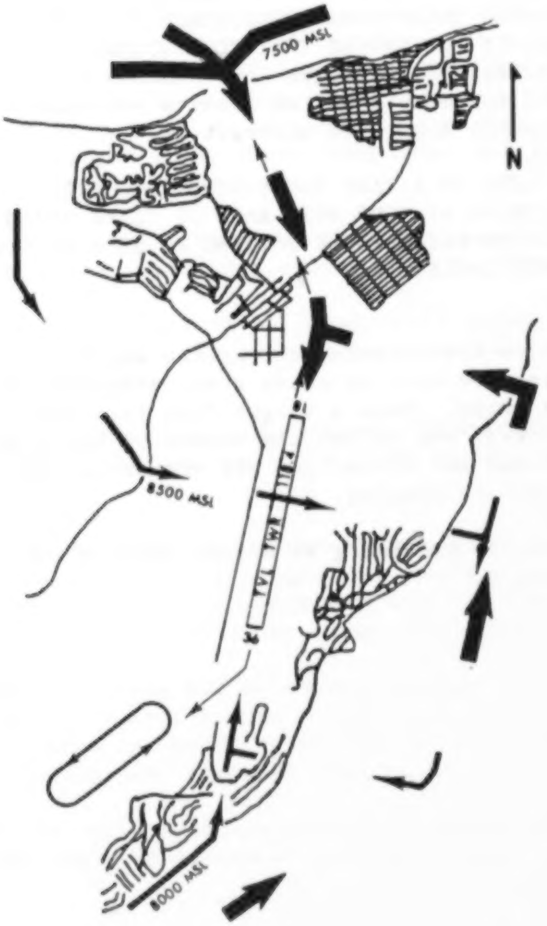
RUNWAY 36: Follow the extended centerline approximately 3/4 mile. At that point you will be abeam a white-fenced pasture and over a large red arrow. Make a slight left turn (to approximately 320 degrees) and follow the meadow to the shoreline. Once you have crossed the shoreline, and are above 7500' MSL turn to your departure heading.

NOTE: Aircraft remaining in closed traffic may make a normal traffic pattern.

RUNWAY 18:

CAUTION: ALL TERRAIN SOUTH OF THE AIRPORT IS ABOVE THE AIRPORT ELEVATION. DOWNDRAFTS IN EXCESS OF 500FPM OFTEN EXIST THROUGHOUT THE DEPARTURE AREA. CHECK YOUR CLIMB GRADIENT AND OTHER PERFORMANCE FIGURES ACCORDINGLY.

After clearing the airport boundary, make a slight right turn to follow the river. If making a downwind departure, do not turn crosswind until reaching 7500' MSL, make a wide downwind turn. If you need additional altitude, advise the Tower you will be climbing over the golf course. Use a right-turn climbing pattern, watch out for other traffic, and advise the Tower when you depart the golf course. Downdrafts often exist near the mountains - stay over the golf course.



HIGH ALTITUDE/EN ROUTE FLIGHT ADVISORY SERVICE (HA/EFAS)

HA/EFAS is an expansion of the current EFAS program (See AIM, paragraph 503). When fully implemented, it will provide a discrete frequency for each of the Air Route Traffic Control Center (ARTCC) areas for use by aircraft flying at altitudes of 18,000 feet and above within the center's area. The service expansion was initiated in July 1986 in the Salt Lake City ARTCC area on a frequency of 133.025 mHz.

As service in other areas becomes available the information will be published on charts located on the inside back cover of the Airport Facility Directories.

ALTOONA, PA, AUTOMATED FLIGHT SERVICE STATION

THE ALTOONA, PA AUTOMATED FLIGHT SERVICE STATION (AFSS WAS COMMISSIONED ON AUGUST 26, 1986. ALL SERVICES PROVIDED BY THE ALTOONA FLIGHT SERVICE STATION (FSS) HAVE BEEN TRANSFERRED TO THE AFSS. ALTOONA AFSS HAS ALSO ASSUMED CONTROL OF REMOTE COMMUNICATIONS OUTLET (RCO), AND VERY-HIGH OMNI (VOR) VOICE FREQUENCIES FORMERLY CONTROLLED BY AOO FSS , AS WELL AS ALL FACILITIES CONTROLLED BY PHILIPSBURG, PA FLIGHT SERVICE STATION.

AREA SERVED: THE ALTOONA AFSS'S GEOGRAPHIC AREA OF RESPONSIBILITY IS SW PENNSYLVANIA FOR ALL SERVICES EXCEPT EFAS.

RADIO AIDS

A. NAVIGATIONAL AIDS WITH VOICE CAPABILITY, (PILOTS TRANSMIT ON 122.1 AND RECEIVE ON THE VOR FREQUENCY.)

COLORADO SKI COUNTRY AIRPORTS
SPECIAL AIR TRAFFIC MANAGEMENT PROGRAM

In anticipation of the large number of aircraft operating into and out of Colorado Ski Country Airports during the 1986-1987 ski season, the following procedures have been implemented to enhance safety and minimize traffic delays during this ski season.

These procedures for Colorado Ski Country Airports shall be in effect from November 14, 1986, through April 13, 1987.

FLIGHT PLANS

For the purpose of flight planning the Colorado Ski Country includes the following airports:

Aspen, Colorado
    Aspen-Pitkin County/Sardy Field Airport (ASE)

Eagle, Colorado
    Eagle County Airport (EGE)

Gunnison, Colorado
    Gunnison County Airport (GUC)

Rifle, Colorado
    Garfield County Airport (RIL)

Hayden, Colorado
    Yampa Valley Airport (HDN)

Pilots are urged to file IFR flight plans at least 4 hours prior to proposed time of departure with the nearest flight service station.

Air filed flight plans and flight plans filed less than 4 hours prior to proposed departure times, may experience delays awaiting integration into the IFR system while this program is in effect.

(Revised 11/19/86)

PREFERRED ARRIVAL ROUTING

Unscheduled IFR flights operating into a Colorado Ski Country Airport should file an appropriate preferred route during the hours 1400 UTC and 0300 UTC (0700 MST-2000 MST) daily.

To Aspen, Colorado (ASE) and Rifle, Colorado (RIL)

Route 1	From over fixes between DEN clockwise to COS; file via DEN..DBL..ASE/RIL
Route 2	From over fixes between COS clockwise to HBU; file via HBU..DBL..ASE/RIL
Route 3	From over fixes between GUC clockwise to DEN; file via DBL..ASE/RIL

To Eagle, Colorado (EGE)

Route 1	From over fixes between CHE clockwise to IOC; file via RLG.RLG189R.STUPE ..EGE
Route 2	From over fixes between IOC clockwise to FMN; file via HBU.V421.HAMPS..EGE
Route 3	From over fixes between FMN clockwise to PUC; file via JNC.V134.DBL.V421 .HAMPS..EGE
Route 4	From over fixes between PUC clockwise to CHE; file via EKR.V200.RLG.RLG189R .STUPE..EGE

To Gunnison, Colorado (GUC)

Via Airways

Exception: TRAFFIC WILL NOT BE ROUTED DEN J10/J128 HBU.

(Revised 11/19/86)

IFR ARRIVAL/DEPARTURE/PROCEDURES FOR ASPEN

Denver Air Route Traffic Control Center (ARTCC) Traffic Management Unit (TMU) may assign a control departure time (CDT) for IFR flights arriving or departing Aspen-Pitken County/Sardy Field (ASE) whenever marginal weather conditions exist.

Implementation of this part of the special Traffic Management Program will be by special notice. Pilots may obtain current delay information during preflight and inflight briefings. During marginal weather conditions, pilots are encouraged to contact the tower or flight service station prior to engine startup to obtain latest information.

To ensure the success of this special Traffic Management Program, aircraft inbound to ASE are urged to depart within plus or minus 5 minutes of CDT.

GENERAL INFORMATION

Advise ATC of alternate airport prior to starting approach.

Additional routing may be assigned by ATC based on weather and traffic density.

Pilots destined for Ski Country Airports are encouraged to plan their arrivals Monday through Thursday to avoid extensive arrival delays.

Extensive arrival delays can be anticipated between the hours of 1900 UTC and 0100 UTC (1200 MST - 1800 MST) Friday, Saturday, and Sunday.

Pilots may obtain additional traffic management information from the nearest flight service station.
